

Nandhini Balasundaram

Houston, TX 77494 | nandhinisalem@icloud.com | +1 848-256-8347

Summary

Senior Developer with 20+ years of experience delivering scalable, secure, and high-performance web applications. Strong proficiency in **Frontend** Technologies like **TypeScript, Angular (v12–19), RxJS, HTML5, CSS3, JavaScript (ES6+)** and modern state management (**NgRx, Signals**). Skilled in integrating **RESTful APIs**, optimizing performance with lazy loading and code splitting, and ensuring responsive, accessible design. Adept at **unit and E2E testing (Jasmine, Karma, Jest)**. Strong **Back-end** development skills using **Node.js, Express, Core Java, JAX-RS, JPA**. Experience with microservices architecture and distributed systems. Hands-on experience with **CI/CD DevOps** tools like **GitHub, Jenkins, Bitbucket** and cloud platforms (**AWS, IBM Cloud**) and experience working with databases such as **SQL, PostgreSQL, or MongoDB**. Strong collaborator with experience mentoring teams, driving **Agile** best practices, and maintaining code quality through reviews, linting, and style guidelines.

Technical Skills

Frontend: Angular v (12-19), TypeScript, RxJS, JavaScript (ES6+), HTML5, CSS3, SASS, SCSS, Bootstrap.

State Management: Signal Store, Behavior Subjects, Observables, NgRx.

Component Libraries: Angular CDK, Angular Material, Prime NG, Bootstrap.

Backend Integration: Java, JPA, JAX-RS, Node.js, Express.js, RESTful APIs, SOAP, XML,JSON.

Databases: SQL Server, DB2, IBM Cloudant, Postgres SQL, Mongo DB, MySQL, and Oracle.

Testing & Debugging: Junit, Jasmine, Karma, Jest.

Debugging Tools: Chrome DevTools, Postman, Swagger, Fiddler.

Collaboration: Agile/Scrum, Kanban, Jira, GitHub/Bitbucket, CI/CD pipelines (Jenkins, GitHub Actions).

Cloud Platform: AWS, IBM Cloud.

IDEs: VS Code, Eclipse IDE, Visual Studio.

Leadership: Mentoring, code reviews, enforcing coding standards and best practices.

Professional Experience

Leidos Inc.

Houston, TX

May 2023 – Present

Role: Senior Angular Developer with Java (Social Security Administration)

Project: Enterprise Test Data Management System (ETDMS).

Design and Development of **highly scalable, modular Angular applications** using Angular Framework, Typescript, RxJS, HTML, CSS, JavaScript CI/CD, GitHub, Jenkins, Bitbucket, Angular Material, Jasmine and karma.

- Refactored legacy applications into **modern Angular 19 framework** with state management using **Signals and RxJS**.
- Designed and developed **reusable UI components**, services, **directives, pipes** leveraging libraries like Angular CDK and Angular Material, ensuring consistency across applications.
- Integrated complex **RESTful APIs**, handling forms, validations, routing and error states with robust error-handling strategies.
- Improved performance through **lazy loading, code splitting, and RxJS optimizations** (switchMap, mergeMap, debounce Time).
- I achieved **65%+ test coverage** with **Jasmine, Karma, and Jest**.
- Mentored junior developers, conducted code reviews, and enforced coding standards to maintain quality.
- Built **secure, accessible UIs** aligned with **WCAG 2.1** standards and ensured compliance.
- Strong working knowledge on integrating backend service using **JAX-RS, JPA/persistence** and unit testing using **Junit** testing framework.

IBM US

Houston, TX

Role: Senior Full Stack Developer

Sep 2018 – May 2023

Project: Corporate Health and Safety Team

Designed and developed multiple Single Page Web Applications for Corporate Health and Safety using JavaScript, Typescript, Angular, CSS, HTML5, NodeJS, Express, GitHub, Postgres SQL and Cloudant DB on IBM CIO hybrid cloud platform.

- Built multiple **responsive SPAs** using **Angular 12, TypeScript, HTML, CSS, PrimeNG and Bootstrap** for corporate health and safety applications.
- Created Typescript reusable components, directives and services using Angular 12.
- Enhanced performance with **lazy loading modules** and optimized **SQL** queries.
- Developed and consumed **REST APIs** with **Node.js/Express**, ensuring secure data handling Used GitHub for Version Control.
- Performed unit and integration testing.
- Collaborated with UX, backend, and QA teams to deliver features on time in Agile sprints.
- Built **secure, accessible UIs** aligned with **WCAG 2.1** standards and ensured compliance

IBM India Pvt. Ltd.

Role: IT Consultant

Bangalore, IN
Mar 2013–July 2018

Project: IBM Corporate Health and Safety.

- Designed and developed Web Applications for Corporate Health and Safety using Java/J2EE technologies, AJAX, JSPs, SOAP UI, JDBC, SQL, Struts
- Developed applications based on Lotus Notes using lotus scripting.
- Developed features and functionalities for report generation in Lotus Notes using Java Agents
- Designed and developed APIs for migration of data from Lotus Notes to No SQL databases.
- Used JSON and Xml for sending requests and receiving response from interfacing systems.
- Migration of Lotus Notes based application to Web applications using JavaScript, Angular JS, Node JS and Cloudant DB.
- Maintenance and support for Lotus Notes based legacy applications in CH&S

IBM India Pvt. Ltd.

Role: Senior Application Developer/Technical Team Lead

Bangalore, India
August 2005–March 2013

Project: Multiple Projects

- Developed web applications using Spring framework, Java/J2EE technologies, AJAX, JSPs, Servlets, SOAP UI, JDBC, SQL.
- Involved in overall system support and maintenance services such as bug fixing, feature enhancements, testing and documentation.
- Delegating and assigning requests to members in my team and helping them through the entire cycle of the resolution of the requests.
- Worked with Agile Methodology and actively conducted and participated in SCRUM meetings as part of SDLC.
- Risks and Issues tracking and mitigation.
- Managing the work pipeline for the team, as we work on an Agile model where work is added every sprint.
- Assigning incidents and defects daily to the team based on their experience in different modules.
- Present the Weekly Status Report, Monthly Status Reports to the client over conference call.
- Coordinating / facilitating / Driving the team meetings and meetings with client.
- Metrics generation and submission every month
- Quality Audits – Preparing and facing the Quality Audits for the team
- Representing the team in CTR meetings and Monthly meetings with the client.
- Lean Implementation driving and tracking it to closure
- Tracking the lean benefits
- Taking resource interviews, inducting and mentoring new resources in the team.
- Involved in Defect fixing and incident resolution.

Locus Technologies

Chennai, India

Software Trainee

August 2004–August 2005

- Involved in the coding of modules like Library module, Department module, Transport module, Examination Module, Online Examination, and Admission Module.
- Handled coding in many of the parts project and had hands on other areas of the product too.
- Id Card Generation was done using java Swings technology. Also involved in the coding of Id card generation.
- Also having good experience in technologies like jasper reports and servlets in java.

Education

Bachelor of Engineering in Computer Science/Software Engineering

University of Madras
