

Morgan Morris

Air Force Veteran | Senior Software Engineer

• Niceville, FL • (910) 420-3763 • morganmorris2012@yahoo.com • <https://www.linkedin.com/in/morganmorris1953/>

Seasoned **Senior Software Engineer** with **12 years** of hands-on experience in **full-stack development**, with a strong focus on **C#, Python, Java**, and modern **JavaScript frameworks** like **React.js, Angular**, and **Vue.js**. Skilled in building and launching **scalable, AI-powered, cloud-based solutions** using **Azure and AWS**. Well-versed in **microservices architecture** with tools like **ASP.NET Core, Spring Boot, Node.js**, and **Django** to create **high-performance, dependable apps**. Led **Agile teams**, improving **CI/CD workflows**, and pushing innovation through **machine learning and AI**. Focused on building **clean, user-friendly front-end interfaces** and **reliable, high-performing back-end systems**. Combines **technical expertise** with experience **guiding teams** and **supporting junior developers** to consistently deliver **well-executed solutions**.

Skills

- **Languages:** JavaScript (13yrs), TypeScript, C++, C# (12yrs), Python (7yrs), Java (5yrs), SQL
- **Frameworks & Libraries:** React.js, Angular.js, Vue.js, .NET Core, .NET Framework, WPF, ASP.NET, Razor, Entity Framework, ADO.NET, LINQ, Spring Boot, Flask, Django, FastAPI, Hibernate, JPA, Node.js, Express.js, RabbitMQ, Kafka, gRPC, TensorFlow, PyTorch, Scikit-learn
- **Cloud & Infrastructure:** AWS (EC2, RDS, S3, Lambda, API Gateway), GCP, Azure (App Services, Blob Storage, Cosmos DB), Kubernetes, Docker, Azure Machine Learning
- **Database:** MySQL, PostgreSQL, MS SQL, MongoDB, Redis, DynamoDB
- **CI/CD & DevOps:** Azure DevOps, Jenkins, GitHub Actions, GitLab CI/CD, Bitbucket, CircleCI, Docker Compose, Kubernetes Helm, Terraform
- **Testing & Quality Assurance:** xUnit, MSTest, NUnit, Jasmine, JMeter, Unit Testing, TDD, E2E Testing, Selenium, PyTest, Jest, Cypress, TestNG, Mockito
- **Monitoring & Logging:** ELK (Elasticsearch, Logstash, Kibana), Nagios, Datadog, New Relic, Rollbar, Sentry, Prometheus, Grafana
- **Methodologies & Practices:** Agile (Scrum, Kanban), Clean Code, SOLID Principles, Design Patterns, Domain-Driven Design (DDD), Event-Driven Architecture, Microservices Architecture, Continuous Integration/Continuous Deployment (CI/CD)
- **Other:** GraphQL, RESTful APIs, WebRTC, WebSockets, Microservices, Machine Learning, AI Integration, Data Pipelines, Cross-functional Team Leadership, Mentoring, Requirements Gathering, System Design, Technical Documentation

Experience

JANUARY 2015 – PRESENT

Senior Software Engineer | Booz Allen Hamilton | McLean, VA

- Developed and deployed **scalable, event-driven microservices** for a **DoD customer** using **C# .NET Core, TypeScript**, and **Angular 13**, leveraging **microservices architecture** and **Clean Code** principles to deliver dozens of new features to a **secure online portal**
- Built robust **RESTful APIs** using **ASP.NET** and **Entity Framework Core** to support daily verification of **2M+ personnel**, ensuring **high availability, data integrity**, and **security**
- Managed and optimized a global **DoD relational database** with **MS SQL** and **EF Core**, integrating **ADO.NET** and **LINQ** to improve query performance and data accessibility reducing data retrieval time by 60%

