PROFILE

7+ years hands-on experience in software testing and quality assurance within Agile environments. Solid knowledge in the software development life cycle (SDLC) and SQA methodologies with involvement in reviewing requirements, estimating test scope, and collaborating with developers and product owners. Strong attention to detail, critical thinking, problem-solving skills. Fast learner and hard worker with a continuous growth mindset. Enjoy collaborating as part of a result-driven team while working independently when needed.

CERTIFICATES

12/2023

ISTQB CTFL
American Software Testing Qualifications Board

EXPERIENCE

03/2022 – 09/2025
New York

QA Analyst **Raistone**

- Collaborated with Senior Quality Assurance Manager and cross-functional teams to implement and execute a comprehensive quality assurance program throughout the Software Development Life Cycle (SDLC), ensuring high-quality fintech products for working capital finance solutions.
- Conducted rigorous functional, non-functional, and regression testing on complex financial software, including API testing with Postman, resulting in 30% reduction in production defects through early identification.
- Developed and executed manual test plans, test cases, scripts, and protocols for validating intricate financial calculations across multiple currencies, while participating in requirements analysis and user story testing to enhance testability and prevent issues pre-development.
- Identified, documented, and managed defects using Jira, performing root-cause analysis and troubleshooting with engineering teams to resolve issues, and interfaced with external partners for seamless integration testing.
- Facilitated User Acceptance Testing (UAT) sessions with business stakeholders, securing sign-offs on documentation and adhering to Agile/Scrum best practices to improve overall product quality and productivity in a fast-paced fintech environment.
- Managed test environment builds in Azure, supporting QA validation and smooth release cycles.
- Validated integrations and data synchronization for client transactions.
- Conducted database testing in MySQL and Azure to ensure business requirement compliance.
- Provided guidance to team members, maintained test data, and created QA knowledge bases in an Agile Scrum framework.
- Participated in team meetings, communicating with developers, business analysts, and product owners to offer recommendations on software usability and functionality.

07/2018 – 02/2022
New York

Software QA Engineer **RAM technologies**

- Ensured the quality and functionality of software products through comprehensive testing processes, identifying and documenting bugs and inconsistencies.
- Conducted back-end testing to ensure data consistency on front-end by writing and executing SQL queries.

EXPERIENCE

- Created detailed test cases, conducting manual testing, and verifying software performance in multiple projects, such as Web application for job search, goods and services, Mobile messenger application, and Audio streaming web player.
- Collaborated with cross-functional teams to troubleshoot issues, validate fixes, and ensure smooth releases.
