

PIERRE HARRIS
INFORMATION TECHNOLOGIES CONSULTANT
(323) 975-1385
2024789@gmail.com

Summary

Technical leadership, development, guidance and accountability for legacy and client server (n-tier) systems (design, development, support or transition), using System Development (Waterfall), Service Oriented Architecture, Agile, project management and data modeling methodologies. Primary liaison between business owner (s), application team(s) to clearly define, develop, implement, and document processes, depending on the methodology used. Implementation of various projects for multiple clients, in Retail, Insurance, Financial, Telecommunication and other industries to achieve their mission, vision using technological and strategic objectives in support of the business need. Other duties included Disaster & recovery, contingency and business continuity planning, database administration.

Technical Skills:

Server:

Platforms - Windows 2000, 2000 Advanced Server, 2003 Server, 2008 and 2012 Server, Apache (HTTP & TOMCAT) Server, SharePoint 2007 , SAP Presentation, Application, Database, and Web Application Server (WebAS), SAP NetWeaver.

Operating Systems: MS Windows 2000, XP, VISTA, Windows v7 – v10, DOS, UNIX (Korn, Bourne, C shell) UNIX (NFS, SAMP,LAMP), GNU/LINUX.

RDBMS Server's: Microsoft SQL Server (2000, 2005, 2008, 2012), MS SQL Server Business Intelligence (SSIS, SSRS, SSAS, DTEXec, DTEXecUI, DTUTIL), Microsoft Access, SQL, TSQL, DB2/UDB, Oracle, Oracle8i, Oracle 11g (PL/SQL), Teradata/Teradata SQL, Teradata studio, MySQL, ANSI ISO SQL.

Software:, Visual Basic 6, Active Server Page (ASP), VB Script, C++, C#, Language-Integrated Query (LINQ), Windows Presentation Foundation(WPF), Windows Communication Foundation (WCF), ODBC/JDBC/DBI, SSH2, SFTP, PHP4, SQL, MICROFOCUS COBOL, JAVA, JavaScript, JavaScript Object Notation(JSON), , JQuery, Cascading Style Sheets (CSS, CSS3),Comma-Separated Values (CSV) Formats, Windows Communication Foundation(WCF), Web Services Descriptions (WSDL), Universal Description, Discovery, and Integration (UDDI), MS Office Suite.

Markup Language: XML, XSD, XSLT, XQuery, XHTML, Electronic Business Extensible Markup Language (ebXML) Discoverable Taxonomy Set (DTS), XBRL General Ledger taxonomy (XBRL GL), eXtensible Business Report Language (XBRL), HTML, DHTML, HTML 5, Simple Cloud Identity Management (SCIM), Security Assertion Markup Language (SAML), extensible Access Control Markup Language (XACML), Asynchronous JavaScript and XML. (AJAX), SAP GUI, SAP GUI for HTML.

FrameWorks: Microsoft .Net (1.0, 2.0, 3.5, 4.0, 7.0), JDeveloper Studio 11.1.1.6.0, NetBeans IDE 7.2.1, , J2EE, JAVA SDK, MS Visual Studio (2003, 2005, 2008, 2010, 2017), WS-Security framework, ECLIPSE.

Networks/Protocols: Ethernet, ATM, LAN, WAN, Wireless, Universal Mobile Telecommunication Systems (UMTS), Global System for Mobile communications (GSM), General Packet Radio Service (GPRS), Wideband Code Division Multiple Access (W-CDMA), TCP/IP, HTTP, Representational State Transfer(REST), Simple Object Access Protocol(SOAP), Session Initiation Protocol (SIP), Voice over Internet Phone (VoIP), RIP, OSPF, SAP, H.323, IMS Connect/OTMA.

Configuration Management: ClearCase, ClearQuest, SafeSource.

