

Summary

Experienced Salesforce Marketing Cloud QA Specialist with 7+ years in quality assurance and campaign optimization, specializing in testing and validating, dynamic content, and personalized messaging. Skilled in Agile methodologies, regression testing, and API integrations, with a proven track record of enhancing campaign reliability and streamlining QA processes. Adept at collaborating across teams to align business goals with technical solutions, ensuring high-quality deliverables.

Education

Baruch College, CUNY

BBA in Finance

New York, NY

Professional Experience

MassMutual

Nov. 2021 – Present

Salesforce Marketing Cloud QA Specialist

New York, NY

- Verified the rendering and responsiveness of email templates across various clients and devices, ensuring compatibility with HTML, CSS, and AMPScript logic.
- Conducted quality assurance for dynamic email content to ensure correct personalization and variable substitution within Salesforce Marketing Cloud.
- Documented defects and provided detailed test result reports using JIRA to ensure clear communication and efficient resolution of issues.
- Participated in planning, coordinating, and managing project teams to streamline and oversee the testing process.
- Validated scheduled and triggered sends, including monitoring Data Extensions and audience segmentation rules for compliance with business requirements.
- Reviewed Journey Builder paths, ensuring proper decision splits and actions, and resolved discrepancies before deployment.
- Tested landing pages and microsites connected to Marketing Cloud to ensure they worked smoothly and provided a good user experience.

Macy's

Oct. 2018 – Oct. 2021

Email Marketing QA Analyst

New York, NY

- Performed end-to-end testing for email marketing campaigns, validating HTML/CSS designs, responsive layouts, and AMPScript-based content personalization.
- Conducted regression testing on Journey Builder automations to ensure updates didn't disrupt existing workflows or audience targeting.
- Collaborated with developers and designers to resolve rendering inconsistencies in emails across Outlook, Gmail, and Apple Mail.
- QA'd Data Extension configurations to ensure proper filtering and accurate audience segmentation within Salesforce Marketing Cloud.
- Tested triggered email sends, including welcome journeys and abandoned cart campaigns, to validate proper entry and exit criteria.
- Verified compliance with accessibility standards (e.g., WCAG) for email templates, ensuring usability for diverse audiences.
- Utilized API testing tools like Postman to validate integrations between Salesforce Marketing Cloud and external CRM systems.
