

MALIK MOAZZAM ALI

CKA | DevOps Engineer

EDUCATION

- **Bachelor of Science: Electrical Engineering**
[COMSATS](#) University Islamabad, Lahore Campus (2016-2020)

WORK EXPERIENCE

DevOps Engineer (Layout International (part-time)) (Jan 2025 - present)

- Maintained and improved continuous integration and continuous deployment (CI/CD) pipelines using GitHub Actions, automating software builds, tests, and deployments.
- patched and installed kernel updates, and implemented server hardening configurations on Linux systems.
- Worked On teleport for centralized access of our servers.

DevOps Engineer ([mailscale](#), remote) (March 2023 - present)

- Enhanced and maintained Continuous Integration and Continuous Deployment (CI/CD) pipelines using AWS CodePipeline, leading to streamlined development workflows.
- Collaborated within a team to optimize and manage mail servers, improving server reliability and performance.
- Played a pivotal role in the design and ongoing maintenance of mail servers, servicing over 500 clients across AWS and Contabo platforms.
- Implemented automated workflows in Retool, enabling tasks that previously required the tech team to be completed effortlessly with a single click, significantly improving efficiency and reducing manual effort.
- Leveraged AWS API Gateway and Lambda functions to deploy critical software components, enhancing system functionality and automation.
- Deployed and managed server configurations using Ansible, significantly improving deployment efficiency and system consistency.

SKILLS

- LINUX Patching and Vuln fixation
- Ansible
- Aws
- Github Actions
- Zapier
- Retool

CERTIFICATIONS

- CKA
- HCNA
- CEH
- Junior Pentester (Try Hack Me)

FREELANCE

- worked with [Mailscale.ai](#) to deploy mailservers .
- Worked with a Client to deploy <https://github.com/FeliMe/AudioStyleNet>

Which uses Python's AI libraries to generate StyleGAN model animation videos.

- Developed Python scripts to automate various operational processes, reducing manual effort and increasing process accuracy.

Junior DevOps Engineer (speeqr , Lahore) (3 months)

- Designed, implemented, and managed containerized applications using Kubernetes to ensure high availability, scalability, and security.
- Maintained and improved continuous integration and continuous deployment (CI/CD) pipelines using Jenkins, automating software builds, tests, and deployments.
- Collaborated with software development teams to integrate DevOps practices into the development lifecycle, facilitating faster and more reliable releases.
- Implemented and maintained Infrastructure as Code (IaC) using tools like Terraform to provision AWS resources.
- Managed and configured ArgoCD for GitOps-style deployments, ensuring infrastructure and application code were version-controlled and synchronized.
- Monitored and troubleshooted production systems, responded to incidents, and implemented proactive measures to prevent future issues.
- Implemented security best practices and conducted audits to ensure the security and compliance of infrastructure.
- Collaborated with cross-functional teams to optimize system performance, implement automation, and reduce operational overhead.

Linux Administrator (lbex, Lahore) (2 year)

- Worked in the infrastructure team, handling installation, configuration, and administration of CentOS 7 and Rocky Linux 8.
- Proficient in package management, utilizing RPM, YUM, and DNF tools for installing, removing, and updating packages.
- Skilled in troubleshooting, security management, backup solutions, disaster recovery planning, performance monitoring, and fine-tuning of CentOS/Rocky Linux systems.
- Experienced in auditing security logs and user logs to ensure system integrity.
- Proficient in patching, installing kernel updates, and implementing server hardening configurations on Linux systems.
- Provided production support and successfully resolved complex issues as they arose.
- Managed multiple VMware vSphere Clusters across various locations and environments.
- Installed and configured Nagios monitoring tool for system monitoring purposes.
- Utilized configuration automation tools like Ansible to streamline system configurations.
- Possess knowledge of Docker, Gitea/GitLab, Maven, ANT, and Jenkins.

- Deployed CI/CD pipelines using GitLab Community Edition and maintained the GitLab environment.
- Familiar with Terraform for deployment automation.

TSR Engineer ([NGISOL](#) ,Lahore) (3 Months)

- Offered friendly and efficient service to customers, handled challenging situations with ease.
- Collaborated with team members to achieve target results.
- Actively listened to customers, handled concerns quickly and escalated major issues troubleshooting to resolve various WAN/LAN connectivity issues.
- Demonstrated strong analytical, troubleshooting and problem-solving skills. Diagnosed and executed resolution for network. Provided faculty and staff with network configuration support. Monitored the network through PRTG and aligned teams incase of issues
