USG IT Solutions Pvt Ltd. (Client: Bank of America)
Business Analyst

Apr 2019 - Jan 2020

Bank of America offers a wide range of services for its wealthy clients by its Unified Managed Account (UMA) program, which is a comprehensive solution, tailored to their clients investment needs. The UMA Program is a fee based program which provides clients with more customization through multiple, institutional-level separate account managers, exchange traded funds and mutual funds in one convenient account utilizing an active overlay portfolio manager. The project involved adding new innovative models to manage portfolios in a fluctuating market.

Responsibilities:

- Gained thorough understanding about the existing UMA Products - Portfolio Strategy Managed Models (PSM) and Fund Strategy Managed Models (FSM).
- Reviewed the current business process and gained knowledge of the existing front office tools and billing application of the bank for UMA products.
- Created User Stories for different sprints in an Agile fashion.
- Participated in User Acceptance Testing (UAT) of the CFAS (billing application) release.

Ramya Sree Sangaraju
Senior Business Analyst / Scrum Master

ramyasreesangaraju@gmail.com

Mobile: 469-613-9226

- Participated in the Scoping sessions for new initiatives and documented Project Plan/ Project Charter.
- Communicated extensively within the organization (business, development team, UI/UX designers) to better understand the need for UMA, it's impact , advantages and the look and feel of the product.
- Envisioned the future process flow and used Visio to document the same.
- Gathered requirements and documented the Business Requirement Document (BRD).
- Envisioned a Test strategy and documented the Test plan.

USG IT Solutions Pvt Ltd. (Client: Standard Chartered Bank)
Business Analyst

Dec 2017 – Apr 2019

This project is a web based application and it involved developing the Bank's module for an online mortgage application, which allows customers to apply for mortgage, check the status of their application, and many other Mortgage tools. It provides the users with secure access and helps to increase the efficiency and the quality of loan decisions taken by the company.

Responsibilities:

- Obtaining a detailed knowledge of the business process being followed in the project environment.
- Extracting the business requirements from the end users keeping in mind their need for the application, and documenting it for the developers.
- Based on the user requirement created BRD, FRD, and SRD.
- Analyzed business requirements and segregated them into Use Cases and activity diagrams using Rational Rose according to UML methodology thus defining the Data Process Models.
- Conducted JAD Sessions periodically with various stakeholders to discuss open issues and resolve them.
- Used MS Excel widely to create the Requirement Traceability Matrix (RTM).
- Various versions of the documents generated during the project were maintained and managed using Rational Clear Case.
- Conducted manual and automated testing to perform GUI and Functionality on the AUT. Performed Integration, System and Regression Testing.
- Tested the final application for Usability testing to verify whether all the User Requirements were catered to by the application.
