

PETER AKINWUSI

Multi-Cloud Solutions Architect | DevSecOps Engineer | Cloud Security Specialist

 GA / USA |  yinkaakinwusi8@gmail.com |  +1-314-397-2863

LinkedIn: www.linkedin.com/in/peter-akinwusi-58396522

PROFESSIONAL SUMMARY

Versatile and results-oriented Senior Cloud Solutions Architect with over 12 years of progressive experience delivering cloud transformation, infrastructure modernization, and enterprise security across Microsoft Azure, AWS, and hybrid environments. Proven record in architecting secure, scalable, and automated cloud ecosystems, embedding DevSecOps principles, and leading multi-phase migrations. Strong communicator skilled at aligning technology strategy with business outcomes, guiding organizations through digital transformation while maintaining compliance, governance, and operational efficiency.

CORE COMPETENCIES

Cloud Platforms: Azure (Landing Zones, Networking, Security), AWS, GCP
Infrastructure as Code: Terraform, ARM Templates, CloudFormation, Bicep
DevOps & Automation: Azure DevOps, GitHub Actions, Jenkins, CI/CD, YAML Pipelines
Networking: ExpressRoute, VPN, NSG, Load Balancer, Route Tables, SD-WAN
Security & Governance: Zero Trust, IAM, Defender, Sentinel, Key Vault, CIS, NIST
Containers & Orchestration: Docker, Kubernetes (AKS, EKS), Helm, ArgoCD
Monitoring & Observability: Azure Monitor, Log Analytics, CloudWatch, Grafana
Languages / Scripting: PowerShell, Bash, Python
Compliance Frameworks: FedRAMP, PCI-DSS, CIS, STIG

CERTIFICATIONS

- Microsoft Certified: Azure Solutions Architect Expert (AZ-304 / 305)
- AWS Certified Solutions Architect – Professional & Associate
- Google Cloud Certified – Professional Cloud Architect (in progress)
- Azure Certified Security Engineer
- AWS Advanced Networking Specialist
- Cisco Certified Network Professional (CCNP)
- Palo Alto Certified Network Security Engineer (PCNSE)
- VMware Certified Professional – Network Virtualization
- F5 Certified BIG-IP Administrator (F5-CA)

PROFESSIONAL EXPERIENCE

Microsoft | *Atlanta Metropolitan Area* | **Sr. Cloud Solutions Architect** | *Oct 2021 – Present*

- Design and deploy secure, scalable Azure architectures, integrating automation with ARM templates, Terraform, and Bicep.
- Architect Landing Zones and hybrid networking models, enabling enterprise-scale governance and resiliency.
- Lead multi-cloud adoption engagements, defining migration roadmaps and modernization blueprints.
- Integrate Azure security services (Defender, Sentinel, Key Vault, Conditional Access) into cloud solutions.
- Embed CI/CD pipelines within DevOps workflows to standardize provisioning and code releases.
- Advise executive stakeholders on cloud strategy, cost governance, and compliance optimization.
- Drive continuous improvement by aligning technical designs with business and operational objectives.

Deloitte | *Atlanta, GA (Remote)* | **Specialist Senior – Cloud Infrastructure** | *Oct 2019 – Oct 2021*

- Designed and maintained highly available, fault-tolerant cloud infrastructures across multiple client environments.
- Led enterprise migration of on-prem workloads to Azure, leveraging Azure Migrate and Automation Accounts.
- Implemented multi-region resiliency and automated backup/disaster recovery frameworks.
- Integrated Zero Trust security principles using IAM, NSGs, and conditional policies.
- Automated environment builds using Terraform and ARM, improving deployment consistency.
- Collaborated with DevOps teams to embed security scanning and validation into CI/CD workflows.
- Served as cloud advisor on architecture governance and optimization strategies for key enterprise clients.

Palo Alto Networks | *Atlanta, GA* | **Resident Engineer (Security & Cloud Integration)** | *Nov 2017 – Oct 2019*

- Acted as Trusted Advisor for client organizations, designing and implementing next-generation firewall strategies.
- Integrated Palo Alto Networks firewalls into AWS and Azure environments for unified visibility.
- Designed Zero Trust architectures incorporating identity, segmentation, and threat prevention.
- Automated security control deployment via Ansible and Terraform.
- Collaborated with security operations teams on incident response and threat intelligence integration.

- Delivered workshops to enterprise clients on network security modernization.
- Supported transition roadmaps and technology refresh initiatives during large-scale security transformations.

WellStar Health System | *Atlanta, GA* | **Network Engineer** | *Jul 2016 – Nov 2017*

- Designed and consolidated LAN/WAN infrastructure across new hospital integrations.
- Deployed and maintained F5 GTM/LTM load balancers for global and local traffic management.
- Configured and maintained Cisco ASA firewalls to enforce HIPAA-compliant network security.
- Implemented DMVPN tunnels and BGP/OSPF routing for secure site-to-site connectivity.
- Conducted network performance optimization and risk assessments for data centers.
- Introduced redundancy using HSRP and spanning-tree protocols for high availability.
- Partnered with IT leadership to streamline data center expansion and network modernization.

