

Nikhil Sai Chandra Goud Jutla

Business Analyst

Location: Washington, USA | **Mail:** nikhilsaichandrajutla@gmail.com | **Ph:** 443 494 6737 | [LinkedIn](#)

PROFESSIONAL SUMMARY:

- 6+ years of experience as a Business Analyst with expertise in requirements gathering, documentation (BRD, FRD, SRS), UML diagrams (Class, Sequence, Collaboration, Activity, Use Case), BPMN, RTM, gap and impact analysis, SWOT analysis, risk assessment and JAD sessions.
- Proficient in SQL (MySQL, PostgreSQL), Tableau, Power BI, Postman, SoapUI, HL7, FHIR, EDI (837, 835, 270, 271), X12, RBAC, Microsoft Azure, ICD-10, CPT, HCPCS, AML, KYC and Rational Rose.
- Skilled in API testing, data analysis, dashboard development and compliance with HIPAA, HITRUST, RBI and Basel III standards.
- Experienced in EMR/EHR integration, claims processing, core banking modernization, retail and e-commerce.

TECHNICAL SKILLS:

Business & Requirement Analysis:	FRD, BRD, SRS, RTM, Use Cases, User Stories, JAD, BPMN, RACI Matrix
Regulatory & Compliance:	HIPAA, HITRUST, ICD-10, CPT, HCPCS, AML, KYC, RBI Guidelines, Basel III
Data Analysis & Databases:	SQL, MySQL, PostgreSQL, Oracle
Reporting & Visualization:	Power BI, Tableau
Software Development Methodologies:	SDLC, Agile, Scrum, Waterfall
Process Modelling & Design:	UML (Class, Sequence, Collaboration, Activity, Use Case), Rational Rose, MS Visio
Testing & QA:	UAT, API Testing, Postman, SOAP UI
Data Exchange & Interoperability:	HL7, FHIR, EDI (837, 835, 270, 271), X12 Standards
Cloud & Security:	Microsoft Azure, AWS, Role-Based Access Control (RBAC)
Collaboration & Project Management:	Jira, Confluence, MS Project, Microsoft Office Suite (Word, Excel, Visio, PowerPoint, Outlook), Slack, Microsoft Teams, Zoom

PROFESSIONAL EXPERIENCE:

Business Analyst, Cardinal Health – WA

August 2023 – Present

- Conducted in-depth stakeholder interviews & facilitated Joint Application Development (JAD) sessions to gather & prioritize business requirements, reducing requirement gaps by 25% & ensuring alignment with organizational goals.
- Authored detailed Functional Requirement Documents (FRD), Business Requirement Documents (BRD) and System Requirement Specifications (SRS) for EMR/EHR integration and claims processing systems, ensuring seamless alignment between business needs and technical solutions.
- Designed UML diagrams (Class, Sequence, Collaboration, Activity) to visualize and optimize healthcare workflows, resulting in a 30% reduction in process inefficiencies and improved operational throughput.
- Maintained a Requirement Traceability Matrix (RTM) to ensure 100% traceability of requirements throughout the Software Development Life Cycle (SDLC), minimizing scope creep and ensuring timely project delivery.
- Performed comprehensive gap analysis and impact analysis to identify process bottlenecks, leading to a 20% reduction in operational costs and enhanced system performance.
- Conducted SWOT analysis and risk assessments to identify and mitigate high-priority risks related to data security, HIPAA compliance and regulatory requirements, ensuring zero compliance violations.
- Collaborated with development and QA teams to integrate HL7 and FHIR standards, improving data interoperability by 40% and enabling seamless exchange of patient data across systems.
- Leveraged SQL to query and analyse patient records and claims data, identifying trends that improved revenue cycle efficiency by 25% and reduced claim processing times.
- Deployed interactive dashboards in Tableau to monitor KPIs such as claim denial rates, patient satisfaction scores and revenue metrics, empowering senior leadership with actionable insights for data-driven decision-making.
- Conducted API testing using Postman and SoapUI to validate EDI transactions (837, 835, 270, 271), ensuring 100% functionality and compliance with X12 standards for claims processing.
- Implemented Role-Based Access Control (RBAC) in Microsoft Azure to safeguard Protected Health Information (PHI) and Personally Identifiable Information (PII), ensuring compliance with HIPAA and HITRUST standards.
- Partnered with cross-functional teams to ensure adherence to ICD-10, CPT and HCPCS coding standards, reducing claim denials by 15% and improving reimbursement accuracy.

