

Ramya Balachandran
Senior Lead Software Engineer

Email: ramyabalan.cse@gmail.com
Mobile: 412-587-1662

Professional Summary

Accomplished **Senior Lead Software Engineer** with **11 years of experience** in designing, developing, and delivering enterprise software solutions across **banking, healthcare, and enterprise content management domains**. Adept at collaborating with cross-functional teams, driving **software development lifecycle (SDLC) processes**, and leading high-performing teams. Strong expertise in **Java, Microservices, DevOps, and Enterprise Content Management**. Proven ability to **mentor teams, enhance software quality, and optimize development processes** while ensuring alignment with business objectives. Passionate about **building scalable, secure, and high-performance applications** in agile environments, with a focus on **compliance, security, and enterprise-scale data management**.

Core Competencies

- Software Development & Lifecycle Management
- Micro-services
- CI/CD, DevOps & Automation
- Enterprise Content Management & Integration
- Performance Optimization & Scalability
- Agile Development & Stakeholder Collaboration
- Self motivated professional
- Mentorship, Team Leadership & Process Improvement
- Problem-solving and decision-making in complex software environments

Tools and Technologies

Programming & Frameworks	: Java, J2EE, Spring Boot, Spring Batch, Microservices, WebSockets, Kafka, JPA, IBM Graphql, IBM MQ
Cloud & DevOps	: Docker, Kubernetes, GitHub CI/CD, UC Deploy, SonarQube, JFrog Artifactory, Ansible
Search & Monitoring	: ElasticSearch, Logstash, Kibana (ELK Stack)
Enterprise Content Management	: IBM FileNet
Servers	: Websphere Server, Tomcat
Databases	: SQL Server, Oracle
Version Control & SCM	: GitHub, GitLab, Tortoise SVN, CA Harvest
Testing & Quality	: JUnit, Mockito, PowerMockito
Build & Deployment Tools	: Maven, Apache Ant
Frontend & UI Development	: ReactJS, JavaScript, HTML, CSS, JQuery
Authentication/Authorization	: OAuth 2.0, Spring Security

Responsibilities

- Leading end-to-end software development, ensuring high availability and performance of enterprise applications.
- Responsible for analysis, design and implementation of REST Services using Spring boot for Enterprise Content Management (ECM) system, IBM Filenet.
- Responsible for integrating Elastic Workplace search with IBM Filenet REST services to store document metadata and content using Apache Tika and Tesseract OCR APIs, enabling rich search capabilities.
- Responsible for developing UI components using React JS for enabling search mechanism for finding document metadata using Elastic Workplace search.
- Developed APIs for advanced search features, including metadata search, full-text document search, wildcard search to enhance document retrieval efficiency.
- Responsible for creating stand alone utilities and batch jobs to automate the bulk document ingestions.
- Collaborating with business stakeholders, product owners, and development teams to define technical strategies.
- Implementing CI/CD pipelines and improving DevOps practices for seamless software delivery.
- Provided technical mentorship and guidance to engineering teams, fostering a culture of continuous improvement.

Project Experience

Company: Virtusa Corporation

Apr2023 - Till date

Client: M & T Bank

Description : **Enterprise Content Management (ECM)** system using IBM Filenet to securely store all bank related documents submitted by customers. The system efficiently handles document storage, retrieval, and indexing for multiple banking sectors, including retail banking, commercial banking, mortgage services and employee records.

Role: Senior Lead Consultant Technology

- Development and implementation of REST services for document ingestion to IBM Filenet.
- Collaborating with **business stakeholders, product owners, and development teams** to define technical strategies.
- Developed APIs for advanced search features using Elastic Workplace search features, allowing metadata search, full-text document search (via Apache Tika and Tesseract OCR), wildcard search to enhance document retrieval efficiency.
- Responsible for developing UI components using React JS for enabling search mechanism for finding document metadata using Elastic Workplace search.
- Developed multiple utilities to support document ingestion and extraction process.
- Resolved production issues related to Content Management System on Filenet.
- Used Java 19 and Spring Boot for microservice development and OAuth 2.0 for REST service API authorization.
- Responsible for development, testing, code deployment and production support of the Content Management System.
- Responsible for completing unit tests using Junit and Mockito framework.
- Implementing **CI/CD pipelines** and improving DevOps practices for seamless software delivery.

- Provided **technical mentorship and guidance** to engineering teams, fostering a culture of continuous improvement.
- Utilized **FileNet for enterprise content management** and **ELK Stack for log monitoring**

Company: Citius tech(SDLC Partners)

Aug 2018 - Apr 2023

Client: Highmark, Pittsburgh, PA

Projects: Highmark Care Management- *WPP Matrix – Predictal Migration*, IBC and MN Letters, *IBC Health Champion*, *WPP Matrix – New York Migration*, *Health Now – New York Aerial Migration*, *UM-Referral enhancement and production tickets*, *ShareCare Registered user*, *North Dakota Aerial Migration*

Role: Consultant Application Developer

- Developed and implemented **Minnesota and IBC Letters, Health Champion enhancements, and New York WPP Matrix migration**.
- Led **application modernization efforts**, transitioning monolithic applications to microservices architecture.
- Designed and implemented **batch processing solutions using Spring Batch** and developed **Aerial Letter enhancements**.
- Migrated **Predictal Application using Spring Boot framework**.
- Designed and developed **Referral enhancement and production support tickets using Pega**.
- Led the **development of North Dakota Aerial Letters and UM Member Contact Preference enhancements**.
- Enhanced **system monitoring and logging** using internal tools.
- Partnered with **business and technical stakeholders** to align technology strategies with organizational goals.
- Led **software development teams**, providing **mentorship and technical direction**.
- Ensured adherence to **coding standards, security best practices, and performance optimization techniques**.

Company: Virtusa Corporation

Dec 2009 - Feb 2015

Client: Thomson

Project: Thomson Innovation - Maintenance, Elaboration of Chinese Translation, Workspace Pagination ,Preferences Construction

Role: Senior Software Engineer

- **Software Development & Implementation:** Designed, developed, and implemented **preference use cases, batch processing jobs, and document management enhancements**, ensuring end-to-end functionality.
- **Technical Design & Enhancement:** Led the **design, development, and implementation** of production enhancement defects, ensuring performance optimization and adherence to best practices.
- **Issue Analysis & Resolution:** Analyzed and resolved **client-reported issues** within SLA using Bugzilla, providing workarounds and ensuring minimal impact on business operations.
- **Production Monitoring & Support:** Collaborated with offshore teams to monitor alerts, troubleshoot issues, and provide **technical updates** to onsite teams.

- **Localization & Internationalization:** Participated in requirement analysis and contributed to the **technical elaboration of Chinese internalization** for enterprise products.
- **Testing & Quality Assurance:** Conducted **unit testing using JUnit and Mockito**, ensuring high-quality software releases aligned with internal processes and agile methodologies.

Campus Graduate Training

Software Engineer –December 2009 to February 2010

Fundamental training on Java, C, C++, Oracle, UNIX, Servlet, JSP, Jboss, Tomcat under the guidance of external and internal trainers. Also undergone training on soft skills like team playing, team building, Corporate Ethics.

Achievements & Certifications

- GenAI Assisted Engineer Certification - Virtusa Certified
- Spring Boot Developer – Udemy Certified
- Outstanding Contribution Award – Thomson Innovation

Educational Qualifications

- Bachelor of Engineering (B.E), Computer Science and Engineering, First Class, K.S.R College of Engineering, Tiruchengode, Affiliated to Anna University (2009), Chennai.
