Professional Summary

Performance-driven, innovative professional with 25+ years of experience in application support, testing, and development, with emphasis on supporting applications running for federal clients. Skilled in SDLC, Selenium, Git, and Agile DevSecOps delivery with proven success in test planning, system reliability, automation script development, and leading collaborating with quality assurance teams. Eager to contribute to a forward-thinking team in an innovative company, aiming to leverage my experience to tackle complex challenges, and achieve strategic goals with quality performance in a role that bridges Systems Analyst, Linux Engineer, Linux Administrator, DevOps Engineer, and Cloud Engineer responsibilities.

Skills

• Selenium • Test automation • Jenkins • Git • GitHub • CI/CD • SQL • Agile software development • Software testing • SDLC • QTP • Test case design • Test Planning (Quality assurance practices) • Performance testing • Software troubleshooting • Test cases • Analysis skill • Java • JMeter • INFOConnect • SOAPUI • Integration Performance Tester • IBM Engineering Test Management • IBM Rational Functional • Debugging • EWM • Pegasus

Professional Experience

Department of Treasury/IRS – Lanham, MD

Information Technology Specialist (Systems Analysis & Testing) | 02/2022 – 09/2025

Supervisor: Brian Rossell (610-861-5659)

- Lead analyst, technical support, and software tester for the Automated Lien System (ALS) & ENTITY, utilizing SDLC and Agile methodologies for quality assurance.
- Developed and executed automated test scripts, manual test scripts including test planning, test case design, regression testing for system release, 30% reduce regression.
- Analyzed requirements and user stories, collaborating with business partners to enhance architecture, optimizing performance, implementing best practices in code quality, and ensure testable outcomes. Minimizing interruptions and ensuring system integrity.
- Utilized tools such as Selenium, SoapUI and JMeter for performance and validation, supporting DevSecOps processes. Communicating findings, recommendations, and results to executives, management, and stakeholders.

Department of Treasury/IRS – Lanham, MD

Information Technology Specialist Technical Systems Tester | **02/1998 – 02/2022**

Supervisor: Prem Nagireddy (240-613-4923)

- Spearheaded testing initiatives for Taxpayer Delinquency Investigation TDI & Penalties and Interest PINEX Batch Programs for current system integration, focusing on automation and quality assurance while continuously documenting physical configurations of the system.
- Designed and executed automated test cases using Selenium, JMeter, TestNG, and SOAPUI, supporting continuous integration and delivery (CI/CD),
- Maintained federal client systems data with managed documentation and reporting test results, issues, and compliance using Rational Test Management Solution (RADM) and GAO compliance DocIT repository.
- Collaborated with developers to analyze code, identify discrepancies, and optimize functionality through performance tuning.
- Optimize the functionality of networks and systems using performance regression testing and tuning tools utilizing various techniques. Enhanced system reliability by 15% through improved regression testing and performance tuning.
- Provide technical leadership, guidance, support, recommendations, and communicated findings to all stakeholders ensuring prompt resolution of complex problems and supporting agile and waterfall methodologies.

Education

B.S. Accounting and IT Technical — **University of Tennessee, Memphis (2006)**

Certifications

- Java Programming Certificate – Simplilearn, 2023
 - Coursework: Information Systems, Business Finance, Business Statistics, Accounting Systems, Federal Income Tax, Auditing
-
