### SUMMARY

- I have over 17 years of IT experience in Microsoft technologies with a track record of developing and managing enterprise applications that improve efficiency and scalability. Delivers high-performance solutions that modernize legacy systems and enhance business operations. Experienced in cloud adoption, software architecture, and leading development initiatives that drive organizational success.
- Extensive experience of designing and developing large enterprise applications using C#, .Net, .Net Core and web technologies like Angular 14, NodeJS, .Net MVC and JQuery.
- Strong understanding of **Object-Oriented programming**, UML, Design Patterns, reusable Frameworks, **Microservices** architecture and implementations. Experience developing **Domain Driven Design** based large application.
- Experience of identifying and **migrating legacy** applications using ASP.Net MVC and Angular technologies.
- Experience developing solutions using various **AWS** Cloud offerings, hands-on experience on **CICD** using Github Actions and Jenkins and deployment using Serverless, containers, GitHub actions and Docker
- Good working knowledge of Angular 14, AngularJS, Microsoft Azure and AWS.
- Implemented projects with agile methodologies (Certified SCRUM master), waterfall and iterative.
- Highly adaptable in providing Analytical Support to key business Applications /Solutions in production.
- Coordinating between client and offshore team and deliver the project in better timelines
- Project Management, Tracking and Team Management
- Understanding of Software Development Life Cycle (SDLC), involved in various phases like Requirements, Analysis/Design, Development, Testing and Implementation.
- Experience in leading and managing multiple projects simultaneously.

### VISA

- H1-B (Green Card in process, I-140 approved)

### TECHNICAL SKILLS

| Skill Classification | Description                                                                                        |
|----------------------|----------------------------------------------------------------------------------------------------|
| Primary Skills       | .Net Core, C#, ASP.Net, WebAPI, WCF, Angular 14, AngularJS, JQuery, LINQ, WebJobs                  |
| Databases            | Postgres 12, SQL Server, Oracle, Informix, MySQL                                                   |
| Tools Used           | Docker, Copilot, Visual Studio 2022, Github, Azure, GITFlow, TFS, Nhibernate, Team forge, SVN, RTC |
| Certifications       | Brain Bench, L0 – Banking Domain                                                                   |
| Management Skills    | Effort estimation, Project management, Onsite Coordination and Interaction with clients.           |
| Domain knowledge     | Banking, Retail & Insurance (EDI)                                                                  |
| Operating System     | Windows, Linux, Unix                                                                               |

## FUNCTIONAL:

- Managing and delivering enterprise level projects.
- S/W development life cycle methodologies (waterfall, iterative & agile [Certified SCRUM master]).
- Requirements definition, functional specifications and gap analysis.
- Credit Card Transaction & ACH handling.
- Good understanding of banking, employee ownership service & loan processing rules.
- EDI for retail and insurance.

## EXPERIENCE

**Company:** Moodys Analytics

Oct 2019 – Till date

**Project Name:** CreditLens

**Project Summary:** CreditLens is a fully integrated risk management solution that harnesses the expansive data and industry expertise from Moody's Analytics to help financial institutions make the right offer to the right customer at the right time. CreditLens is divided in sub modules like RiskGrading, financial analysis, CRE etc. It leveraged AI-backed automation and integrated data analytics to drive smart, profitable growth and insights across every stage of the Risk Management cycle.

Application has different modules

- Web Application – Online application used by end users to capture data, generate reports, etc.
- CreditLens Studio – tool to setup financial templates and other admin stuff
- Batch Processing – running batch utilities

**Technical Environment:** .Net Framework 8, .Net Core 3.0, ASP.Net, C#, Postgres 12, AngularJS, Angular 14, Docker, AWS, AWS-cloudwatch, AWS-RDS, AWS-S3.

**Roles and responsibilities** in the project:

I played a Sr.Software engineer role at technical level in this project. I am responsible for the following activities:

- Developed and enhanced core features of CreditLens, a fully integrated risk management solution by Moody's Analytics, leveraging automation and data analytics to optimize financial decision-making.
- Debugged and resolved environment-specific issues, ensuring optimal performance and reliability across various deployment phases.
- Conducted comprehensive code reviews, enforcing best practices to enhance maintainability and performance of AI-driven chatbot interactions.
- Support different versions of the application in production.
- Debugging different environment issues
- Implemented database changes in PostgreSQL to support new features, enhance risk analysis capabilities, and improve data consistency.
- Spearheaded software enhancements, defect fixes, and ongoing maintenance, ensuring a reliable and scalable risk management solution for banking clients.

**Company:** Moodys Analytics

**Project Name:** CreditLens ChatBot

**Project Summary:** CreditLens AI integrated ChatBot that can help financial institutions answer customers related specific questions. ChatBot was developed in Python and integrated with the CreditLens application.

**Technical Environment:** Python 6, Postgres 12, Angular 14.

**Roles and responsibilities** in the project:

I played a Sr.Software engineer role at technical level in this project. I am responsible for following activities:

- Working on User stories, enhancement
- Debugging different environment issues
- Code review
- Database changes.
- Enhancements, defect fixing, maintenance and support.

**Company:** MidWest Cloud Computing

June 2018 – Oct 2019

**Client:** Moodys Analytics

**Project Name:** Risk Analyst

**Project Summary:** RiskAnalyst is a software application built to help banks in risk management by capturing financials in a consistent manner and producing dual risk ratings – probability of default (PD), and loss given default (LGD) – across both your commercial and industrial (C&I) and commercial real estate (CRE) portfolios.

Application has different modules

- Web Application – Online application used by end users to capture data, generate reports, etc.
- RiskAnalyst Studio – tool to setup financial templates and other admin stuff
- Batch Processing – running batch utilities

**Technical Environment:** VisualStudio.Net 2015, Dot Net Framework 4.6, ASP.Net, C#, SQL Server 2016, Oracle 11g.

**Roles and responsibilities** in the project:

I played a Principal Software engineer role at technical level in this project. I am responsible for following activities:

- Interaction with the client.
- Debugging different environment issues
- Code review
- Database changes.
- Enhancements, defect fixing, maintenance and support.

**Company:** Prokarma Inc

| Client                             | Duration               |
|------------------------------------|------------------------|
| Dignity Health                     | July 2017 – April 2018 |
| InEight Inc                        | Aug 2016 – June 2017   |
| Kaiser Permanente, CA- US          | Mar 2015 – Aug 2016    |
| Valmont Industries, Valley - NE US | Sept 2013 – Mar 2015   |

**Company:** Cognizant Technology solutions

| Client                           | Duration            |
|----------------------------------|---------------------|
| Wal-Mart, Bentonville - AR US    | Aug 2009 – Aug 2013 |
| BNY Mellon bank New Jersey-NJ US | Oct 2008 – Aug 2009 |
| Washington Mutual Bank Account   | Dec 2006 – Sep 2008 |

## EDUCATION

- Master of Computer Science (M.C.S) – Pune University (India)
- Bachelor of Computer Science (B.C.S) – Pune University (India)

## PROFFESIONAL MEMBERSHIPS & CERTIFICATIONS

Certified Scrum Master
