

Praveen Reddy

.NET Full Stack Developer
Denver, CO 80014
praveenreddych97@gmail.com
(720) 687-4610

Professional Summary

Over 6 years of progressive experience in analysis, design, implementation, and integration of enterprise applications using Microsoft technologies including C, ASP.NET, .NET Core, VB.NET, MVC, Blazor (Server/WASM), Angular, and Azure. Proficient in building high-performing web, desktop, and cloud applications with a strong focus on maintainability, performance, and scalability. Experienced in Agile development with cross-functional teams including Product Owners and Quality Assurance Engineers. Skilled in mentoring, code reviews, CI/CD automation, Kubernetes orchestration, and cloud-native application delivery. Strong communicator and collaborative team player with a proven track record in cross-team knowledge sharing and end-user communication.

Technical Skills

Languages: C, VB.NET, T-SQL, PL/SQL

Web Technologies: ASP.NET, ASP.NET MVC, WebAPI, Entity Framework Core, Bootstrap, jQuery, HTML5, CSS3, JavaScript, AJAX

UI Technologies: WinForms, WPF, React.js, AngularJS, Node.js, MAUI, Web Application Frameworks

Cloud Platforms: Azure (Azure Cloud, Functions, Logic Apps), AWS

IDEs/Tools: Visual Studio, SQL Server Management Studio, JetBrains Rider

Databases: SQL Server, MS Access, Oracle, PostgreSQL, Redis

Reporting Tools: SSRS, SSIS

Version Control: Git, Azure DevOps, TFS, Bitbucket

Middleware/Frameworks: WCF, ADO.NET, NHibernate, LINQ, gRPC, SignalR

DevOps/Containerization: Docker, Kubernetes, Azure DevOps CI/CD Pipelines

Testing: xUnit, NUnit, Unit Tests (>75% coverage), Test Automation

Other: Mobile App Store Deployment, Collaboration, Communication, Innovation, Self-Starter, Code Review, Product Owner Interaction, Mentorship, Microservices Architecture, Integration Patterns

Professional Experience

Lemonade, NY

Sep 2023 – Present: *Full Stack .NET Developer*

- Developed enterprise applications using Blazor Server/WASM with Razor components.
- Implemented real-time communication using SignalR and integrated with Web API.
- Designed modern UI with Angular, Bootstrap, and JavaScript.
- Built distributed services using Azure Functions, Logic Apps, and Cosmos DB.
- Migrated SQL Server databases and implemented SSRS/SSIS solutions.
- Collaborated with Product Owners and QA Engineers; conducted mentorship and code reviews.
- Developed and deployed mobile-compatible web apps and explored MAUI integration.
- Integrated Blazor WASM with modern authentication and microservices.
- Participated in mobile app deployment planning and App Store requirements.
- Used C and .NET Core extensively for backend APIs and microservices.
- Built reusable component libraries using Razor and optimized frontend bundle size.
- Automated workflows and integrated test validations in Azure DevOps pipelines.
- Guided junior developers through code quality reviews and pair programming.
- Worked collaboratively across multiple scrum teams to align system architecture.
- Integrated cross-platform microservices and backend APIs for seamless functionality.

Wells Fargo, San Francisco, CA

May 2022 – Aug 2023: *Full Stack .NET Developer*

- Developed Angular SPA integrated with ASP.NET MVC and Web API.
- Utilized Azure Monitor, Log Analytics, and Application Insights for performance tracking.

- Managed CI/CD pipelines using Azure DevOps and Docker containers.
- Implemented RBAC, AAD Authentication, and PostgreSQL backend.
- Conducted unit tests with coverage exceeding 75%; enforced code review process.
- Led Kubernetes deployment strategy for scalable microservices.
- Worked with Redis caching and SignalR for real-time messaging in transactional services.
- Contributed to C architecture improvements and codebase modernization.
- Delivered mobile-first UI views based on Product Owner mockups.
- Contributed to collaborative solutioning in sprint ceremonies and refinement meetings.
- Designed resilient background workers to handle asynchronous processing queues.
- Led mentorship initiatives for cross-functional technical training.
- Drove integration initiatives between cloud and on-premises systems.

Experion Technologies, India

Jul 2018 – Dec 2020: *.NET Developer*

- Built and maintained enterprise web services using MVC and WebAPI.
- Migrated legacy systems to AWS with services like DynamoDB and S3.
- Designed modular components in Angular and JavaScript for reusability.
- Participated in Agile sprints, peer code reviews, and implemented test cases using NUnit.
- Researched and integrated Kubernetes for container orchestration and deployment.
- Led feature delivery for a mobile-first solution using .NET backend and Blazor front-end.
- Mentored junior developers on Git workflows, best practices, and Azure DevOps.
- Supported mobile app deployment processes for Android/iOS via store guidelines.
- Wrote automated test suites and contributed to continuous integration best practices.
- Documented integration design patterns to ensure reusable and scalable implementation.
- Built and published applications to Google Play Store and Apple App Store.

Education

Master's in Computer Science, University of Colorado Denver
