

Narendra Duggirala

Lead / Sr. Data Engineer

Tampa, FL - open to relocation

Email: narendraduggirala3@gmail.com | Phone: (904) 469-7870

Visa Status: Green Card

Professional Summary

Dynamic IT leader with 13+ years of experience delivering scalable data solutions across healthcare, insurance, banking, and retail. Highly skilled in designing and architecting data pipelines, ETL processes, and enterprise data warehouses using cloud platforms—with a strong emphasis on GCP, AWS, and Azure. Proven track record in transforming legacy systems into agile, high-performance architectures that drive financial reporting and strategic decision-making. Adept at leading teams, optimizing cost efficiencies, and aligning technical solutions with business objectives.

Core Competencies

- **Data Engineering & ETL:** End-to-end pipeline design, data modeling, and performance tuning.
 - **Cloud Architecture:** Expertise in GCP (BigQuery, Cloud Storage, Dataflow), AWS (Glue, Redshift, S3), and Azure (Data Factory, Synapse).
 - **Big Data Technologies:** Apache Airflow, Spark (Streaming, SQL), Kafka, Hadoop, Hive.
 - **Financial & Regulatory Reporting:** Designing systems for robust financial data integration and analytics.
 - **Leadership & Team Management:** Proven ability to lead cross-functional teams and mentor junior engineers.
-

Professional Experience

TE Connectivity, Dallas, TX

Lead Data Engineer | Sep 2023 – Present

- Architect and implement ETL pipelines on AWS using EventBridge, Lambda, Glue, EMR, Athena, DynamoDB, and S3.
- Lead the Enterprise Analytics Team in developing real-time streaming applications with PySpark, Kafka, and Hadoop.
- Drive data model improvements to support enhanced financial reporting and faster ML model training.
- Integrate CI/CD processes with Git, optimizing deployments and reducing operational costs.

NYC OTI, New York, NY

Sr. Data Engineer | Jul 2019 – Aug 2023

- Designed scalable data pipelines and orchestrated data migrations using GCP (BigQuery, Cloud Storage, Dataflow) and Azure Synapse.

- Developed logical and physical data models using Erwin DM, supporting enterprise BI and regulatory reporting.
- Collaborated with business stakeholders to ensure data strategy aligned with financial and operational objectives.
- Delivered cost-effective, real-time analytics solutions that improved decision-making capabilities.

HD Supply, Atlanta, GA

Sr. Azure Data Engineer | Feb 2017 – Jun 2019

- Developed ADF pipelines and data flows to ingest production and planning data from SAP and PI systems into ADLS Gen2.
- Utilized Azure Synapse and Databricks to run queries and optimize data processing, supporting robust financial and operational reporting.
- Built and maintained end-to-end data solutions using Azure Data Factory, Azure SQL DB, and serverless compute models.
- Implemented CI/CD practices for data pipelines using Azure DevOps, streamlining deployments and reducing errors.

Adobe, USA

ETL Data Engineer | Nov 2015 – Jun 2017

- Engineered a data lake on AWS using Hadoop, Kafka, and Spark to support real-time reporting via Tableau.
- Created detailed source-to-target mappings and automated data validation, enhancing data quality.
- Integrated GCP components (BigQuery, Cloud Storage) to achieve scalable and cost-efficient data processing.
- Collaborated with cross-functional teams to align data models with business reporting needs.

California Department of Motor Vehicles, Sacramento, CA

Data Engineer/Analyst | Sep 2012 – Sep 2015

- Developed ETL processes to migrate data from on-premises systems to cloud platforms (AWS), ensuring data accuracy for regulatory reporting.
- Created physical data models, optimized SQL queries, and implemented data quality frameworks.
- Collaborated with business analysts to define data requirements and built scalable architectures for enterprise data services.
- Designed and maintained Hive partitions and managed data quality in a Hadoop environment.

Ransom Tech, Hyderabad, India

Intern SQL/ETL Developer | Dec 2011 – Apr 2012

- Coordinated with business analysts to gather requirements and design ETL mappings using Informatica PowerCenter.
- Developed source-to-target mappings and technical specifications, streamlining data migration processes.
- Assisted in creating reusable transformation objects, reducing development time and ensuring consistency.

Education & Certifications

- **Bachelor's in Computer Science**, JNTU Hyderabad (2008 – 2012)
 - **Master's in Computer Science**, Saint Leo University (2012 – 2013)
 - **Certifications:**
 - AWS Certified Solutions Architect – Associate
 - AWS Certified Cloud Practitioner
 - GCP Certified
 - Azure Certified
-

Technical Skills

- **Programming/Scripting:** Python, Scala, Shell Scripting, SQL, Java, C#
 - **Big Data & ETL Tools:** Apache Airflow, Spark, Kafka, Hadoop, Hive, Pig, Oozie, Sqoop
 - **Cloud Platforms:** GCP (BigQuery, Cloud Storage, Dataflow, Cloud Composer), AWS (EC2, S3, EMR, Glue, Redshift), Azure (Data Factory, Synapse, Data Lake)
 - **Databases:** Oracle, SQL Server, MySQL, Teradata, MongoDB, Cassandra, Snowflake
 - **BI & Visualization:** Tableau, Power BI, SSIS/SSRS
 - **Other Tools:** Informatica, Pentaho, Git, Terraform, Ansible
-

Selected Projects & Achievements

- **ETL Optimization:** Reduced processing times by 40% through PySpark and cloud-native solutions, enhancing operational efficiency.
 - **Cloud Migration:** Successfully transitioned legacy databases to modern cloud environments (Azure, AWS, GCP) with minimal downtime, leading to significant cost savings.
 - **Real-Time Analytics:** Engineered robust data streaming pipelines that enabled real-time, data-driven decision-making and improved financial reporting.
 - **Financial Data Integration:** Designed scalable data architectures that supported complex regulatory and financial reporting needs.
 - **Leadership:** Led cross-functional teams and mentored junior engineers to build high-performing data solutions, driving strategic business outcomes.
-