Software Methodologies & Technologies: Agile Software Development, Object-Oriented Analysis & Design, Data-Warehousing, System Development and Service Development life cycle (SDLC), Rational Rose/Unified Modelling Language (UML), Microsoft Project, Microsoft office edition 2003 & 2007, 2010, Enterprise Data Management & Administration, Enterprise Resources Management, Business Intelligence Systems, IMS Specifications: Interoperability, Decision Support & Expert Systems, (DeMarco, Peter Chen, Erwin models, Gane & Sarson, Yourdon Methodology), Service Oriented Architect (SOA).

Mainframe:

Operating Systems: IBM zOS 2.3 – 64-bit z/Architecture, IBM System z10 and IBM System z9 technology and the IBM eServer, zSeries 990 (z990), 890 (z890), OS390, OS/VS/MVS/XA/ESA, IBM zOS v2.2, DEC/VAX Open VMS, IBM VM/CMS, IBM Resource Access Control Facility (RACF).

Environment/access methods: TSO/E, TSO/ISPF, JCL, DOS/VSE, DEC DCL, CMS, ROSCOE, DASD, SAS, SMS, SDSF, PDF, VSAM.

Software/subsystems: COBOL, COBOL II, COBOL 5, VAX COBOL, COBOL 370, PL/1, Basic Assembler Language, DYI-280, SAS v9, RUMBA Gateway, FTP, FDR/ABR, CLIST, IBM Utilities, FILEAID, EASYTRIEVE, TPNS, XPEDITER, INTERTEST, CA-7, SOL, PSI, CICS, IMS/DL1/DC - (BTS, MFS, FSS, BMP, MPP), IMS/DB/DL1, IMS/ESA v14.1, JES, APPC, z/OS UNIX System Services, DDF, IMS Problem Investigator. QMF, SPUFI, DB2 OPTIMIZER, FaultAnalyzer.

Configuration Management: LIBRARIAN, PANVALET/PANEXEC, ENDEAVOR, CHANGEMAN

Mainframe Database: IMS DB/DL1, FASTPATH, IBM DB2 (11.1), Distributed Relational Database Architecture (DRDA) TERADATA - (BTEQ, Queryman, FASTEXPORT, FASTLOAD, MULTILoad, TPUMP, Teradata SQL), PLATINUM/DB2, DEC'S RDB,

Professional Experience

Computer Engineering Technology

07/2020 – 7/2024

Software Developer

Part-time Web Design and development for software company. HTML5, JAVASCRIPT, ASP, Windows,

Vertec Inc,

02/2014 – 05/2020

AT&T, Sherman Oaks, CA.

Software Developer

Production support, guidance, web based applications, measurements and governance for AT&T - Ericsson software, TIRKS/FEPS system. TIRKS/FEPS system is an integrated software system that supports the provisioning process for special service circuits, message trunks, and carrier circuits. The types of services supported include switched, 2-point, and multi-point circuits as well as exchange and local access circuits. The TIRKS system also provides inventory management of transport facilities, terminating and signaling. TIRKS child Applications -Trunk and Facility Assignment System (TFAS), Total System for External Network Distribution (TSEND), Word-Sketch (Visual Basic using .NET Platform), and Planning Workstation (PWS), TIRKS jX GUI, TIRKS jX API. Windows, UNIX, Linux, SQL Server platform. TERADATA Developer in development and support of two Teradata Data warehouses using TERADATA Components/Tools. Other assignments include participation in coordination of software release once a year for Client Server and Mainframe environment, Disaster and Recovery architect for TIRKS and TIRKS jX child applications.

Technologies: Oracle, PL/SQL, TOAD for ORACLE 11.6, JAVA 7, JRE, Microsoft SQL Server, MVS zOS 2.2, TSO/ISPF, **IMS DB/DC, DL1** v14.1, DB2/SQL v11.1, QMF, SPUFI, UNIX, JCL, COBOL 5, Enterprise COBOL for z/OS, V5.1, RACF, ODBC, IBM WebSphere™ Message Queue (MQ), IMS Connect/OTMA, XML, XSD, XSLT, XPATH, XQUERY, WSDL, REST, HTTP, PHP, SOAP, SSL, TLS, Microsoft Visual Basic/ASP, Windows 7 & 10, Windows Server 2008 & 2012, SharePoint, Service Oriented Architecture(SOA), Eclipse 10, IBM Fault

Analyzer, Teradata/Studio, IBM IMS Problem Investigator, CHANGEMAN, PANVALET/PANEXEC, SAP Business Object XI 3.1, SAP BUSINESS OBJECTS, BI Platform 4.1, Web-Services, AGILE, UNIX, Domain Name Services (DNS).

