

PRASANNA M

prass.java@gmail.com| (817)479-1418|LinkedIn: www.linkedin.com/in/prass

SUMMARY:

- Overall 5+ years of experience in software development with a strong focus on **Java technologies and frameworks**.
- Developed responsive UI using **ReactJS, HTML, CSS, and JavaScript**, ensuring cross-browser compatibility and seamless user experience.
- Developed scalable and responsive web applications using **Angular 8+**, integrating RESTful APIs and optimizing performance with lazy loading and **state management (NgRx/Redux)**.
- Implemented secure authentication (**JWT, OAuth2**) and real-time data updates using **WebSockets**, enhancing user experience and system security.
- Built reusable React components and optimized performance using **React Hooks, lazy loading**, and memoization.
- Implemented Power BI integration within React applications **for real-time data visualization**.
- Designed mobile-first and accessible interfaces using **CSS Flexbox, Grid, and Media Queries**, ensuring **WCAG/ADA** compliance.
- Integrated **MSAL authentication and JWT-based security**, enhancing front-end security and user authentication.
- Consumed and integrated **RESTful APIs using Axios** and Fetch API, ensuring smooth data communication with back-end services.
- Expertise in **Java, Spring Boot, and Java EE**, building scalable, high-performance applications.
- Proficient in **Object-Oriented Programming (OOP)** principles and design patterns (Singleton, Factory, Observer, Strategy).
- Extensive experience with Spring Framework, including **Spring Boot, Spring MVC, Spring Security, and Spring Cloud** for enterprise applications.
- Strong knowledge of **Java Persistence API (JPA)** and **Hibernate** for efficient ORM-based database interactions.
- Skilled in **SQL, PL/SQL**, and optimizing complex database queries.
- Experience in Microservices architecture using **Spring Boot and Spring Cloud**.
- Proficient in developing **RESTful APIs** and consuming **SOAP web services (JAX-WS, JAX-RS)** for seamless integration.
- Expertise in **unit testing (JUnit, Mockito)** and **Test-Driven Development (TDD)** practices.
- Strong understanding of CI/CD pipelines using **Jenkins, GitLab CI, GitHub Actions, and Docker**.
- Hands-on experience with **Git (GitHub, GitLab)** for version control and collaboration.
- **In-depth knowledge of JVM internals**, memory management, garbage collection, and performance tuning.
- Experience with **Docker and Kubernetes** for containerization and cloud deployment.
- Skilled in **IDE tools (Eclipse, IntelliJ IDEA, NetBeans)** and build tools (**Maven, ANT**).

TECHNICAL SKILLS:

Programming Languages: Java, Python, SQL, PL/SQL, Socket Programming

Frameworks: Spring Boot (v2.5+), Spring MVC, Spring Cloud, Spring Security, JPA (Jakarta Persistence API), EJB, Hibernate 5+, iBatis, JMS

Web Services: SOAP, JAX-RS (Jakarta RESTful Web Services), JAX-WS, RESTful Web Services, Microservices Architecture with Spring Cloud, Spring Boot

Testing Tools: JUnit 5, Mockito

Databases: Oracle 19c+, MySQL 8+, PostgreSQL 13+, DB2

Version Control: Git (GitHub, GitLab)

IDE Tools: Eclipse (2022-09+), NetBeans 12+, IntelliJ IDEA 2022+, Maven 3.x+, ANT, Spring Tool Suite (STS)

Web/App/DB Servers: IBM WebSphere 9.x+, WebLogic 14.x+, Apache Tomcat 10.x+, JBoss EAP 7.x+

PROFESSIONAL EXPERIENCE:

Java Developer

Client: **Henry Ford Health System (Detroit, MI)**

June 2023-Present

- Developing backend services for the healthcare system using **Java and Spring Boot**, ensuring secure handling of patient data.
- Developed and maintained **ReactJS** components for patient portals, improving user experience and accessibility for healthcare services.
- Integrated **Power BI dashboards into React applications**, enabling real-time visualization of medical and operational data.
- Optimized UI performance by implementing **React Hooks** and Context API, reducing page load time by X%.
- Developed responsive and dynamic web applications using **Angular 8+**, improving user experience and application performance.
- Built modular, reusable components and services using **RxJS** and **Angular Material**, enhancing maintainability and reducing development time by 20%.
- Integrated **RESTful APIs and GraphQL** with Angular services, ensuring seamless communication between frontend and backend.

- Implemented state management using **NgRx and Redux**, improving data flow consistency and reducing unnecessary API calls.
- Collaborated with **UX/UI designers** to enhance the usability of digital healthcare solutions, ensuring compliance with **HIPAA** and accessibility standards.
- Designed and developed scalable microservices using **Node.js** and **Express.js**, improving system modularity and maintainability.
- Built and optimized **GraphQL APIs**, enabling flexible data retrieval and reducing over-fetching by 35%.
- Developed asynchronous event-driven applications using **Kafka and RabbitMQ**, enhancing system responsiveness.
- Designing and implementing microservices architecture with **Spring Cloud, improving scalability and reliability.**
- **Developed RESTful APIs using Spring Boot** for seamless data interaction between healthcare systems and third-party applications.
- **Integrated JPA** and Hibernate with Oracle and MySQL databases for efficient data management.
- Implemented Spring Security for **role-based access control (RBAC)** and **OAuth2 authentication** to ensure data security.
- Migrated legacy healthcare applications to microservices architecture using **Spring Cloud and Docker.**
- **Deployed microservices on AWS**, ensuring high availability and fault tolerance.
- **Developed SOAP web services** for integration with third-party vendors and external healthcare systems.
- Optimized application performance by tuning JVM parameters, reducing response time in real-time services.
- Automated CI/CD pipelines using **Jenkins, Docker, and Kubernetes**, streamlining deployment.
- Ensured high test coverage with **JUnit and Mockito**, following Test-Driven Development (TDD).
- Implemented monitoring solutions with **Spring Actuator** for system health tracking and issue detection.
- Collaborated with frontend teams (**Angular 13+**) to provide APIs for integration.
- **Participated in Agile methodologies (Sprint Planning, Standups, Retrospectives)** for efficient teamwork.
- Refactored legacy code for improved maintainability and performance optimization.
- Designed database schemas and wrote **PL/SQL** stored procedures for handling large datasets efficiently.
- Resolved production issues related to database performance, security, and **high traffic using advanced debugging tools.**

