

Ravi Akkinepally

Seasoned Integration Architect and Developer with 15+ years of expertise in SAP ABAP, Dell Boomi, and SAP BTP, specializing in enterprise application integration, cloud-based API development, and middleware solutions. Proven track record of optimizing integration workflows, enhancing operational efficiencies, and driving digital transformation initiatives for Fortune 500 companies.

EXPERIENCE

Collins Aerospace, San Diego, CA — *Dell Boomi Integration Architect / Senior Integration Developer*

March 2006 - PRESENT

- **Integration Architecture & Design:** Designed scalable Dell Boomi integration solutions across SAP (including IDoc and BAPI), SQL Server, Oracle, and third-party systems, enabling seamless data flow for global inventory, procurement, and MRO operations.
- **API Architecture:** Architected and deployed REST/SOAP APIs on Dell Boomi to support real-time transactions across internal and partner systems, including Xclass material transfers; reduced integration latency by 50%.
- **Stakeholder Collaboration:** Worked cross-functionally with business and technical stakeholders to gather requirements, define integration strategies, and document architecture specs.
- **SAP BTP:** Managed SAP BTP cockpit, including subaccount creation, destination setup, and role assignments. Integrated SAP BTP with S/4HANA using API calls and OData services for seamless application creation and real-time data exchange. Utilized SAP Cloud Platform Integration and Cloud Foundry for efficient cloud-based solutions.
- **Reusable Frameworks:** Built and deployed reusable Boomi templates across multiple regions, enabling rapid onboarding for global operations like Airbus (EU), Singapore MRO, and Germany material management.
- **Performance Optimization:** Streamlined data transfers between SBUs, utilizing stored procedures, BAPI calls, and SQL queries for high-performance transaction processing, reducing latency by 50%.
- **Process Automation:** Developed sub-processes for PowerPick systems (Delivery picks, Cycle counts, Putaway, Work orders) to improve warehouse and inventory management.
- **Boomi Administration & Monitoring:** Managed Boomi Atom environments and user access, including server restarts and framework setup.
- **Managed File Transfer (MFT):** Designed Flat file transfers using secure SFTPv2 for Primavera, Xclass, and Sunflower Linpic UK, ensuring secure and efficient file exchanges.
- **EDI & RosettaNet Integration:** Developed and maintained EDI mappings in Boomi, handling X12 (850, 855, 810, 856, 997) and XML documents for seamless supplier-side EDI integrations.
- **Custom Scripting & Development:** Developed QSD scripts to facilitate integrations with Visiprise, Cincom, Citibank, and Bloomberg.

SKILLS

Integration & Middleware

- SAP ABAP, Dell Boomi, eGate
- SAP BTP, SAP Idoc, ALE, BAPI
- Managed File Transfer (MFT), SFTPv2, SAPv2, API Management
- EDI Formats: X12 (850, 855, 810, 856, 997), XML Transformation
- Rosettanet

Cloud & API Development

- RESTful & SOAP APIs, Web Services, JSON, XML, XSD
- AWS, Azure

Databases & Tools

- Oracle, SQL Server, MySQL, SAP HANA
- Stored Procedures, Performance Tuning

Programming Languages

- Java, XSLT, ABAP, JavaScript
- Shell Scripting, Monk Scripting

Project Management & Tools

- Agile, JIRA, ITIL

CERTIFICATIONS

Boomi Professional Certification (2024)

Boomi Associate Developer Certification (2019)

DirecTV, Los Angeles, CA — Senior Software Analyst

June 2004 - February 2006

- **Enterprise Integration Development:** Led SAP eGate integrations for TV package management, enabling real-time updates and order processing.
- **Error Handling & Monitoring:** Optimized log tracking and root-cause analysis, reducing system downtime by 30%.
- **Java & XML Development:** Wrote custom Java scripts and XML mappings for order processing and billing transactions.
- **Production Support & Testing:** Conducted mismatch analysis, system testing, and Siebel-EAI-based data synchronization.

LANGUAGES

English, Hindi, Telugu

Capgemini, Kuala Lumpur, Malaysia — Software Developer

January 2003 - May 2004

- **Middleware Development:** Implemented XML-trigger-based transaction initiations, improving data flow efficiency.
- **Exception Handling & Optimization:** Developed Monk and Java-based exception handling frameworks, reducing processing bottlenecks.
- **JMS & Messaging Systems:** Managed JMS queuing and eGate messaging layers between Siebel, Middleware, and Policy systems.
- **Business Process Automation:** Designed eInsight BPM workflows, optimizing transaction routing and rule-based decisioning.

EDUCATION

Western Governors University, Salt Lake City, UT — Master of Business Administration (MBA) – IT Management

August 2013 - June 2015

Osmania University, India — Master's in Management Information Systems & Computer Applications

Osmania University, India — Bachelor's in Electronics