Independent Consultant, Port Hueneme, CA.

04/2013 – 2/2014

Consultant/Network Support

- Providing strategy in the development and conversion of National Ladies Society web site from MS SQL to DB2/UDB.
- Service support of Raft Inc. LAN and Website.

Service support of Raft Inc. LAN and Website. Service Support activities included software updates, operating Systems updates/patches, Installation and activation of Virus Software on all workstations, configuring work stations to connect to various printers, increasing memory capacity, wireless access point installation, switch replace and configuration, on-call support. **Technologies:** PHP, DB2 Universal Database (UDB), SQL, UniFlash, MS SQL Server, MS Visual Basic, JavaScript, Windows XP, VISTA, Linksys routers, CISCO Switch, LAN.

Infosys Technologies-

02/2012 – 03/2013

Toyota Motor Sales, USA, Inc., Torrance, CA - Technical Analyst

Provide 24 by 7 customer and system production support and enhancement of Dealer Pipeline Management System (DPMS). DPMS (ERP module) is the front-end of Toyota ERP system which integrated with other systems for fulfilment (business process) of Vehicles for Toyota, Lexus, Scion Dealers, Southeast Coast (SEC) and Gulf States of Toyota (GST) distributors. DPMS is a real-time, distributed n-tier system used for vehicle allocation and swapping of vehicles by dealer. Applied service design and transition phase in the enhancement of five projects for DPMS tiers (Web (UI), application and database servers. **Technologies:** Visual Basic 6, NET platform (3.5) runtime, MS Visual Studio 6, SQL, Active Server Pages (ASP), HTML, CSS, JAVASCRIPT, VB Script, DB2/SQL, MS SQL Server Stored Procedures, TSQL, MVS ZOS/390, TSO, JCL, COBOLII, COBOL, IMS DB/DC/DL1, CICS, ODBC, MQ WebSphere, Enterprise Service Bus (MQ), DB2 Client, MS SQL Server, XML, XSD, XSLT, XPATH, XQUERY, MS Host Integration Server (HIS), ClearCase, ClearQuest, SharePoint, VM Virtual Machine, Service Oriented Architecture(SOA), REST, HTTP, SOAP.

Independent Consultant, Port Hueneme, CA.

10/2011 – 2/2012

Network Support

Service Support activities included software updates, operating Systems Updates/patches, Installation and activation of Virus Software on all workstations, configuring host to connect to various printers, increasing memory capacity, wireless access point installation, switch replace and configuration, on-call support. **Technologies:** DB2 Universal Database (UDB), SQL, UniFlash, XP, VISTA, Linksys routers, CISCO Switch, LAN.

Creative Circle, Los Angeles, CA.

5/2011 – 8/2011

IT Consultant

Service strategy, service design and transition applied to enhance existing Shepherd Hill portal UI (ASP, JavaScript, AJAX), Business Logic (C#) and Database (SQL Server) to solicit and accept donations. Objected oriented methodology applied in analysis, design and integration of program solutions in development of One Seat web site for Shepherd Hills Church. **Technologies:** Windows platform, MS SQL Server 2005 (Stored Procedure, SQL), Server 2007, Visual Studio 2005, 2008 .NET platforms (2.0, 3.5, 4.0, some SOA features), C#, ASP.Net, AJAX, HTML, JAVASCRIPT, CSS, HTTP, SQL, ADO, Shelby ARENA Management System.

State of California, Sacramento, CA.

