+1 (765) 409-4907 | pranayd404@gmail.com | West Lafayette, IN, USA | linkedin.com/in/pranaydas95 | github.com/404-geek

EDUCATION

Purdue University - West Lafayette

Master's, Computer Science

June 2023 - May 2025

GPA: 3.3

- Network Security (Padding Oracle attacks, Cryptography)
- Software Security (Reverse Engineering, Linux Security)
- Experienced in reading memory and extracting critical information (EIP, EBP, ESP addresses)
- Familiarity with analyzing and utilizing registers to understand and manipulate program execution
- Knowledgeable in implementing NOP sleds and stack canaries for redirecting program execution
- Conducted XSS attacks, injecting malicious iframes and form elements into web pages
- Leveraged XSS vulnerabilities to execute code in the context of other users' browsers
- Attacked authenticated sessions, sending user data to a malicious server for unauthorized session.

Sambalpur University

Bachelor's, Computer Science

August 2013 - April 2017

GPA: 3.5

CERTIFICATIONS

CompTIA Security+ SY0-501

PROFESSIONAL EXPERIENCE

Eli Lilly and Company

Software Developer

Remote

October 2024 - December 2024

- Incorporated Thomson Reuters Legal Tracker APIs into Eli Lilly's legal systems, ensuring secure and efficient compliance workflows.
- Designed AI-driven tools to summarize legal documents, helping lawyers and analysts quickly extract key insights.
- Constructed and fine-tuned backend services on AWS, enhancing scalability, reliability, and performance.
- Automated API connections to automate legal processing and improve operational efficiency.

Google Summer of Code

Open Source Software Developer

Remote

May 2024 - August 2024

- Contributing to AboutCode Scancode.io Vulnerability analysis tool to enhance SBOM data using OpenSSF
- Project Proposal - <https://summerofcode.withgoogle.com/programs/2024/projects/kB8HkEli>
- Completion Report - https://aboutcode.readthedocs.io/en/latest/archive/gsoc/reports/2024/scancodeio_scorecode_pranay.html

Instoried

Backend Developer

Bengaluru, Karnataka, India

August 2019 - May 2023

- Led engineering efforts at Instoried, driving growth and securing three funding rounds, resulting in a 150% valuation increase.
- Devised a seamless transition to a subscription model, acquiring over 100,000 paid users and achieving profitability.
- Innovated payment features and created coupon code marketing, streamlining onboarding processes.
- Revamped backend architecture for scalability, ensuring efficient service delivery.
- Orchestrated end-to-end development of Flask and FastAPI microservers for a robust backend.
- Facilitated exposure of Deep Learning Algorithms developing NVIDIA GPUs, boosting core functionalities.
- Orchestrated containerized deployment via Jenkins, optimizing efficiency and cutting down costs by 50%.
- Built a resilient payment infrastructure, resulting in an 80% increase in transaction throughput and revenue.

KaptureCRM

Software Developer/Backend Engineer

Bengaluru, Karnataka, India

January 2019 - May 2019

- Engineered a critical microservice, seamlessly ingesting social feeds into the CRM system as tickets.
- Combined 50+ REST connectors across diverse platforms (Shopify, Facebook, Instagram, 99acres).
- Improved data management capabilities by 25%, leveraging Spring Boot and Mongo ORMs (NoSQL) for serialization and deserialization

PROJECTS & OUTSIDE EXPERIENCE

Compliance Checker

Freelance Software Developer (Novo Nordisk)

India

2022 - 2023

- Innovated and eliminated manual document checks, yielding a remarkable 70% boost in productivity.
- Designed cutting-edge automation technology, reducing error rates to an impressive 3% and ensuring precise compliance.
- Streamlined a proprietary algorithmic system, resulting in a 70% reduction in compliance check time.
- Elevated user experience with a 90% decrease in response time for notifications.
- Developed a high-performance web service using Golang gin framework, scaled for a million requests/second.

KYC Portal

Freelance Software Developer (Natixis Investments)

Bengaluru, KA, India

2020 - 2023

- Achieved a 20x increase in productivity by consolidating KYC processes into a user-friendly portal.
- Conceptualized and executed the KYC portal, streamlining processes and reducing operational overhead by 30%.
- Spearheaded FastAPI project development, focusing on AML and fraud analysis and React.
- Utilized a robust ML engine, diminishing manual KYC processing time by 70%.
- Engineered an in-house PDF generation system, reducing turnaround time by 80% using Node.js, Next.js
- Seamlessly integrated third-party bank systems (Orbis, Worldcheck by Refinitiv, Moody's Compliance check) for enhanced operational efficiency.

SKILLS

Skills: AWS, Celery, Apache Kafka, Computer Networking, Django, Docker, Elasticsearch, Flask, Jenkins, Git, Java, MySQL, Postgres, Postman, REST APIs, Kubernetes, Python, FastAPI, Next.js, S3, Node.js, Terraform, Lambda, MongoDB, Networking, Jenkins, NumPy, Pandas, Flask, Django, Microservices, REST, C/C++, gRPC, Elasticsearch, GraphQL, kubernetes, Redis, Dynamodb, CI/CD, Cassandra, Agile, SQL, NoSQL
