

# Nabakanta Wangkheimayum

South Jordan, UTAH • (323) 847-3200 • nabakantasw@gmail.com • [www.linkedin.com/in/nabakanta-wangkheimayum](https://www.linkedin.com/in/nabakanta-wangkheimayum)

Current H-1B holder valid till April 2026 • Eligible for H-1B Transfer/Sponsorship (*I-140 approved*)

## Senior IT

Strategic Senior IT professional with 15+ years of experience leading the development and delivery of enterprise applications across multiple sectors, including proven success in the E-commerce, Real Estate, Healthcare, and Multi-Level Marketing industries. Certified SAFe 5 Scrum Master, adept at fostering agile environments and driving team success. Extensive expertise in Microsoft Azure and modern development practices, with a proven ability to design and implement scalable cloud-native solutions and RESTful APIs. Skilled in CI/CD automation, database design, and code quality assurance, with a strong commitment to delivering high-quality, innovative solutions.

## TECHNICAL SKILLS

- **Architectural Patterns:** Microservices, API-driven design, Event-driven architecture, RESTful APIs, Serverless Architecture, Layered (N-Tier), Clean Architecture, CQRS
- **Design Principles:** SOLID principles, Design patterns, Domain-driven design
- **Database:** Azure Cosmos DB (NoSQL), Elasticsearch (NoSQL, Search), Solr, MongoDB (NoSQL), SQL Server, MySQL
- **Programming Languages & Frameworks:** ASP.NET Core (Web API, Minimal API, FastEndpoints), ASP.NET (Web Forms, MVC 4), C# (.NET Framework 3.5/4/4.6, .NET Core 1.1/2.1/3.1, .NET 5/6/8), ADO.NET, Entity Framework 6/Entity Framework Core (6, 8), Dapper 2, Windows Forms, WPF, TypeScript, SQL (T-SQL, Stored Procedures), Dependency Injection (DI), Advanced Concurrency & Parallelism with Task Parallel Library (TPL) and Async/Await, .NET Background Services
- **DevOps & CI/CD:** Azure DevOps, GitHub Actions, Docker Containers, Cake Scripts, Dev Containers, Jenkins, JFrog Artifactory, Octopus Deploy, XebiaLabs XLD/XLR
- **Cloud Platforms & Services:** Microsoft Azure (PaaS, Service Bus Topic, WebJobs, Application Insights, Blob Storage, Azure Functions, Key Vault), Amazon Web Services (AWS EC2, S3, SES), Snowflake
- **API & Security:** IdentityServer4 (*OpenID Connect, OAuth 2.0*), RESTful Asynchronous API Development, API Gateway (Ocelot), Microservices Architecture, JWT (JSON Web Tokens), TLS Mutual Authentication, SOAP-based web services
- **Messaging & Event Streaming:** Azure Event Hubs, Azure Service Bus Topic, Confluent Kafka, RabbitMQ
- **Monitoring & Logging:** Application Insights, ELK Stack (*Elasticsearch, ELMAH, Kibana*), NLog, Log4net, Logstash, SonarQube, Splunk
- **Testing & Quality Assurance:** Agile testing, Unit testing, Integration testing, End-to-end testing, Performance testing, CI/CD integration, Test automation frameworks, xUnit, JMeter, Playwright
- **Front-End Technologies & Libraries:** Angular (AngularJS 1.5/2+), Bootstrap 3, CSS3, Sass, DataTables, jQuery (*jQuery UI, jsTree, tablesorter, Telerik, toastr, jQuery File Upload*)
- **Source Control:** Git (*GitHub, Bitbucket, Azure Repos*), Subversion (SVN), Team Foundation Server
- **E-commerce Development:** Payment Gateway Integration (*PayPal, Intuit QuickBooks*), Order Management, Product Listing, Shopping Cart Functionality, User Authentication and Authorization (*DotNetOpenAuth, Facebook, Gmail, LinkedIn*), Customer Communication (*Twilio for SMS, calls*), Accounting Automation (*Intuit QuickBooks*), Google Analytics, SEO

