SUMMARY

I am a Computer Science engineer with over 25 years of experience, including 14+ years specializing in Salesforce technology. I hold seven Salesforce certifications, including Data Architect, with expertise in Service Cloud, Sales Cloud, and Marketing Cloud. I excel at tailoring Salesforce solutions to client needs, improving efficiency by up to 30%. With extensive consulting experience across the Americas, I bring cross-industry insights that drive scalable growth. Outside of work, I enjoy traveling, coin collecting, music, theology, military history, and staying informed on current events.

TOP SKILLS

- Willing to learn about each clients' unique needs and pain points.
- Specialized in the implementation of main Salesforce components — Apex, Visualforce and Lightning Component Framework to improve efficiency.
- Skilled in testing software and making adjustments when needed to ensure quality deliverables.
- Analytical mindset for assessing software and locating areas of improvement.
- Ability to translate niche technical concepts into understandable formats, such as models and flowcharts.
- Develop applications using JavaScript, Java, .Net.
- Knowledge of how to apply UX and UI design best practices like design thinking and user-centered design to improve user experience.
- Communication skills for working with members of software development, UI and UX design and the c-suite.
- Creative thinking for adapting the Salesforce platform to a range of client needs.
- Attention to detail for performing rigorous software testing and diagnosing issues.

EXPERIENCE

07/2024 – 01/2025
