SPRING, TX, United States

SUMMARY

Senior Full-Stack Engineer with 10 years of experience specializing in **ASP.NET Core** for backend development and **Angular** for frontend development. Adept at designing and optimizing scalable architectures, implementing software design patterns, and enhancing system performance. Passionate about building high-performance applications, reducing infrastructure costs, and improving development workflows. Proven ability to lead teams, collaborate cross-functionally, and integrate DevOps best practices.

SKILLS

FRONTEND: HTML, CSS, Tailwind CSS, Bootstrap, SASS, Angular, RxJS, NgRx, TypeScript, Angular Material

BACKEND: C#, ASP.NET MVC, ASP.NET Core, Blazor, RESTful APIs, GraphQL, SignalR

DATABASE: SQL Server, MySQL, PostgreSQL, Entity Framework Core, MongoDB

DevOps: AWS(EC2, S3), GCP, Docker, Kubernetes, Terraform, Jenkins, CI/CD

Testing: Jest, Cypress, Selenium, MSTest, xUnit, NUnit

Tools: Git, GitHub, GitLab, Jira, Trello, Bitbucket

Other: Redis, Kafka, RabbitMQ, Elasticsearch, OpenAPI, ORM, WebSocket

EXPERIENCE

Senior FullStack Engineer

Alfahive | Remote

07/2020 - 10/2024 Bozman, MT, US

- Lead the development of a robust and scalable SaaS platform using **Angular** and **ASP.NET Core**, optimizing performance with **RxJS**, **NgRX** and **SignalR** for real-time data updates.
- Developed high-performance **RESTful APIs** and **GraphQL** services using **ASP.NET Core**, ensuring secure and efficient data transfer.
- Developed and architected the equipment logistics control system using **Angular** for managing notebooks, phones, and other equipment for employees.
- Developed a healthcare platform using **ASP.NET MVC**, **PostgreSQL** and **Angular Material** for scalable patient data management.

- Architected scalable APIs integrated with third-party services, improving data synchronization and reducing downtime by 20%.
- Optimized cloud infrastructure using **AWS** and implemented **CI/CD** pipelines, reducing deployment times by 25%.
- Optimized **SQL** server queries and database schema, enhancing application speed and reliability.
- Implemented asynchronous communication with **Kafka** and **Redis** for smooth event handling.
- Enhanced search capabilities with **Elasticsearch** to provide real-time, accurate results.
- Applied **TDD** using **xUnit** and **Selenium**, improving code maintainability and test coverage.
- Managed cross-functional collaboration through Scrum methodologies, ensuring on-time feature releases.

FullStack Engineer

Ultimate Software | Remote

04/2017 - 06/2020 Weston, FL, US

- Developed a secure fintech platform, leveraging **ASP.NET Core** and **Blazor** for dynamic UI components and interactive dashboards.
- Implemented real-time stock updates and notification using **SignalR**, improving user engagement.
- Built robust and secure **RESTful APIs** integrating with multiple payment gateways and banking systems.
- Optimized **MySQL** performance with Entity Framework Core, reducing query response times by 50%.
- Optimized transaction processing pipeline using asynchronous messaging (**RabbitMQ**) and distributed caching (**Redis**), improving performance by 60% and reducing latency to sub-100ms.
- Integrated automated testing frameworks, including **MSTest** and **Jest**, to maintain high code quality.
- Deployed applications on **GCP** using Compute Engine, Cloud Storage, and Cloud Functions, which improved scalability and reduced operational costs.
- Deployed containerized applications with **Docker** and **Kubernetes**, ensuring high availability and easy scaling.
- Configured **Azure** cloud services for hosting, storage, and API management, reducing operational costs.
- Followed **SOLID** principles and **CI/CD** best practices, ensuring maintainable and efficient codebases.

FullStack Engineer

Mentormate | Remote

07/2014 - 03/2017 Minnesota, US

- Developed an interactive e-commerce platform, utilizing Angular with **Angular Material** and **Tailwind CSS** for a modern UI.
- Developed and maintained scalable backend services using **ASP.NET MVC**, optimizing RESTful API performance for +1K of daily users.
- Designed and optimized **PostgreSQL** and **MongoDB** databases, improving query performance and reducing load times.
- Implemented asynchronous communication with **Kafka** and **Redis** for smooth event handling.
- Conducted end-to-end testing with **Selenium** and **MSTest**, ensuring high-quality deliverables.
- Developed APIs using OpenAPI standards, enabling seamless integration with third-party systems.
- Strengthened application security with **OAuth2** and **JWT** authentication, enhancing user data protection.
- Collaborated with cross-functional teams in an agile environment using **Jira**, **Trello** and so on.

EDUCATION

MacMurray College - Bachelor of Computer Science

08/2010 - 05/2014 Jacksonville, IL 62650

- Major in Computer Science
