

NAGARAJU NAGAM

Cloud / DevOps Engineer

Dallas, TX | (817) 381-5175 | nagam6465@gmail.com | <https://www.linkedin.com/in/nagam-devopsengineer/>

SUMMARY

Cloud & DevOps Engineer with 5+ years of experience designing, automating, and optimizing scalable cloud infrastructure across AWS and Azure environments. Expert in Infrastructure as Code (Terraform, Ansible, CloudFormation), containerization (Docker, Kubernetes, OpenShift), and CI/CD pipeline automation (Jenkins, GitHub Actions) to accelerate software delivery. Skilled in monitoring, observability, and SRE practices using Datadog, Grafana, Prometheus, and CloudWatch to ensure high availability and performance. Experienced in cloud security, IAM, DevSecOps, compliance, and FinOps, with a track record of reducing costs, improving reliability, and enforcing security best practices. Proficient in system administration (Linux/Windows), automation scripting, API validation, and cross-functional collaboration. AWS Certified Solutions Architect – Associate (SAA-C03).

TECHNICAL SKILLS & CORE COMPETENCIES

Core Competencies: Cloud Computing, DevOps, Site Reliability Engineering (SRE), Infrastructure Automation, Containerization, Cloud Security, Monitoring & Observability, Compliance & Risk Mitigation, FinOps, DevSecOps

Cloud Platforms: AWS (EC2, S3, IAM, Lambda, CloudWatch, Event Bridge), Microsoft Azure (App Services, Functions, Azure Monitor)

Infrastructure & Automation: Terraform, Ansible, CloudFormation, Puppet, Bash, PowerShell, Shell Scripting

Containers & Orchestration: Docker, Kubernetes, OpenShift

CI/CD & DevOps Tools: Jenkins, GitHub Actions, Git, GitHub, Maven, JFrog Artifactory, CI/CD Pipelines

Monitoring & Logging: Datadog, Grafana, Prometheus, Splunk, Azure Monitor

Security & Compliance: IAM, HashiCorp Vault, AWS Secrets Manager, Azure Key Vault, Aqua Security, Prisma Cloud, Trivy, Falco, Zero Trust Frameworks

Programming & Databases: Python, Java, JavaScript, SQL, REST APIs, HTML, CSS, C/C++ (basic), Machine Learning (foundational exposure)

Event-Driven & Serverless: Apache Kafka, AWS EventBridge, AWS Fargate, Azure Functions

System Administration: Linux (Ubuntu, RHEL), Windows Server

Collaboration & ITSM: Jira, Confluence, ServiceNow, ITIL Practices

Other Tools & Concepts: Apache Kafka, Identity & Access Management (IAM), Agile Methodologies, Software Development & Deployment

Certifications: AWS Certified Solutions Architect – Associate (SAA-C03)

PROFESSIONAL EXPERIENCE

BNY Mellon

DevOps Engineer

USA

Jul 2025 – Current

Tech: AWS, Terraform, GitHub Actions, Docker, Kubernetes, SQL, Power BI, Linux NFS, Windows SMB

- Designed and implemented cloud infrastructure solutions, ensuring high availability, security, and compliance.
- Developed and maintained Infrastructure as Code (IaC) using tools like Terraform or CloudFormation.
- Built and optimized CI/CD pipelines to automate software deployment and improve release efficiency.
- Monitored and managed cloud resources to optimize performance, cost, and scalability.
- Implemented containerization and orchestration using Docker and Kubernetes.
- Collaborated with development and operations teams to streamline deployment processes and improve system reliability.
- Conducted data analysis and reporting to support business decision-making and operational improvements.
- Assisted in disaster recovery planning and execution, ensuring business continuity.

Tech Mahindra (Client: Ooredoo Kuwait)

Associate Engineer (Cloud / DevOps Projects)

India

Feb 2022 – Oct 2022

Tech: AWS, IAM, KMS, CloudTrail, SQL, Bash, Postman, SoapUI, Jenkins, GitHub Actions, Datadog, ServiceNow

- Provisioned AWS EC2 instances with reusable automation scripts, reducing setup time by 14 hours per release.
- Implemented IAM roles and encryption policies with AWS KMS and CloudTrail, securing access for 220+ active users.
- Developed a SQL and Bash-based data cleanup tool, cutting test reset cycles from 6 hours to 3 hours across 40+ UAT runs.
- Validated 200+ CRM and number management APIs with Postman and SoapUI, ensuring data integrity in production.
- Integrated Jenkins pipelines for deployments and testing, accelerating delivery of 12 service catalog modules.
- Led migration sessions with architects, enabling GitHub Actions adoption for 18 application teams.
- Innovated Datadog–ServiceNow dashboards, providing real-time visibility into 45+ infrastructure changes.
- Coordinated Agile sprint ceremonies with product owners, driving 6 platform releases in under 10 months.