- Wrote and deployed **Azure IAM Policy** and **deployment scripts** using **Azure DevOps**, **Terraform**, and **Ansible**, resulting in a 35% improvement in **system security and compliance**
- Maintained a streamlined **CI/CD pipeline** with **Jenkins**, **GitHub Actions**, and **Terraform**, applying **Agile practices** and **SOLID principles** to improve **release quality** and **speed** by 40%
- Designed a prototype app using **C# .NET**, **RabbitMQ**, and **Docker Compose** to automate and simplify **military base visitor pass processing** by reducing visitor pass processing time by 70% across 3 military bases.
- Authored **technical documentation** for **RabbitMQ-based messaging system** upgrades, improving **team understanding** and **cross-functional collaboration** by boosting cross-team adoption by 50%
- Containerized 20+ applications using **Docker** and **Kubernetes**, managing **Helm charts** and **Docker images** for consistent, **scalable deployment** across **hybrid environments**, by enabling 99.9% uptime
- Secured 15+ **microservices** through **authentication, authorization, and accounting (AAA)** with **JWT**, aligning with best practices for **identity management** and **Azure Policy**
- Directed a full **redesign** of the **client portal** using **React.js**, **Redux**, and **Vue.js**, significantly enhancing **UI/UX** and boosting **customer satisfaction** by 35%
- Modernized **legacy AngularJS apps** by integrating **Angular 16** with **TypeScript**, improving **maintainability** and reducing **front-end load time** by 20%
- **Engineered** a **predictive analytics tool** using **Python**, **Azure Machine Learning**, and **Scikit-learn**, which helped identify **potential system failures** in advance and reduced **downtime** by 30%
- Mentored **6 junior developers** in **large language model (LLM) development**, **AI integration**, and **full-stack technologies** including **React**, **Node.js**, **ASP.NET Core**, **Flask**, and **FastAPI**
- Applied **Domain-Driven Design (DDD)** and **design patterns** to architect **modular, testable systems**; supported **quality assurance** with **PyTest**, **xUnit**, and **Cypress**, and increased test coverage to 95%+
- Scaled **backend** throughput by 3x by integrating **Kafka**, **gRPC**, and **GraphQL** into **high-performance backend services** for **scalable data pipelines** and **real-time communication**
- Championed **Agile (Scrum, Kanban)** workflows, participated in 50+ **sprint planning sessions** and 100+ **code reviews**, and contributed to a culture of **clean, maintainable code**
- **Technologies:** C#, ASP.NET Core, Entity Framework, MS SQL Server, Python, Django, Spring Boot, TensorFlow, PyTorch, Blazor, JavaScript, TypeScript, React.js, Vue.js, Redux, Angular.js, Node.js, Docker, Kubernetes, Terraform, Azure, AWS SQS, AWS SNS, AWS Lambda, GraphQL, Strapi.

MAY 2013 – JANUARY 2015

Software Engineer | Park Group Solutions | Newtown, CT

- Created web pages for 30+ clients using **WordPress**, automotive CMS platforms such as **Dealer Inspire**, **Sierra**, and other proprietary backends, utilizing **HTML**, **CSS**, **JavaScript**, and frameworks like **jQuery**.
- Designed and implemented regular client specials and promotional content, improving **user engagement** and **conversion rates** by 35%
- Automated repetitive tasks using **Python**, significantly reducing manual effort by up to **85%**. Tasks included generating **HTML emails**, integrating with the **DropBox API**, and posting webpage **customer testimonials**.
- Maintained and authored comprehensive 15+ internal **training and reference guides** using **Markdown** and **Confluence**, improving **onboarding efficiency** and **cross-team collaboration** by 30%.
- Improved 60+ client-facing features using **JavaScript** and **C#**, while implementing backend logic with **ASP.NET** and **ADO.NET** for seamless data access.
- Architected and developed 10+ robust APIs and applications using **WPF**, **.NET Framework**, and **AngularJS**, ensuring **scalable, high-performance solutions** in a **microservices environment**.
- Built a personalized **recommendation engine** using **Python** with **machine learning libraries** like **Scikit-learn** and **Pandas**, resulting in a **30% boost** in user satisfaction and engagement.
- Enhanced **ERP systems** by integrating a **Razor-based front end** and **.NET Core microservices**, leveraging **Entity Framework** and **LINQ** to improve **data processing speeds** by 40%.
- Introduced an **event-driven architecture** using **RabbitMQ** and **Kafka**, significantly improving **system responsiveness** and **scalability** by 24%.

- Engineered solutions using **SQL Server** and **MySQL** databases for **transactional systems** processing over 1M transactions per month, optimizing performance through **stored procedures** and **indexing** by 50%.
- Utilized **Git**, **Azure DevOps**, and **Jenkins** for **version control**, **CI/CD automation**, and efficient **deployment pipelines**, achieving 95% CI/CD pipeline automation.
- Monitored **system health** and **performance** using **ELK Stack** and **Grafana**, improving **uptime** and enabling **faster issue detection** and **resolution time** by 60%.
- **Technologies:** C#, WPF, .NET Framework 4.8, .NET 5, .NET 6, .NET 7, HTML, CSS, JavaScript, AngularJS, Razor, Python, RabbitMQ, Scikit-learn, Apache Ignite Cache, PostgreSQL, MVC, Stripe, Alma Pay, DHL API, Plaid, Avis Verifies, Colissimo.

JANUARY 2006 – JANUARY 2013

Combat Controller | United States Air Force | Various Locations

- Contributed and led **60-man multi-service team** in **harsh overseas environment**
- **Leveraged** team's **unique skill sets** to overcome **dangerous situations**, and **mentored** 5 junior leaders
- Implemented **innovative solutions** to maintain **continuous operations** and ensured **the safety of construction engineers** in a **combat zone outpost**, saving **\$4M** and **4 months** of work

Education

SEPTEMBER 2013 – MAY 2016

Bachelor's Degree, Computer Science | Full Sail University | Winter Park, FL

Certifications & Courses

CompTIA Security+ Certification, July 2023

SAFe 5 Practitioner Certification, Scaled Agile Inc., December 2021

PMP Boot Camp, Project Management Institute, March 2021
