BOONTON, NJ | (908)294-3624 | amerweska@gmail.com | [LinkedIn Profile](#)

PROFESSIONAL SUMMARY

Results-oriented SDET | QA Automation Engineer with 7+ years of experience in capital markets, brokerage, fintech, and enterprise web applications. Proven ability to develop scalable automation frameworks, drive performance/load testing, and integrate QA into CI/CD pipelines. Adept in API/UI automation using Java, Selenium, REST Assured, and Postman. Skilled at SQL-based data validations and backend testing for high-volume financial systems. Known for mentoring junior QAs, ensuring regulatory compliance, and driving stable releases in Agile-Scrum environments.

SKILLS

Languages: Java, SQL, JavaScript

Automation: Selenium Web Driver, Cypress, Jest, REST Assured, Postman, Appium, TestNG, JUnit, Cucumber

Performance & Monitoring: JMeter, Load Runner, New Relic, Grafana, SonarQube

DevOps & CI/CD: Jenkins, GitHub, GitLab, Docker,

Kubernetes, AWS, Azure

WEB/UI: HTML, CSS

Testing Areas: Functional Testing, Regression Testing, Risk-Based Testing, Database Testing, API Testing, Mobile Testing

Tools: MVS (mainframe), Jira, Confluence, Slack, Harness

Methodologies: Agile-Scrum, Risk-Based Testing, BDD, Test Strategy Design

Soft Skills: Mentorship, Test Documentation, UAT Support, Defect Triage, Collaboration & Communication

WORK EXPERIENCE

Software Development Engineer in Test (SDET)

Feb 2022 – Present

[BNY Mellon](#) – Jersey City, NJ

Designing and executing automation tests for Spring Boot-based APIs and UI layers using Selenium, Java and Rest Assured.

Building and optimizing SQL scripts for backend validation across financial transactions and capital market pipelines.

Leveraging QA testing for Capital Markets modules and Derivative Trading modules, including tax and trade validation processes. Integrating test suites with Jenkins pipelines for continuous validation and release readiness.

Mentoring junior team members and shared best practices for automation and defect triaging.

Executing performance testing with JMeter and integrated visual dashboards using Grafana.

Maintaining Docker and cloud-based (AWS/Azure) test environments to ensure system parity across testing layers.

Collaborating with cross-functional Agile teams to ensure test coverage, resolve issues, and improve release confidence.

Utilizing tools such as GitHub, SonarQube, AWS, Azure, and Grafana for continuous testing and monitoring.

Quality Assurance Engineer

Jan 2020 – Jan 2022

[Helioteca](#) – Tysons, VA

Developed Selenium and REST automation for high-availability, transaction-heavy fintech applications.

Automated API testing across high-volume fintech systems using Java, Selenium, and REST Assured.

Engineered automated test scripts using Appium for mobile and web applications, achieving 85% test coverage and reducing manual testing efforts by 60%.

Conducted Load testing with JMeter and addressed performance bottlenecks in backend services.

Built and maintained SQL test scripts to support database integrity and ETL workflows.

Engaged with DevOps to containerize test environments using Docker.

Test Automation Engineer

May 2018 – Dec 2019

[AzulCRM](#) – Tysons, VA

Authored test scripts for API components using Java and Selenium, achieving 70% automation coverage.

Created scalable test scripts and integrated them into a CI/CD pipeline using Java, TestNG, and GitHub.

Enhanced test coverage by building SOAP and REST API regression suites.

Improved reliability of payroll logic validation using dynamic SQL data comparisons.

Supported Agile sprints through full-cycle defect tracking and resolution.

Enhanced system observability by integrating test dashboards with Grafana and log trackers.

Identified and resolved 50+ critical API and UI defects, enhancing system stability and user experience.

Integrated Docker and Docker Compose to create isolated test environments, streamlining automated testing across different configurations.

EDUCATION

Master of Science: Computer Science, New Jersey Institute of Technology - New Jersey, USA

In Progress, Expected 2025

Bachelor of Science: Math and Science, Usak University - Usak, TR

Jan 2014

Relevant Coursework: Software Engineering, Data Structures & Algorithms, Machine Learning, Database Management Systems
