

Name: Pravalika Mukkera
Full Stack .Net Developer
Email: pravalika.work64@gmail.com
Mobile: +1 6827774139

Professional Summary:

- Over **4+ years** of experience in .NET development, specializing in C#, ASP.NET Core, and MVC frameworks, with expertise in Object-Oriented Programming (OOP), Service-Oriented Architecture (SOA), and Dependency Injection.
- Proficient in database design techniques, including RDBMS, Document Databases, Star Schema, and Kimball Model, with hands-on experience in SQL Server, Oracle, and NoSQL databases like Cosmos DB.
- Extensive experience with cloud services such as Microsoft Azure (VMs, Blob Storage, Cosmos DB, Data Factory, SQL Data Warehouse, ARM Templates) and AWS (EC2, S3, Kinesis), ensuring scalable and reliable cloud-based solutions.
- Skilled in distributed computing and real-time data processing using tools like Apache Kafka, Spark, and Azure Event Hubs.
- Expertise in Microservices architecture and RESTful API development using .NET API Core, Entity Framework, Swagger, and OData, ensuring seamless integration between distributed systems.
- Proficient in CI/CD pipelines, leveraging tools like Jenkins, Docker, Kubernetes, and OpenShift for automated build, test, and deployment processes.
- Strong experience with front-end development frameworks such as Angular, React, Vue.js, ASP.NET MVC, HTML5, CSS3, and JavaScript, creating responsive and user-friendly interfaces.
- Advanced understanding of software development tools and research methodologies, with a focus on delivering high-quality, scalable, and maintainable solutions.
- Proven ability to work in Agile/Scrum environments, collaborating with cross-functional teams to deliver projects on time and within budget.
- Strong problem-solving skills, with the ability to analyze complex technical challenges and implement effective solutions.
- Excellent technical communication skills, with the ability to convey complex ideas to both technical and non-technical stakeholders.
- Experience with big data processing and real-time streaming analytics, leveraging tools like Apache Kafka and Spark.
- Familiarity with data warehousing architecture, including ETL processes and source-to-target mappings.
- Strong attention to detail and customer focus, ensuring the delivery of high-quality software that meets business requirements.
- Proven ability to prioritize workload and work effectively under tight deadlines, both independently and as part of a team.

Technical Skills

Languages	C#, ASP.NET Core 2.0,
.NET Technologies	ASP.NET Core, Web API, LINQ, ADO.NET, Entity Framework, Web Services, .Net Framework 3.5 and 4.5, .Net 6, 7 and 8
Programming Languages	TypeScript, Java Script, C#, C, SQL, T-SQL
Web Technologies	Angular 14, HTML/HTML5, CSS/CSS3, SCSS, XHTML, XAML, JavaScript, Bootstrap, Blazor, React.js, jQuery, AJAX, JSON, XML
ORM	Entity Framework 4.0/5.0.0/6.0/Core.
Cloud Technologies	Azure App Service, Azure Functions, Azure SQL Database, Azure Storage, Azure Service Bus
Methodologies	SDLC, Agile Development, Waterfall Development.
Version Control Tools	Visual Source Safe, Team Foundation Server (TFS), Tortoise SVN, Git, Bitbucket, JIRA.
Databases	SQL Server 2008 R2/2012/2014, My SQL, PL/SQL, Cosmos DB, MongoDB.
Containerization	Docker
Message Queuing	RabbitMQ, Apache Kafka
Design Patterns	MVVM, Abstract Factory, MVC, MVP, Singleton, Repository, Factory, Singleton, Dependency Injection
Testing Frameworks	NUnit, xUnit, MSTest
Other Tools	Visual Studio 2019/2022, Visual Studio Code, Docker, Kubernetes, Swagger, Postman

Education:

Master's in Computer Science from Lindsey Wilson College, Columbia, Kentucky

Professional Experience:

Client: GEICO, Chevy Chase, MD

July 2023 – Present

Role: Full Stack .NET Developer

Roles and Responsibilities:

- Designed and developed Hybrid-Single Page Applications (SPAs) using C# 8.0, .NET Framework 4.8, ASP.NET MVC 5, and React 14+, ensuring a seamless user experience across devices.
- Integrated SOAP APIs from enterprise systems and developed RESTful APIs for internal applications, enabling efficient data exchange between services.
- Played a key role in feature implementation, code refactoring, and bug fixing, adhering to Agile methodologies to deliver high-quality software in iterative sprints.
- Enhanced the UI/UX design using Master Pages in MVC 5, along with modern web technologies like HTML5, Bootstrap, Blazor, and CSS3, to create responsive and visually appealing interfaces.
- Published and deployed applications and services through Microsoft Azure, leveraging Azure App Services and Azure Functions for scalable and reliable cloud hosting.
- Implemented JavaScript, VB.NET, C#, and React JS for client-side interactivity and API integration, adopting a Responsive Design approach to ensure compatibility across devices.
- Integrated Azure Cloud PaaS for running scheduler tasks, automating background processes, and improving application performance.
- Developed and maintained a SaaS platform that provides healthcare solutions to enterprise clients, ensuring high availability and scalability.
- Utilized React JS for client-side scripting, along with JavaScript and jQuery, to build modular and reusable UI components, facilitating efficient collaboration within the development team.
- Implemented Apache Kafka as a message queue to enable reliable asynchronous communication between microservices, enhancing the platform's real-time data processing capabilities.
- Provided database connectivity using Entity Framework 6.0 and LINQ, designing stored procedures and views to optimize data retrieval and manipulation.
- Deployed the web-based platform on Azure cloud services, enhancing online presence and improving customer engagement through scalable and secure hosting.
- Utilized Google Cloud Platform (GCP) Cloud Storage for storing and managing unstructured data, integrating it with applications to provide reliable data storage solutions.
- Customized Microsoft Dynamics 365 solutions to streamline business processes, enhance customer engagement, and improve data management for enterprise clients.
- Conducted unit testing using NUnit and participated in code reviews, builds, and deployments with Git and Jenkins, ensuring high code quality and seamless integration.