## WORK EXPERIENCE

**R1 RCM Inc**  
**Senior Software Engineer**

**07/2021 - Present**  
**Salt Lake City, Utah**

- Designed and implemented a robust medical record import system, integrating RPA and developing detailed workflow diagrams, sequence diagrams, and state transition tables to manage the complex import and appeal submission process across various channels (fax, mail, portal).
- Collaborated with cross-functional teams, including internal and external stakeholders, to gather requirements and ensure clear communication and alignment throughout project life cycles.
- Created comprehensive documentation and analysis reports, outlining existing and new implementation details, and pinpointing critical problem areas within the New Client Onboarding and Medical Record Import workflows in Quantum Appeals.
- Architected and executed a complete overhaul of the New Client Onboarding process, migrating from PHP to a modern C# stack leveraging Azure Functions, RESTful APIs, Azure CosmosDB, Azure Storage, Azure Key Vault, FTP, and MySQL. This transition significantly improved scalability, reliability, and performance compared to the legacy PHP scripts.
- Developed and maintained automated CI/CD pipelines using GitHub Workflows, incorporating SonarQube scans and Docker image builds and pushes to Azure Container Registry for streamlined deployment to Azure Web Apps and Azure Functions.
- Configured and optimized horizontal auto-scaling for Azure Web Apps, ensuring high availability and responsiveness under varying load conditions.
- Creating new solution that allows R1 to ingest, validate, parse ANSI X12 client files like 835, 837 etc. and then improves the existing Account Matching Logic.
- Built a high-throughput background service using .NET 8's BackgroundService to ingest and process medical records from Azure Service Bus topics, ensuring atomicity and retry policies for mission-critical healthcare data.
- Developing Scheduling Data Ingestion API which allows a client to perform CRUD operations using FHIR resources and also publishes an event, when a FHIR resource is added or updated, on a queue allowing any subscribing clients to query the information and process it.
- Secured and streamlined microservices communication by centralizing authentication (JWT/OAuth), request routing, and load balancing using Ocelot API Gateway.
- Database design and CRUD operations on data stored as JSON in CosmosDB using MongoDB API.
- Publishing and subscribing messages using Confluent Kafka.
- Continuous integration and deployment using Cake Scripts, GitHub actions and Octopus.
- Ensuring code quality and coverage by maintaining and running SonarQube & Unit tests using frameworks like xUnit.
- Performing code review on tasks performed by team members for improving the code quality.
- Implementing application and data integration with Snowflake using Dapper to increase visibility into the business processes for the operations team.

## **Emids Technologies (SRG Inc)**

**10/2019 - 07/2021**

### **Technical Lead**

**Salt Lake City, Utah**

- Leading a team of in-house and offshore developers to build new web applications, with focus on high availability, security, scalability, performance, cost and continuous delivery along with the core business functionality.
- REST based API development with Micro-service architecture with versioning using .NET Core 3.1/.NET 5 ASP.NET Web API
- Implemented Ocelot API Gateway to orchestrate communication between microservices, enabling centralized authentication via IdentityServer4, request aggregation, and rate limiting for high-traffic.
- Created reusable libraries for logging, consume REST endpoints, swagger tools for documenting APIs etc that are used in building microservice and built reference business service API defining solution structure, standards, and best practices to build
- Database design and CRUD operations on data stored as JSON in SQLServer and MongoDB
- Notification management for sending sms, email using RabbitMQ
- Developed a fault-tolerant background worker service with .NET Core 3.1 to consume RabbitMQ messages and send SMS/email notifications via Twilio, implementing backoff for failed deliveries.
- Continuous integration and deployment using Cake Scripts, Jenkins, Xebialabs XLD & XLR
- Ensuring code quality by maintaining and running SonarQube & Unit tests using NUnit
- Centralized logging in order to identify problems with servers or applications using ELK Stack
- Requirements collections and documentation with onsite coordination, offering solutions

**Rare Mile Technologies Inc (Infrd Inc)****01/2016 - 10/2019****Technical Lead****Salt Lake City, Utah**

- Architected and implemented a robust Azure-hosted application, conducting in-depth analysis of Azure platform services, including CosmosDB, Application Insights, Service Bus, and WebJobs, to optimize application performance and scalability.
- Developed and maintained versioned RESTful APIs with a microservices architecture using ASP.NET Web API 2 and .NET Framework 4.6, ensuring seamless integration and scalability.
- Implemented secure authentication and authorization mechanisms using IdentityServer4, enabling single sign-on/sign-out and granular access control for APIs.
- Designed and managed NoSQL databases (Azure CosmosDB, Elasticsearch) and Azure Blob Storage for efficient storage and retrieval of JSON data and media files, respectively, optimizing data management.
- Engineered a comprehensive notification management system utilizing Azure Service Bus and WebJobs to deliver SMS, email, and app push notifications, enhancing user engagement.
- Developed and deployed a dynamic single-page application using Angular, contributing to an enhanced user experience.
- REST based API development with Micro-service architecture with versioning using .NET Core 3.1/.NET 5 ASP.NET Web API