Dell Technologies

Cloud Engineer

India

Nov 2018 – Jan 2022

Tech: AWS (EC2, S3, Lambda, CloudFormation, IAM, VPC), Terraform, Ansible, Jenkins, GitHub Actions, PowerShell, Bash, Datadog, Grafana, ServiceNow, Kubernetes, Trivy, DevSecOps, FinOps, Zero Trust

- Deployed and managed 100+ AWS EC2 instances across multiple VPCs with secure routing and NAT, enabling 12 enterprise projects in compliant environments.
- Engineered infrastructure provisioning with Terraform and Ansible, saving 20+ engineering hours per deployment cycle.

- Configured IAM policies and CloudFormation templates to enforce role-based access, preventing 40+ unauthorized login attempts.
- Integrated AWS Lambda with CloudWatch for real-time alerts, reducing drift resolution by 25 minutes per incident.
- Implemented S3 lifecycle rules and programmed backups with PowerShell and Bash, reclaiming 14 TB storage and cutting \$18K annually.
- Directed observability with Datadog and Grafana, boosting uptime for 6 business units through SRE dashboards.
- Standardized Terraform modules via Jenkins and GitHub Actions, achieving 300+ consistent deployments.
- Coordinated 85+ ServiceNow change controls with zero compliance rejections.
- Partnered with security teams to implement Zero Trust and IAM hardening, improving cloud workload security posture.
- Supported FinOps by analyzing AWS spend with Cost Explorer, optimizing instances and lowering monthly cloud expenses.
- Contributed to DevSecOps by integrating Trivy vulnerability scans into CI/CD, blocking insecure Docker images before release.
- Improved reliability of microservices by applying Kubernetes readiness probes and auto-scaling policies, aligning with SRE best practices.
- Enhanced developer onboarding by creating reusable Terraform templates, cutting environment setup time by 40%.
- Conducted RCA of high-severity incidents and built systematized runbooks, reducing MTTR significantly.
- Collaborated with global DevOps teams, enabling standardized pipelines and faster knowledge transfer across regions.

Dell Technologies
Cloud Engineer Intern

India
Apr 2018 – Oct 2018

Tech: AWS (EC2, VPC, S3, IAM), Terraform, Ansible, PowerShell, Azure Monitor, Datadog, ServiceNow, DevOps, Infrastructure-as-Code

- Supported internal DevOps teams by performing cloud automation tasks, system monitoring, and infrastructure documentation for hybrid cloud environments.
- Provisioned 25+ AWS EC2 virtual machines with VPC configurations, enabling secure and scalable hybrid test environments for multiple engineering teams.
- Authored Terraform scripts to automate sandbox infrastructure, reducing manual provisioning steps and saving 6 hours per setup.
- Monitored system health using Azure Monitor and Datadog, detecting issues early and eliminating 12 recurring false-positive alerts.
- Configured IAM role assignments and account cleanup with PowerShell and Ansible, saving 15+ weekly engineering hours.
- Documented runbooks, ITSM processes, and SOPs in ServiceNow, improving onboarding speed for new interns and engineers.
- Collaborated with senior engineers on troubleshooting AWS network and security configurations, gaining exposure to IAM, S3, and VPC best practices.
- Built a strong foundation in cloud provisioning, Infrastructure-as-Code, and automation practices, contributing to Dell’s internal Dev/Test cloud strategy.

PROJECTS

Secure DevOps Automation Framework

- Designed and Deployed a CI/CD security pipeline integrating SonarCloud (SAST), OWASP ZAP (DAST), and Snyk (SCA) within GitHub Actions, enabling early detection of code vulnerabilities across 4 environments.
- Deployed Trivy to automate container vulnerability scans, improving Docker image compliance before deployment to production.
- Created robust Terraform and Puppet templates for streamlined provisioning of AWS compute instances and IAM policies, streamlining infrastructure setup while enforcing security baselines.
- Authored SOPs and Knowledge Base articles, enhancing Level 2 support capability and reducing incident resolution times by 30%.

Enterprise-Scale Cloud Infrastructure & DevOps Automation

- Designed and established a multi-environment infrastructure automation framework using Terraform and Ansible, provisioning EC2-based application stacks with hardened configurations and automated post-deployment tasks.
- Built and maintained CI/CD pipelines with Jenkins and GitHub Actions to support infrastructure code deployments, container image builds, and rollout automation for over 40 microservices across dev, test, and prod.
- Developed IAM policies, Lambda-driven log archival, and S3 lifecycle rules, enhancing resource governance and reducing unused storage footprint by 22%.
- Integrated monitoring using Datadog, Grafana, Prometheus, and CloudWatch, deploying Datadog dashboards to provide real-time visibility into system metrics, latency trends, and deployment errors, reducing average incident response time by 30%.
- Supported application teams by validating API endpoints and REST services; collaborated on automated build pipelines that included HTML, CSS, and JavaScript components.

EDUCATION

Indiana Wesleyan University
Master’s in Information Technology and Project Management
Sri Sai Krupa Degree College
Bachelor’s in Commerce(Computer Science)

IN, USA
Aug 2023 – May 2025
AP, India
Apr 2012 – May 2016

CERTIFICATION

- **AWS Certified Solutions Architect – Associate (SAA-C03) – AWS**