Java Developer

Client: **Trustmark Bank (Jackson, Mississippi)**

Dec 2020 – July 2022

- Designed and implemented banking applications using **Java and Spring Boot**, ensuring secure transaction processing.
- **Developed backend microservices** for financial transactions, integrating them with **RESTful APIs and front-end systems.**
- Designed and developed responsive **ReactJS** applications for online banking platforms, improving customer engagement and transaction efficiency.
- **Implemented MSAL (Microsoft Authentication Library)** for secure authentication and **Single Sign-On (SSO)** across banking services.
- Developed responsive and dynamic web applications using Developed custom directives and pipes to enhance UI interactivity and data transformation.
- Improved application performance optimization using **lazy loading**, onPush change detection, and Webpack optimizations, reducing load time by 30%.
- Enhanced form handling with **Reactive Forms and Template-Driven Forms**, ensuring robust validation and better UX.
- Implemented authentication and authorization using **JWT and OAuth2**, securing frontend access control.
- Integrated real-time updates using **WebSockets and SignalR**, improving live data processing in banking and healthcare applications
- Enhanced security by integrating **JWT-based authentication** and **role-based access control (RBAC)** within front-end applications.
- Developed reusable React UI components following **WCAG** accessibility guidelines, ensuring compliance with banking industry standards.
- Optimized complex **PL/SQL queries** for banking transactions and data reporting.
- **Implemented Spring Security** for authentication and authorization, protecting sensitive customer information.
- Built and maintained **JAX-WS and SOAP web services** for external financial system integrations.
- Contributed to **microservices architecture** adoption using Spring Cloud for scalability.
- **Used JUnit and Mockito for unit testing** business-critical components.
- Assisted in developing automated testing frameworks with **TestNG** and Selenium WebDriver.
- Implemented CI/CD pipelines using **Jenkins, Docker, and GitLab CI.**
- **Worked with database teams to optimize SQL** queries and improve transaction-heavy banking applications.
- Designed and implemented back-office systems for daily banking operations.
- **Integrated AWS cloud services** for backend infrastructure and deployments.
- Integrated **Node.js** applications with **AWS services (Lambda, S3, SQS)**, ensuring seamless cloud-native deployments.
- **Used Git for version control** and team collaboration.
- Developed a real-time transaction alert system using **JMS and Spring Integration.**

- **Managed transactional consistency in Spring** for banking operations.
- Assisted in migrating legacy banking systems to **Spring Boot-based microservices**.
- Worked in an Agile environment, participating in **sprint planning and standups**.
- Mentored junior developers in Java and best coding practices.
- Optimized application performance by profiling and improving database queries.
- Enhanced the bank's fraud detection system with efficient **JPA models** for tracking suspicious activities.

Java Developer

Jan 2019 – Dec 2020

Client: Emirates (New York)

- Developed backend services for flight reservation and booking systems using **Java and Spring Boot**, ensuring smooth operations for both customers and internal teams.
- **Designed and implemented highly available RESTful APIs** to integrate various Emirates customer-facing systems (website, mobile apps) with backend systems.
- Led the migration of legacy monolithic systems to microservices using **Spring Cloud, ensuring scalability for handling peak travel seasons**.
- **Implemented JAX-RS services** to expose travel data for internal consumption and integration with third-party travel partners.
- Optimized the booking system's performance by **integrating JPA and Hibernate**, managing large volumes of flight and customer data.
- Ensured customer data security and privacy through Spring Security by implementing **OAuth2** for user authentication and authorization.
- **Worked with PL/SQL** to optimize stored procedures and scripts for handling booking data and inventory management.
- **Integrated AWS services** for deploying and scaling microservices in the cloud environment.
- **Used JUnit and Mockito for unit testing** various functionalities of the backend services, ensuring that all code met high-quality standards.
- Worked with cross-functional teams to implement and deploy continuous integration and continuous delivery (**CICD**) using **Jenkins and Docker**.
- **Designed and developed backend services** for baggage handling systems, flight schedules, and customer profiles.
- **Integrated SOAP web services** for communication with external airlines and airport systems for seamless flight information sharing.
- Mentored junior developers in **Java programming, Spring best practices, and software design patterns**.
- Provided detailed documentation for APIs, ensuring external partners could easily integrate with **Emirates' backend systems**.
- Contributed to system optimizations, reducing API response times by 30% during peak traffic times.
- Helped resolve critical production issues by **debugging code using Eclipse and IntelliJ IDEA**.
- Collaborated closely with product teams to define and implement new features related to customer experience and flight booking.
- **Implemented transaction management in Spring** to ensure that financial transactions and bookings were processed reliably.
- **Participated in Agile development methodologies**, working in 2-week sprints and delivering features on time and with minimal bugs.
- Contributed to the modernization of the **entire flight reservation system**, making it more responsive and adaptable to changes in the airline industry.

EDUCATION:

Masters in Computer and Information Sciences
Texas A&M University

AUG 2022-MAY-2024
Commerce, TX, USA

CERTIFICATIONS:

AWS Certified Developer