**Rare Mile Technologies Pvt Ltd****09/2011 - 12/2015****Senior Software Engineer****Bangalore, India**

- Architected and developed key e-commerce functionalities for a global service marketplace platform, connecting consultants and customers. This included integrating payment gateways (PayPal, Intuit QuickBooks) for seamless transactions, implementing user authentication and authorization (DotNetOpenAuth, Facebook, Gmail, LinkedIn) to secure user accounts, and developing communication features using Twilio (anonymous calls, SMS notifications).
- Developed and maintained RESTful APIs (ASP.NET Web API 2) to support core e-commerce operations such as product/service listing, order management, and user interactions.
- Implemented accounting and commission workflows using Intuit QuickBooks, automating financial processes within the platform.
- Designed and developed a responsive user interface (MVC4, Bootstrap) to ensure optimal user experience across devices.
- Developed a deal listing platform to facilitate impact and sustainable investing, enabling users to list deals, share information, and form alliances.
- Implemented core platform features including deal listing management, search functionality, and automated deal alerts/reminders.
- Integrated user authentication and authorization (DotNetOpenAuth) to secure platform access.
- Managed and maintained the platform's blog using WordPress.
- Integrated Google Analytics and SEO strategies to enhance platform visibility and user engagement.
- Utilized AWS services (EC2, S3, SES) to manage the platform's infrastructure, storage, and email.
- Developed an innovative gesture-based virtual dressing room application using Kinect and WPF, providing retailers with an interactive tool to showcase online merchandise and enhance customer engagement in physical retail spaces.
- Implemented a robust search functionality for medicine, disease, and laboratory information using Solr, enabling efficient information retrieval and improving user experience.

**Atyati Technologies Pvt Ltd****01/2010 - 08/2011****Software Engineer****Bangalore, India**

- Developed and implemented a comprehensive leave management module for a Human Resource Management System web application, streamlining leave requests, approvals, and tracking processes, enhancing efficiency and employee satisfaction.
- Developed data access layers using ADO.NET to interact with SQL Server 2005 for efficient data retrieval, insertion, and updates within the leave management module.
- Developed and optimized web services for seamless data synchronization between different system components, improving data consistency and reliability.

- Enhanced user interface elements and optimized database performance by implementing efficient stored procedures, resulting in a more responsive and user-friendly application.

## EDUCATION

### **B.E. (Information Science)**

Visvesvaraya Technological University

Belgaum

## CERTIFICATIONS

### **Diploma in .NET (DDNT) NIIT Certified SAFe 5 Scrum Master**

## PROJECTS

### **New Client Onboarding and Medical Record Import** 07/2023 - 02/2025 **R1 RCM Inc**

New Client Onboarding enables EPIC-formatted client file processing in Quantum Appeals, replacing legacy PHP with C# and a modern stack. Medical Record Import integrates Robotic Process Automation to attach PDFs to cases, automating appeal submissions to hospital systems.

### **X12 Engine & Matching Service** 07/2021 - 01/2023 **R1 RCM Inc**

X12 Engine and Matching Service project under Project Bison created a data pipeline that allows R1 to ingest, validate and parse ANSI X12 client files. X12 Engine was built to have the capability to easily configure and accept any type of X12 transaction and capable of ingesting and parsing X12-835/837 transactions. X12 Matching improves upon the existing Account Matching Logic in R1s legacy system.

### **Digital Transformation Service & Physical Advisory Services** 10/2019 - 07/2021 **Emids Technologies**

DTO provides services that automate some of the manual work in R1RCM health products like R1 Access, R1 Hub etc. Setup continuous integration and deployment of existing R1RCM products like PAS.

### **HomeGenius - Real estate (Buy/Sell/Rent Homes)** 01/2016 - 10/2019 **Rare Mile Technologies Inc**

Home buying and selling is a complex process and we make it transparent for everyone involved. Connect unlimited parties into your home buying/selling experience including real estate agents, lenders, appraisers, family and friends. Schedule showings, make an offer and negotiate online, store and share your documents securely, use our central communication hub and get instant notifications on the web or on your phone or tablet.

### **Maximpact - Global Marketplace for Services(E-commerce)** 09/2011 - 12/2015 **Rare Mile Technologies Pvt Ltd**

World's first comprehensive resource and solution center, offering end-to-end support services to communities, projects, ventures, governments and funders. Become part of a selected consultants' network and offer your services to unique projects. Sources customers and forwards orders to the consulting network.

### **Virtual Dressing and Jewelry** 02/2013 - 01/2014 **Rare Mile Technologies Pvt Ltd**

Built on gesture based interaction which can be used by retailers who want to set up a virtual dressing kiosk for their online merchandise. Online apparel portals can extend their reach by setting up this kiosk at a shopping mall for customers to virtually try out apparel and then place an order.

### **GANASEVA - Human Resource Management System** 01/2010 - 05/2011 **Atyati Technologies Pvt Ltd**

HRMS tool was created for the company's internal process. Application has different modules like admin, leave management, timesheet workflow & detailed reporting.