Environment: .NET 5, ASP.NET 4.5, .NET Core 3.0, MVC 5, Angular JS, Windows 10, Azure, Visual Studio 2019, GitLab, TFS, SQL Server 2019, JSON, Web API, AJAX, Bootstrap, Cosmos DB, PostgreSQL, Swagger, XML, Active Directory, IIS 8.0, jQuery, CSS, HTML5, SOAP, LINQ, JavaScript.

Client: Wells Fargo, India

Oct 2020 to July 2021

Role: Full Stack .NET Developer

Roles and Responsibilities:

- Worked in an Agile Scrum environment, delivering accepted functionality in each sprint and collaborating with cross-functional teams to meet project goals.
- Designed and developed Hybrid-Single Page Applications (SPAs) using C# 5.0, .NET Framework 4.5, ASP.NET MVC 5, and AngularJS 14, ensuring a seamless user experience.
- Integrated SOAP APIs from enterprise systems and developed RESTful APIs for internal applications, enabling efficient data exchange between services.
- Enhanced the UI/UX design using Master Pages in MVC 5, along with modern web technologies like HTML5, Bootstrap, CSS3, and TypeScript, to create responsive and visually appealing interfaces.
- Published and deployed applications and services through Microsoft Azure, leveraging Azure App Services for scalable and reliable cloud hosting.

- Integrated Azure Cloud PaaS for running scheduler tasks, automating background processes, and improving application performance.
- Utilized AngularJS and JavaScript to develop templates, controllers, and directives, creating dynamic and interactive user interfaces.
- Created intuitive and flexible user interfaces using Angular 7, ensuring a seamless user experience across devices.
- Used RequireJS to dynamically load ASP.NET bundles, optimizing application performance and reducing load times.
- Provided database connectivity using Entity Framework 6.0 and LINQ, designing stored procedures and views to optimize data retrieval and manipulation.
- Contributed to data migration from Oracle DB to SQL Server using PL/SQL and T/SQL, ensuring data integrity and consistency during the migration process.
- Generated data migration and transformation using SSIS and built reports with SSRS, providing valuable insights to stakeholders.
- Used OWIN interface to decouple server and application, improving modularity and maintainability of the codebase.
- Implemented JSON web tokens (JWT) for secure user authentication and information exchange, ensuring data security and privacy.
- Conducted unit testing using NUnit and participated in code reviews, builds, and deployments with Git and Jenkins, ensuring high code quality and seamless integration.

Environment: C.Net, ASP.Net, WCF, HTML, DOM, SQL Server 2005, OOPs, ADO.NET, LINQ, Angular, JavaScript, AJAX, SOAP, Azure, Web Services, SSRS, Agile, IIS, Entity Framework, Telematics, ADI, Factory Design Patterns, Crystal Reports, CVS, Windows Vista, Dependency Injection, Spring.NET, NUnit.

Client: Health kart, India

July 2019 to Sep 2020

Role: .NET Developer

Responsibilities:

- Involved in requirement gathering, analysis, and design by reverse engineering the existing application, ensuring a clear understanding of business needs.
- Created user controls and custom controls using C# and ASP.NET, building reusable components to enhance application functionality.
- Developed ASP.NET (MVC) applications using C#, leveraging the MVC framework to create scalable and maintainable web applications.
- Worked with advanced concepts of ASP.NET Core MVC, including Models, Providers, and Filters, to build robust backend systems.
- Utilized C# features like generics, delegates, events, extension methods, and lambda expressions to write clean and efficient code.
- Designed N-Tier architecture using C#.NET, applying object-oriented programming techniques like inheritance and interfaces to build modular systems.
- Worked on AWS cloud activities, including EC2 instances, active directory integration, and app services, to deploy and manage cloud-based applications.
- Used ASP.NET Data Grid, Data List, and Repeater controls to display data in a clear and organized format, improving user experience.
- Created intuitive and flexible user interfaces using React and HTML5, CSS3, ensuring a seamless user experience across devices.
- Consumed WCF Services for real-time data communication between integrated servers and client applications, ensuring data consistency and reliability.
- Developed web applications using ASP.NET MVC, Web API, and Entity Framework (EF) in Visual Studio, ensuring efficient data access and manipulation.
- Used ASP.NET Validation Controls for server-side validation, ensuring data integrity and preventing invalid inputs.
- Performed DOM manipulations and created templates, directives, and controllers using Angular JS, enhancing the interactivity of web pages.
- Utilized LINQ to Entities for data retrieval, querying, and manipulation, ensuring efficient data access and processing.
- Worked in an Agile, SCRUM environment, using TFS for version control and project management, ensuring timely delivery of high-quality software.

Environment: .Net 4.7, ASP.NET, C#.NET, ADO.NET, WCF, XAML, MVC, Entity Framework, AWS, Razor, Visual Studio, HTML5, CSS3, JavaScript, DOM, Angular 7, LINQ, SQL, TFS, Agile, Windows.