6/2010 – 7/2010

Senior Analyst

Provide analytical, technical, and support for the Information Systems Division (ITSD), Information Management Architecture Section (IMAS), CAMMIS take over activities. This position has the responsibility of supporting, managing and documenting duties to this effort in relation to problem resolution, FTP's, Web-Site support, and production support. These duties included analysis, design, specifications and testing as well as managing tasks and priorities. This support will directly assist the Infrastructure Support Branch and the Application Support Branch in creating a parallel testing environment for MEDS CAMMIS takeover tasks.

Technologies: MVS ZOS/390, TSO, MVS, and JCL, COBOLII, Wintel environment, FTP technologies, MQSeries, project management, Systems Development Life Cycle (SDLC) and LIVELINK (ECM), Microsoft Office Suite; MS Project ACCESS, EXCEL and WORD, Visio, Object Oriented Design, DB2 Databases.

State of California, Sacramento, CA.

03/2007 – 03/2008

Systems Analyst

Support of state of California, Medicare, Medicaid claims daily information systems (CA-MMIS). CA-MMIS is a Teleprocessing system, management information system which process all Medi-Cal and Medicaid claims submitted by medical providers to the state of California.

- Responsibilities included customer support, problem statement resolution, production daily cycle (24/7) on-call rotational support for cycle, system interfaces, and back-end data stores.
- Problem statement resolution entails any modifications, or enhancements to CA-MMIS, and State of California data transmissions to client's front-end databases.
- Gathering requirement and meeting with user of Medi-Cal, Medicaid system for discussion of required changes.

Technologies: OS390/Zos, TSO/ISPF, VSAM, DYL-280, COBOL 370, CICS, COBOLII, SQL Interface, Basic, JCL, CA-1, CA-7, FTP, PSI, SOL, PLANVIEW, LIVELINK (ECM), Oracle 9, PL/SQL, IBM RACF, Windows XP Professional.

Los Angeles County, Downey, CA.

09/2004 - 06/2006

System Analyst, .NET Solutions Architect

Develop integrated solutions in support of hospital materials management systems (HMMS) within information service division. HMMS is a pharmacy and materials management system used for order encumbrance, procurement orders, and materials management processing.

- Assignments include, enhancements, development for low-unit of measure, just in-time inventory for the stock order process, database manipulation (insert, update, deletion) of procurement orders to back-end database and production support.
- Service design, transition and integration of bi-directional process to transmit procurement orders generated using HTTP 1.1, SOAP Header, XML, Mainframe sockets to transmit documents to Server 2000 platform, for extraction of XML nodes within XML DOM for update to SQL Server (back-end) Database. Installation, configuration, support of testing environment and migration of production components, objects, schemas to 2003 server, SQL 2000 server and VB.net platform.
- Development and enhancement of Visual Basic, ASP, VBScript, Visual Basic.net programs and stored procedures for SQL server back-end database.
- Development of Project Management Plan using MS Project for conversion project.

Technologies: TSO/ISPF, Cobol, Cobol II, 7, CICS, BMS, IMS DB/DL1, IBM RACF, Xpeditor, Microsoft Access, Microsoft Project, Microsoft Visio, MS Server versions: 2000, 2000 Advanced Server, 2003 Server, Microsoft SQL Server 2000, Stored procedures, SQL/TSQL, MS Visual Studio, .NET/VB.NET, OS/390 z/OS JCL, Active Server Page, Visual Basic 6, ADO, VBScript, JavaScript, COM, ODBC, XML, HTTP 1.1, CICS TS, HOSTBRIDGE.

DeVry University, Long Beach, CA

05/2003 – 07/2004

Network Technical Assistant

At DeVry University enrolled in Bachelor of Science in Technical Management program.

- Support the installation, maintenance, troubleshooting of DeVry Network/LAN Infrastructure which included database, servers, Websites, and problem resolution of hardware and software used at Southern California campuses.

Technologies: Microsoft Windows 2000/2003/XP, LAN/WAN, Ethernet Network, System Analysis & Design, vb.net, Visual Basic, ASP, ADO, JAVA, Netware server, Windows 2003 Server, Linux, SQL, DB2 Universal Database (UDB).

