EXPERIENCE

Associate I

June 2025 – Present

Intel Oregon, USA

- Engineered a Python-based automation tool to streamline deployment workflows across **60+ Linux servers**, cutting process time by **80%** and saving up to **20 engineering hours weekly**.
- Diagnosed and resolved **40+ complex system failures** in embedded Linux environments by analyzing kernel logs and fixing driver mismatches, reducing recurring issues by **40%** and improving system reliability.
- Automated connectivity, performance, and integration tests using Python, reducing verification time by **60%**, improving test coverage, and accelerating detection of configuration and driver issues.

Software Engineer

October 2022 – July 2023

Cognizant India

- Developed and optimized backend services for the insurance dashboard using **Java, Spring Boot, Hibernate, and MySQL**, improving API performance by **30%** and enhancing user experience for 50+ internal agents.
- Led the migration of the loan disbursement module from synchronous service calls to a **Kafka-based event-driven architecture**, decoupling services for resilience, enabling **3× higher transaction throughput**, and achieving zero message loss.
- Engineered **CI/CD pipelines** with Jenkins, Maven, and Docker, integrating JUnit 5 and Mockito test suites for continuous validation—cutting release time by **50%** and reducing post-deployment defects by **30%**.
- Revamped a MySQL-backed transaction history API by replacing **OFFSET-based pagination with keyset pagination**, reducing query time from 2.6s to under 200ms and ensuring consistency across millions of records.

Junior Software Engineer

September 2021 – October 2022

Cognizant India

- Created modular, responsive UIs with **React** for 3 client platforms, improving cross-browser compatibility and boosting task completion by **20%** through better layout and accessibility.
- Refined UI components with **hooks and lazy loading**, reducing frontend load time by **25%** and improving application responsiveness.
- Integrated 15+ **RESTful APIs** with frontend modules, collaborating closely with backend engineers to refine contracts and improve data handling, reducing API failures by **30%**.
- Developed and automated **Jest test suites** for 50+ React UI components, resolving integration issues during UAT and delivering stable, high-performance releases.

SKILLS

Programming/Scripting: Java, J2EE, Python, C/C++, SQL, TypeScript, JavaScript (ES6+), HTML5, CSS3, XML, JSON, Bash, Linux

Frameworks/Libraries: Spring Framework, Spring Boot, React.js, Redux, Node.js, Express.js, JQuery, Kafka, Microservices

Databases & Cloud Services: Oracle, MySQL, PostgreSQL, MongoDB, AWS (S3, EC2, RDS, SQS, SNS, Lambda)

Tools & Technologies: GraphQL, RESTful APIs, Jenkins, Kubernetes, Docker, Apache Kafka, Maven, Apache Ignite, Redis, Swagger

Developer Tools: Git, Postman, GitLab, Bitbucket, VS Code, Visual Studio, IntelliJ IDEA, Eclipse, JIRA, Confluence

EDUCATION

Indiana University Bloomington

Bloomington, IN

Master of Science in Computer Science

August 2023 – May 2025

Visvesvaraya Technological University

Bengaluru, India

Bachelor of Engineering in Computer Science and Engineering

July 2017 – July 2021

PROJECTS

ChatWise: AI-Powered Chat App | Vue.js, Node.js, TypeScript, Stream Chat, Neon PostgreSQL

- Built a full-stack conversational AI app integrating OpenAI's **GPT API** for context-aware responses, Stream Chat for real-time messaging, and Neon PostgreSQL with Drizzle ORM for persistent chat history.
- Deployed backend on **Render** and frontend on **Vercel**; delivered a responsive, state-managed UI with Vue.js, Pinia, and TailwindCSS, resulting in a scalable, production-ready chat platform.

Brew Hub | MongoDB, Express.js, React.js, Node.js

- Designed and deployed a **café storefront** using the MERN stack, implementing modular React components for a reusable and maintainable frontend architecture.
- Connected **REST APIs** to dynamically render product data, improving user experience and ensuring responsive, maintainable full-stack application performance.
