

NORDEE MENENU GENTLEJACK

(716) 491-0160 | mnordee@gmail.com

OBJECTIVE

Dedicated and technically proficient Data Center specialist with 3+ years of experience in data center operations, structured cabling, and hardware maintenance, skilled in installing and troubleshooting servers, network devices, and environmental systems in high-availability environments. A collaborative team player with a strong attention to detail, capable of executing complex infrastructure projects independently.

SKILLS

- Structured Cabling (Copper & Fiber)
- Routing and Switching
- Server Installation & Maintenance
- Rack and Stack
- Microsoft Intune
- Data Center Operations
- Cisco Meraki Switch & Router Configuration
- Windows, Mac OS, and Linux
- Hardware Repair/Replacement and Software Patching
- Network Management & Troubleshooting
- Active Directory
- Hardware Diagnostics Repairs
- Virtualization
- Cable Management & Documentation
- Backup and Disaster Recovery
- Scripting and Automation

EXPERIENCE

Data Center Engineer | @ US Bitcoin Corp Data Center (now HUT8)

April 2021 - April 2025

- Deploying Routing Protocol like OSPF, EIGRP, BGP.
- Troubleshooting and performing routine maintenance of network equipment.
- Conduct regular scans to identify security weaknesses in Network, Systems and Applications.
- Implementing Redundancy with HSRP.
- Implementing Network Segmentation with VLANs.
- Plan, install, and maintain Cat6 and Fiber cabling infrastructure.
- Configure and manage Cisco Meraki switches/routers for optimal network performance.
- Conduct hardware and software patching to maintain system security and functionality.
- Fixing and replacing Field Replaceable Units (FRUs) to enhance data center performance.
- Troubleshoot and resolve network and hardware/software issues promptly, minimizing downtime.
- Implementing MPLS for efficient packet switching.
- Collaborate with software and networking engineers to protect critical data.
- Maintain detailed documentation of cabling, equipment, and configurations for future reference.
- Deployed and configured Windows 11 systems across enterprise environments.
- Deploy security control like IDS, IPS, DLP, MFA, Firewall and VPN
- Handled physical setup of systems, including rack mounting, cable management, and hardware swap-outs.
- Provided Level 1 and 2 support to end-users, resolving hardware and connectivity issues.
- Logged IT Tickets, Tracked Resolutions, and Maintain Accurate Documentation.
- Supported migration of systems from Windows 10 to Windows 11 in a production environment.
- Configured user profiles, device drivers, and local network connections including shared printers.
- Ensured proper decommissioning and secure disposal of outdated hardware.
- Collaborated with cross-functional IT teams to streamline deployment processes.

Projects

- **Cabling Audit and Upgrade:** Participated in structured cabling upgrade, including re-routing and testing of fiber/copper cables, validating signal integrity and labeling for traceability.
- **Migration and Decommissioning:** Assisted in physical migration and decommissioning of equipment to optimization of rack cabinets to improve airflow and capacity planning.
- **Network Technician (Game Day Operations) Highmark Stadium Buffalo NY:**
- Setting up and managing cables and network systems in a fast-paced environment.

E-Commerce Lister | Goodwill of WNY

March 2021 - April 2021 (Volunteered)

- Ensured quality of items listed on the ShopGoodwill Online Store.
- Created product listings, optimized descriptions and images, managed inventory, updated prices, and categorized products for search optimization.
- Handled customer inquiries and feedback related to product listings.
- Met and exceeded daily listing objectives.

Lead Tech | United States Postal Service | Buffalo, NY

December 2012 - March 2021

- Processed U.S. Passports and managed quarterly reporting.
- Enhanced file systems and automated records management for efficiency.

EDUCATION

State University of New York – Erie Community College

- Associate Degree in Information Technology

Certifications

- *CompTIA Network+ Certified*
- *CompTIA Security+ Certified*