CET, Gardena, CA.

01/2003 - 03/2003

Web Designer/Developer

- Object Oriented Methodology applied in the development, and enhancement of Computer Engineer Technology web site.

Technologies: Java 2, JSP, Java SDK, HTML, DHTML, XML, Microsoft Visio, TEXTPAD, Novell Client, Windows XP, MS Access, JDBC, Apache TOMCAT Server, SSL, Windows XP.

State of Hawaii, Honolulu, HI.

05/2001 - 08/2001

Systems Analyst

- Design and development of Logical Database (ERD), System Analysis diagrams (DFD, Flowcharts).
- Synchronized programs to extract data from DB2 back-end database on IBM mainframe and transport back to DEC/VAX which, uploaded to DEC Rdb (back-end database).
- Extracted data used for reporting FELIX system statistics (Linear/Multiple Regression Analysis) in Hawaii schools for Department of Education.

Technologies: DEC/VAX VMS, DEC's Rdb, IBM 30xx, Windows 98, Microsoft Office/Access, MVS/ESA, JCL, TSO, DEC DCL, VAX COBOL, COBOLII, SAS, DB2, SQL, Lotus Notes, SMARTSTAR (RAD).

eGOVnet.com, Inventium,

Honolulu, HI.

06/2000 - 10/2000

Business analysis, Data Analyst/Modeler, Web Developer-Consultant

- SDLC methodology applied in development of Building Permit system portal for the City of Honolulu.
- Logical and physical design of back-end MySQL database.
- The Building Permit Application system is an Internet-based system that allows the entry of Building Permits for the island of Oahu.
- The application consisted of design and development of five components coded in PHP which contained numerous lookups coded HTML to assist users in the processing of Building Permits Applications.
- Client/server-side processing, and generation of XML documents for transmittal to the Host, were also components of this web-based application.
- Installation, configuration of UNIX (FreeBSD)

Technologies: UNIX(Bourne, Korn Shell), DHTML, SSH2, SFTP, XML, Windows 2000, Microsoft Office, PHP4, SQL, Dell Inspiron Notebook Port Replicator III workstation, TELNET SSH, Shell Scripting (unnamed pipes), Linux, MySQL, Apache (HTTP) Server, CGI, XML, Intranet, IBM Mainframe.

Kaiser Permanente of Hawaii, Honolulu, HI

10/1999 - 01/2000

Programmer/Analyst

- Enhancement and development of program specification, documentation, program code, Y2K compliance of Kaiser Membership system

Technologies: Windows 95, 3.1, Microsoft Office/Access, CICS, DB2/SQL, QMF, SPUFI, COBOL, COBOLII, OS/JCL, TSO/ISPF, IBM Utilities, IBM RACF, FILEAID, EASYTRIEVE

Department Of Transportation

02/1999 - 10/1999

Consultant, Washington, D.C.

Independent Validation & Verification technique use to evaluate critical software application for use in the twenty-first century. Certification involves consulting with the system owner and other points of contact to verify the application's role and Y2K compliance. IV & V certification is based on system maturity level. Maturity level is determined by a documentation review of system analysis and planning, system design, testing phases, Quality Assurance, software, hardware restraints, implementation, production, configuration management or independent testing by IV & V specialist. IV & V testing completed on mainframe and DOT intranet for GUI applications. Committee chose two of my documents for presentation to US congress.