The Home Depot | *Atlanta, GA* | **Systems Analyst** | *Aug 2014 – Jun 2016*

- Managed HP Server Automation (HPSA) deployments for Linux and Windows systems across multiple data centers.
- Automated provisioning, patching, and restarts of server clusters across production and test environments.
- Provided technical support to end-users performing deployments and OS management.
- Supported Jenkins and Puppet infrastructure integration with CI/CD systems.
- Developed Bash and Python scripts to enhance deployment efficiency.
- Improved operational visibility by implementing server health monitoring dashboards.
- Maintained infrastructure stability across nationwide retail store systems.

SwordCon Group | *St. Louis, MO* | **Enterprise Solutions Architect** | *Aug 2014 – Oct 2014*

- Architected custom IT solutions across multiple industry verticals, aligning designs with business goals.
- Deployed Office 365 and Exchange migrations for mid-sized enterprises.
- Collaborated with sales and engineering teams to deliver integrated technology roadmaps.
- Created technical design documentation and project proposals for client engagements.
- Managed post-deployment support and client training on new solutions.
- Delivered product demos showcasing scalability and ROI benefits.
- Supported business development through proactive technical engagement with new prospects.

Webster University | *St. Louis, MO* | **Computer Science Tutor** | *Jul 2012 – Oct 2014*

- Tutored undergraduates in programming and systems analysis, reinforcing conceptual understanding.

- Developed course support materials for data structures and software design modules.
- Mentored students on practical implementation of algorithms and data management.

Savvis (CenturyLink Business) | St. Louis, MO | Graduate Research Intern / IT Provisioner | May 2013 – Dec 2013

- Conducted Proof of Concepts on SDN and cloud network solutions using Brocade and Vyatta routers.
- Supported server and storage reclamation projects, optimizing data center utilization.
- Coordinated installation and change management activities per hosting infrastructure standards.
- Created detailed implementation documentation and connectivity plans for infrastructure builds.

Project Wyz | Bangalore, India | System Administrator | Jul 2011 – Mar 2012

- Managed **Active Directory, Exchange, and backup servers**, ensuring operational continuity.
- Performed OS deployments and troubleshooting on Windows servers and workstations.
- Implemented endpoint protection policies and backup automation.
- Supported internal staff through Tier 2 and Tier 3 technical assistance.

Maranatha Cybernetiqs | Nigeria | Network Administrator | Jan 2009 – Jul 2011

- Led a team of 5 engineers delivering **LAN/WAN deployments** for corporate clients.
- Designed network topologies using Cisco switches and routers; created **Visio diagrams** and documentation.
- Conducted performance tuning and proactive monitoring to improve uptime.
- Implemented network upgrade projects per organizational standards and client SLAs.

Information Technology & Communication Unit (INTECU) | Nigeria | Network Engineer (Intern) | Jan 2008 – Dec 2008

- Assisted in configuring routers, switches, and access control systems for campus-wide networks.
- Supported network troubleshooting and maintenance operations for university infrastructure.

EDUCATION

Master of Science in Computer Science – Webster University, St. Louis, Missouri

Bachelor of Technology in Electronic & Electrical Engineering – Ladoke Akintola University of Technology, Nigeria

PROJECTS EXECUTED

1. Enterprise-Scale Azure Landing Zone Deployment — Microsoft

- Designed and deployed secure Azure landing zones across multiple enterprise clients, establishing governance, identity, and policy frameworks for cloud adoption at scale.
- Integrated Terraform and ARM templates to automate provisioning, compliance, and configuration management.
- Result: Accelerated onboarding of workloads by 60% while ensuring compliance with CIS and NIST frameworks.

2. Multi-Cloud Migration & Modernization Initiative — Deloitte

- Led migration of over 300 workloads from on-prem data centers to Azure and AWS, modernizing legacy applications into containerized environments.
- Built automated pipelines using Azure DevOps and Terraform, enabling CI/CD across dev, QA, and production environments.
- Result: Improved deployment efficiency by 50% and reduced operational costs by 40%.

3. Zero Trust Security Architecture Implementation — Palo Alto Networks

- Architected and implemented Zero Trust security models across hybrid cloud environments using Palo Alto NGFWs, Prisma Cloud, and Azure Security Center.
- Automated threat prevention and identity-based segmentation, integrating SIEM telemetry with Sentinel and Cortex XSOAR.
- Result: Strengthened cloud posture visibility and reduced incident response time by 35%.

4. Hybrid Cloud Network Transformation — WellStar Health System

- Designed and deployed hybrid connectivity using ExpressRoute, site-to-site VPN, and F5 load balancing to connect data centers with Azure and AWS.
- Implemented redundancy using SD-WAN and dynamic routing (BGP/OSPF) to enhance uptime.
- Result: Increased network reliability by 99.9% and reduced latency across 20+ healthcare facilities.

5. Automated Infrastructure as Code Framework — The Home Depot

- Developed reusable **Terraform and HPSA** scripts to automate infrastructure provisioning and patch management across Home Depot's nationwide data centers.
- Integrated infrastructure automation with **Jenkins CI/CD pipelines**, standardizing deployment workflows.
- Result: Reduced provisioning time from several hours to under 25 minutes per environment.
