PROFESSIONAL SUMMARY

Results-driven **Senior Linux Administrator** with **7+ years** of experience managing and optimizing Linux environments in enterprise settings. Expertise in **RHEL, CentOS, Ubuntu**, cloud platforms (**AWS, OpenStack**), system performance tuning, security hardening, and automation using **Ansible**. Adept at deploying **Docker containers**, managing **server infrastructure**, and ensuring **high availability and system reliability**. Proven ability to handle **L2/L3 incident response**, troubleshoot system issues, and optimize IT operations. Successfully reduced system downtime and improved operational efficiency through proactive monitoring and automation. Seeking a challenging role to leverage deep expertise in **Linux administration and cloud computing**.

CORE SKILLS & COMPETENCIES

- **Linux Administration:** RHEL, CentOS, Ubuntu
 - **Cloud Computing:** AWS (EC2, S3, IAM), OpenStack
 - **Automation & Configuration Management:** Ansible, Shell Scripting
 - **Containerization & Virtualization:** Docker, VMware, KVM
 - **Security & Compliance:** Firewall Management, Intrusion Detection, Encryption, LDAP, User Authentication, Security Hardening
 - **Networking & Troubleshooting:** TCP/IP, DNS, DHCP, SSH, FTP, VPN, Firewall Configuration
 - **Monitoring & Incident Response:** Zabbix, Nagios, Prometheus, Grafana, ELK, PagerDuty
 - **Storage Management:** LVM, RAID, NFS, Samba
 - **IT Service Management (ITSM):** ITIL Framework, ServiceNow, JIRA
 - **Patch Management & System Optimization**
-

CERTIFICATIONS

- **Red Hat Certified Engineer (RHCE) – RHEL 7**
 - **Red Hat Certified System Administrator (RHCSA) – RHEL 7**
-

PROFESSIONAL EXPERIENCE

Senior Linux Administrator

Santander | Oct 2023 – Present

- Manage **RHEL, CentOS, and Ubuntu servers** in production and enterprise environments, reducing unplanned downtime by implementing proactive monitoring solutions.
- Perform **system troubleshooting, patching, user access control, and security compliance**, successfully resolving an average of **40+ incidents per month**.
- Optimize storage solutions using **LVM and RAID**, improving data retrieval efficiency.
- Deploy **Docker containers**, reducing application deployment time by **30%**.
- Automate configuration management using **Ansible**, streamlining system setup and reducing manual interventions.
- Monitor system health using **Dynatrace, Grafana, and PagerDuty**, ensuring **99.9% uptime**.
- Manage **AWS (EC2, S3, IAM) and OpenStack**, optimizing resource utilization and cost efficiency.

Systems Administrator

American Express (AMX), Alcon | Dec 2021 – Aug 2022

- Administer **300+ Linux servers**, ensuring optimal system performance and security.
- Conduct security patching and OS upgrades (**RHEL 7.6 to RHEL 8.1**), mitigating vulnerabilities and ensuring compliance.
- Deploy and manage **Docker containers**, accelerating test environment provisioning by **50%**.
- Provide **on-call support**, successfully handling **90% of critical incidents within SLA timeframes**.
- Implement firewall rules and security policies, enhancing system protection against unauthorized access.

IT System Analyst

NS2 (National Security Services) | Jun 2020 – Dec 2021

- Manage **600+ RHEL 6.x/7.x servers**, ensuring stability and compliance with security policies.
- Automate system maintenance tasks using **cron jobs and shell scripting**, improving efficiency.
- Monitor system health using **Nagios**, reducing unplanned outages by **20%**.
- Develop **Ansible playbooks** for automated system configurations, enhancing operational consistency.
- Configure **firewall rules and VPN connectivity**, strengthening network security.

System Engineer - Linux

Airbus | Nov 2019 – May 2020

- Assist in **server installations, patch management, and performance optimization.**
- Utilize **Zabbix, Prometheus, and Grafana** for infrastructure monitoring, improving issue detection rates.
- Manage **Docker deployments**, optimizing application development and deployment workflows.
- Implement **firewall configurations** and security patches, reducing potential vulnerabilities.

System Engineer - Linux

Rakuten Marketing | Sep 2016 – Oct 2019

- Manage **800+ Linux servers**, ensuring high availability and security.
- Configure **LDAP for user authentication** and implement **firewall security policies**, reducing unauthorized access risks.
- Conduct **server backups, performance tuning, and storage optimization**, improving infrastructure resilience.
- Deploy and maintain **Docker containers**, streamlining development environments.
- Troubleshoot **TCP/IP network connectivity issues**, resolving system outages efficiently.

EDUCATION

B.Tech in Computer Science Engineering

Swarnandhra College of Engineering and Technology | **May 2016**

ADDITIONAL INFORMATION

- Open to **relocation and remote opportunities.**
 - Passionate about **Linux administration, cloud computing, IT security, and automation.**
-