Technologies (Windows 95, 98, Microsoft Office/Access, RUMBA Gateway, FTP, CICS, FOCUS, COBOL, ORACLE 9, PL/SQL, Apache Server, TSO, ES9000, Lotus Notes 4.6, PC platform, LIBRIRIAN, PANVALET, ENDEAVOR)

Computer Task Group to Multiple Clients

08/1997 - 08/1998

Consultant, Cincinnati, Ohio

Consultant at Toyota Motor Manufacturing and Cincinnati Bell Information Systems (CBIS). System Development Life Cycle methodology applied in the creation of Toyota Canadian Invoice System. Y2K compliance applied to Toyota Systems for the Year 2000. Enhance AT&T Aggregator Billing system for bundled services including long distance, local, and wireless. Conversion applied to CERTS system into AT&T Card reporting system, and incorporated enhancements into CBIS billing system. **Technologies:** COBOLII, COBOL 370, IMS DB/DC, CA-1, CHANGEMAN, FILEAID, QMF, SPUFI, TSO, DB2, SQL, OS/VS/MVS/JCL, PC platforms, ROSCOE, Windows 95, OS/2, Lotus Notes 4.5, Platinum/DB2

Federal Express

06/1997 - 08/1997

Consultant, Memphis, TN

Conversion of programs to expand date fields for Y2K conformity of FED-EX telecommunication systems.

Technologies: Windows, COBOL, COBOLII, IMS DB/DB1 TSO, ISPF, PANVALET.

Honda of America

02/1997 - 04/1997

Consultant, Maryville, OH

Y2K conversion, migration of mainframe COBOLII programs to MICROFOCUS COBOL programs. Client Scripts developed to extract CICS, COBOLII programs from LIBRARIAN (configuration management library) residing on mainframe, using file transfer protocol, Automation of process expedited project completion. **Technologies:** PC Platform, Rumba gateway, COBOLII, MICROFOCUS COBOL/Workbench, Windows 95, CICS, DB2, SQL, BMS, VB Script.

Uniforce MIS Services to Multiple Clients

02/1996 - 02/1997

Consultant, Birmingham, Alabama

Bell South and Russell Corporation. System Life Cycle Methodology applied in the rotating support (on-call), maintenance and enhancement of Bell South Customer Service System. Reengineering of Russell corporate invoicing system including shipping, receiving, billing and cost accounting systems, for the licensed products division. **Technologies:** IMS DB/DC, DB2, COBOLII, Mainframe gateway, File transfer protocol, Microfocus COBOL/Workbench, CICS, SQL, CA-1, OS/VS, MVS/ESA, Windows 95, JCL, CA-1, FILEAID.

Interim Technology Inc. to Multiple Clients

06/1992 - 02/1996

Consultant, Ft. Lauderdale, Florida

Barnet Bank and American Express (AMEX) Credit Card Service Company. System Life Cycle methodology applied for Barnet Bank direct deposit reporting. AMEX domestic credit card system conversion d to international accounts (European and Asian countries). **Technologies:** PC Platform, OS/2, OS JCL, Windows, TPNS, MS DOS, COBOL, COBOLII, TSO, ISPF, XPEDITER, IMS DL/1/DB, FASTPATH, SQL, FILEAID, BMC).

Multiple Clients

Dallas & Orange, Texas

Dupont Chemical Division, US Sprint and IBM Corporation. Applied system development life cycle methodology to Dupont integrated production system. Conversion of inventory sub-systems from VAX/VMS, DOS/VSE to OS/MVS, VAX COBOL programs to COBOL. Wrote or changed approx. 30 MANTIS programs. SDLC applied in creation of US Sprint order processing systems for 700, 800 and 900-phone service. Logical and physical design of Entity Relational Model for DB2 database; supervise a team of seven Programmer analysts. System Development Life Cycle (SDLC) applied at IBM in the conversion of EXCELERATOR data format to KNOWLEDGEWARE data format. Created DB2 tables and indexes for commission systems demo to extract data from the host and download to PC.

Technologies: (DB2, SQL, CICS, Yourdon, GANES & SARSON, Chen Methodology, COBOL, NATURAL, EXCELERATOR++, KNOWLEDGEWARE IEW/ADW, MANTIS, BTS, FSS, OS/MVS/XA, DEC VAX/VMS, DOS/VSE, DEC DCL, COBOLII, VAX COBOL, Platinum/DB2).

Education & Certification

Keller Graduate School of Management, Long Beach, CA.

Master's program:

- | | |
