Full Stack Software Engineer

Results-driven engineer specializing in scalable, high-performance web applications. Skilled in JavaScript, TypeScript, Vue.js, React, Next.js, Nuxt.js, Node.js, NestJS, and Express.js. Experienced in PostgreSQL, MySQL, RESTful APIs, real-time data synchronization, and database optimization. Proficient in Docker, AWS, ensuring system reliability and scalability. Strong focus on clean architecture, SOLID principles, and API integrations to automate workflows and improve performance.

Professional Experience

Full Stack Software Engineer | at L-Art Photo | Orlando, FL

May 2023 - Current

- Built a scalable backend with NestJS, TypeScript, and DrizzleORM, handling 5000+ daily requests. Optimized PostgreSQL for complex queries, ensuring lightning-fast, reliable data access under heavy load.
- Developed a CMS in Vue 3, enabling the business to view and manage data in real time.
- Integrated Square API to automate revenue tracking and payroll processing, calculating daily salaries for 50+ employees, eliminating the need for manual calculations.
- Implemented Telegram API for automatic assignments and notifications for employees.

Full Stack Software Engineer | at Brond Digital | Moscow, Russia

May 2021 – Mar 2023

- Built a real-time data sync system between 1C and MySQL, processing 10,000+ records weekly with minimal latency, ensuring businesses always have up-to-date inventory and pricing.
- Led the development of a highly efficient Content Management System using Vue 3 and TypeScript, optimizing load times to under 1 second for a seamless user experience.
- Integrated a UI block editor for effortless page creation, allowing sites to customize their pages without extra development.
- Automated the sorting of 500+ categories from MySQL using Node.js, allowing e-commerce sites to easily customize category displays based on specific criteria, streamlining the user experience.
- Developed and executed unit and integration tests using Jest and Vitest, ensuring the reliability of core functionalities, reducing regressions, and maintaining high code quality across the CMS and data synchronization systems.

Front End Software Engineer | Freelance | Orlando, FL

Sep 2020 - Mar 2021

- Designed and developed a high-performance, React-powered website for an automotive business driving a 20% boost in online bookings.
- Implemented EmailUS API using JavaScript, enabling email communication and increasing customer inquiries from the website.
- Implemented Google Analytics for tracking and analyzing user behavior, leading to an 18% rise in customer engagement.

Skills

- **Languages & Frameworks:** JavaScript, TypeScript, HTML, CSS, React, React Hooks, NextJS, Vue, Nuxt, NodeJS, NestJS, Express.js, TailwindCSS
- **Tools:** Docker, Git, Babel, Webpack, Vite, Jira, Figma
- **Databases:** PostgreSQL, MySQL
- **Cloud:** AWS (Amazon Web Services)
- **Testing:** Unit Testing, Integration Testing, End-to-end testing, Jest, Vitest, Playwright, React Testing Library

Education

AS Degree in Computer Programming & Analysis | at Valencia College | Orlando, FL

Sep 2019 - Aug 2021

- Gained expertise in software development, data structures, algorithms, and database management.
- Developed strong skills in JavaScript, HTML/CSS, PHP, and MySQL.
