PROFILE

.NET Developer with 4+ years of experience in designing, developing, and maintaining scalable web and desktop applications. Proficient in ASP.NET Core, C#, MVC, Entity Framework, and SQL Server, with a strong understanding of RESTful APIs, microservices architecture, and cloud services (Azure/AWS). Experienced in Agile methodologies, CI/CD pipelines, and version control (Git). Adept at optimizing application performance, troubleshooting complex issues, and collaborating with cross-functional teams to deliver high-quality software solutions. Passionate about leveraging the latest .NET technologies to drive innovation and efficiency.

TECHNICAL SKILLS

Programming Languages: C#, VB.NET, JavaScript, TypeScript

Frameworks & Technologies: .NET Core, ASP.NET MVC, ASP.NET Web API, Blazor, Razor Pages, Entity Framework, LINQ

Frontend Development: HTML5, CSS3, Bootstrap, JavaScript, jQuery, Angular, React

Database Management: SQL Server, MySQL, PostgreSQL, Stored Procedures, Triggers, Functions, ORM (Entity Framework, Dapper)

Cloud & DevOps: Microsoft Azure, AWS, Docker, Kubernetes, CI/CD (Azure DevOps, GitHub Actions, Jenkins)

Version Control & Tools: Git, GitHub, GitLab, Bitbucket, Visual Studio, VS Code, Postman, Swagger

Software Development Practices: Agile (Scrum, Kanban), Unit Testing (xUnit, NUnit, MSTest), SOLID Principles, Design Patterns

PROFESSIONAL EXPERIENCE

.Net Developer, United Healthcare

Jan 2024 – present

- Designed, developed, and maintained healthcare applications using ASP.NET Core, C#, MVC, and Web API, ensuring compliance with HIPAA regulations.
- Built and optimized RESTful APIs for seamless integration between healthcare systems, improving data exchange efficiency.
- Developed secure and scalable healthcare solutions with Entity Framework, SQL Server, and stored procedures to handle patient data.
- Implemented microservices architecture to enhance system modularity and performance in large-scale healthcare applications.
- Worked closely with business analysts and stakeholders to gather and analyze requirements, translating them into technical solutions.
- Integrated FHIR and HL7 standards for interoperability between healthcare applications and external systems.
- Optimized application performance by implementing caching strategies, indexing, and query optimization in SQL Server.
- Leveraged Microsoft Azure (Azure Functions, App Services, Blob Storage) for cloud-based deployment and scalability.
- Developed and maintained CI/CD pipelines using Azure DevOps to streamline deployment processes.
- Collaborated with cross-functional teams in an Agile/Scrum environment to deliver high-quality healthcare solutions.
- Conducted code reviews and unit testing (xUnit, NUnit) to ensure code quality, security, and compliance.
- Provided production support, troubleshooting issues, and enhancing application reliability for healthcare services.

Software Developer II, Q Burst Technologies, Pvt., Ltd.

Apr 2021 – Apr 2023

- Designed, developed, and deployed enterprise-level .NET Core applications with ASP.NET, MVC, C#, and Web API, ensuring high availability and scalability.
- Developed microservices-based architecture for modular, high-performance applications, reducing system dependencies and improving maintainability.
- Built RESTful APIs to enable seamless integration with third-party systems and improve data exchange efficiency.
- Implemented Azure cloud solutions, including Azure Functions, App Services, and Blob Storage, for cloud-native application deployment and data management.
- Enhanced database performance by optimizing queries, indexing, and stored procedures in SQL Server to improve response times.
- Designed and implemented identity and access management (IAM) solutions using JWT, OAuth2, and Azure Active Directory (AAD) for secure authentication.
- Developed and maintained CI/CD pipelines using Azure DevOps, GitHub Actions, and Jenkins, ensuring smooth deployment and continuous integration.
- Led code reviews, pair programming, and debugging sessions, maintaining high-quality coding standards and best practices.
- Collaborated with cross-functional teams (QA, DevOps, and UI/UX designers) to ensure end-to-end feature delivery.
- Worked on performance monitoring and application tuning, using Application Insights and New Relic for diagnostics and troubleshooting.
- Participated in Agile/Scrum ceremonies, contributing to sprint planning, backlog refinement, and feature estimation.

Software Developer I, Q Burst Technologies, Pvt., Ltd.

Apr 2020 – Mar 2021

- Assisted in the development of .NET applications using ASP.NET Core, MVC, C#, and Entity Framework, following Agile development methodologies.
- Designed and implemented frontend components using HTML5, CSS3, JavaScript, and Bootstrap, ensuring responsive UI.
- Developed and maintained API endpoints for data exchange between internal services and external third-party applications.
- Wrote SQL queries, stored procedures, and database scripts to support application functionality and optimize performance.
- Debugged and resolved production issues, working closely with QA teams to identify and fix defects.
- Worked on authentication and authorization mechanisms using ASP.NET Identity and OAuth.
- Gained experience with DevOps practices, assisting in configuring CI/CD pipelines for automated deployments.
- Engaged in peer programming and knowledge-sharing sessions, improving collaboration and learning from senior developers.

EDUCATION

Master's in Information Technology, Indiana Institute of technology

Fort wayne, United States