Business Analyst, Zensar Technologies – India**June 2020 - July 2022**

- Successfully reduced UAT defects by 25% through meticulous requirement gathering and rigorous RTM implementation, ensuring seamless system integration and minimizing post-launch issues.
- Achieved 100% compliance with RBI guidelines and Basel III regulations during system modernization, ensuring adherence to stringent financial standards and mitigating risk exposure.
- Conducted Joint Application Development sessions with key stakeholders to gather, document and validate business requirements for Core Banking System (CBS) modernization, fostering collaboration & alignment across department
- Authored comprehensive Business Requirement Documents (BRD), Functional Requirement Documents (FRD) and System Requirement Specifications (SRS), ensuring alignment with strategic business objectives & regulatory standards.
- Developed user stories and use cases to define system functionality and user interactions, leveraging Agile methodologies to enhance project flexibility and responsiveness to changing business needs.
- Performed thorough gap analysis to identify inefficiencies in existing processes and proposed actionable solutions, driving operational efficiency and cost savings.
- Utilized SQL to analyse transactional data, identifying trends and providing actionable insights to stakeholders, thereby informing strategic business decisions and improving financial performance.
- Developed interactive dashboards in Power BI to visualize key performance metrics for senior management, facilitating data-driven decision-making and strategic planning.
- Ensured compliance with Anti-Money Laundering (AML) and Know Your Customer (KYC) regulations by integrating automated verification processes into the CBS, enhancing risk management and regulatory adherence.
- Utilized Rational Rose to create UML diagrams (Use Case, Sequence, Class) for system design and documentation, ensuring clarity and precision in technical specifications and facilitating effective system maintenance.

Business Analyst, BitInfocom Technologies – India**May 2017 - June 2020**

- Authored detailed Business Requirements Document (BRD) and Functional Requirements Document (FRD) to define project scope, objectives and deliverables, ensuring alignment with strategic business initiatives in the retail and e-commerce landscape.
- Crafted comprehensive Software Requirement Specification (SRS) documents that articulate system functionalities, user interactions and integration points, ensuring that technical specifications meet business objectives and user needs.
- Designed intricate Use Case Diagrams and User Stories that effectively communicate functional requirements to stakeholders, enhancing understanding and fostering collaboration throughout the project lifecycle.
- Maintained a robust Requirements Traceability Matrix (RTM) to ensure all project requirements are tracked, validated and met, facilitating seamless project execution and delivery.
- Employed Business Process Modelling Notation (BPMN) to visualize, analyse and optimize key business processes, achieving a measurable 20% increase in operational efficiency and streamlining workflows within the organization.
- Led Joint Application Development (JAD) sessions with cross-functional teams to elicit requirements, validate solutions and ensure stakeholder alignment, resulting in enhanced project outcomes and stakeholder satisfaction.
- Developed and implemented a RACI Matrix to delineate roles and responsibilities across project teams, fostering accountability, improving communication and enhancing overall team collaboration.
- Conducted in-depth data analysis using SQL (MySQL, PostgreSQL) to extract actionable insights, support data-driven decision-making and identify trends that inform business strategies in the retail and e-commerce sectors.
- Designed and developed interactive dashboards in Power BI for real-time reporting and performance tracking, providing stakeholders with enhanced visibility into key performance indicators (KPIs) and facilitating timely decision-making.
- Collaborated with stakeholders using Microsoft Office Suite and communication platforms (Slack, Microsoft Teams, Zoom) to ensure effective project discussions, updates and feedback loops, promoting transparency and alignment throughout the project lifecycle.

EDUCATION:**Masters of Business Administration (STEM)** - University of Southern California, Los Angeles, CA, USA**Bachelor of Computer Science and Engineering** – Jawaharlal Nehru Technological University, Hyderabad, India
