 - Worked closely with senior stakeholders and management, influencing and advising on business strategies and solutions, managing multiple deliverables in parallel and delivering outcomes in a high-intensity, Agile work environment to meet client-facing demands.
 - Best understanding of Waterfall, RUP and Agile frameworks, including scrum, to participate in ceremonies like sprint planning and retrospectives.
 - Document process flows and propose future process flow improvements by conducting data collection and meetings with the subject matter experts to gain full understanding of system usability (storyboards, use cases).
 - Experience in developing and employing functional and non-functional requirements artifacts (Use Cases, Epics, Features, User Stories, Requirements Definition, Process Definitions, User Interface Wireframes, Data Dictionaries, Requirements Traceability Matrix (RTM) and Field Level Mappings for Data Integration to and from COTS and custom applications).
 - Expertise in documenting Business Requirements (BRD), Functional Requirements (FRD), (SOPs), Non-Functional Requirements, Systems Requirements Specifications (SRS), User Stories, Process Flows, Acceptance Criteria, Training Materials, Data Mapping Document, Use Cases, Test Cases, User Interface Prototypes using MS Excel, MS Project, MS Word, MS Power Point, MS Visio, MS Teams.
 - Creating reports and dashboards from scratch using Salesforce CRM Analytics, including but not limited to creating data connectors, building recipes, filtering, and updating data.
 - Experienced in SQL and Data Analysis Developing, maintaining, and optimizing SQL queries to generate meaningful reports, analyzing business performance and identifying trends into actionable recommendations (technical feasibility).
 - Dashboard and report creation with Tableau, SQL and Power BI for various departments around the business (ranging from web analytics, marketing, product planning and merchandising, logistics, etc).
 - Strong experience in using Business Analysis Tools JIRA, MS VISIO, (UML) for creating Use Case Diagrams, Business Process Models, Process Flow Diagrams, Class Diagrams, Activity Diagrams, Sequence Diagrams, State Diagrams and Work Flow Diagrams.
 - Collaborated in the implementation of incident response plans and participated in incident response activities during Live-demo production to ensure smooth release and merging into Live-production environment.
 - Experienced in Change Management activities and Supported Organizational Change Management (OCM) Team by providing the "to be" solution.
 - Experience in Documenting Gap Analysis between AS-IS and TO-BE Business Processes and mapping the Bridge by drafting one or more solutions (Process Flow Diagrams) along with Pros and Cons which are presented to Business.
 - Experience in conducting Joint Application Development (JAD) meetings for identifying business rules, functional requirements and documenting them to Bridge the GAP between Design and Development and Business domain team.

-
- Experience in Scheduling and Modulating Sign-Off/Kick-Off meetings, Review meetings, Mid-checkpoint meetings and Approval meetings with Product/Project Manager, SMEs(Subject Matter expert) and Business to identify requirements and document SR Specification document.
 - Effectively communicate project status, scope, feasibility, risks, and decisions to key stakeholders, managing expectations and resolving conflicts.
 - Evaluated potential problems, drafted-solution plans, cost-benefit analysis, to ensure projects align with business priorities reducing incidents.
 - Experience in major areas of testing cycle – gathering, documenting, and analyzing requirements, providing estimates, creating test plans/cases, creating process diagrams, Test Dataset, logging bugs, bug triage, bug prioritization and coordinating User Acceptance Test (UAT) Cases using tools JIRA.
 - Develop User Training Manuals, Product Manuals, Release Notes and other aids to streamline the uptake of the new system or changes and Providing training to users of the new system or information on the enhancements/features introduced.
 - Exceptional verbal, listening, written and presentation skills, Communication Effectiveness, Teamwork, Judgment/Decision-Making, Innovation/Creativity, Motivation.

EXPERIENCE

PG&E Corporation, Oakland CA - *Business Analyst*

October 2022 - Present

- Eliciting requirements using interviews, document analysis, requirement workshops, surveys, brainstorming, site-visits, business process descriptions, use cases, scenarios, business analysis and workflow analysis.
- Conducted requirements interviews with stakeholders to capture and validate information provided in elicitation sessions, unstructured reviews and Joint Application Development (JAD) sessions.
- Interpreted stakeholder business needs and translated them into system (functional and non-functional) and operational requirements that improves the organization's operating efficiencies and costs.
- Actively participated and supported the delivery of business capabilities within an Agile framework (helping document user stories, acceptance criteria, root cause analysis, and provide effort estimates).
- Responsible for managing SCRUM ceremonies (backlog-grooming, specifications, BPMN (Business Process Modeling Notation) App modeling, Use Case, As-Is and To-Be, User Stories and functional work).
- Coordinated requirements walk-through and sign-offs, verifying with user representatives / stakeholders that user stories and process models accurately portray specific business needs.
- Developed Use Cases, Functional Requirements, Screen Specs, Mockups, Process flows for Consumer and Agent facing portals.
- Participated in review of specifications, user sign off procedures and getting user stories approved and added to the sprint for development work.
- Performed analysis on complex data billing utilizing SmartMeter and MV90 data.

- Solved moderate to complex problems(current rates and tariffs in addition to billing process and program changes) and provided a new perspective on billing resolution.
- Performed complex metering and billing research internally and externally.
- Created a RoadMap and Led implementation of new IT operations into the company from initial idea to the project completion phase.
- Documented Epics and break them into User Stories and Spikes using (Agile methodology) Scrum tools such as JIRA in the product Backlog.
- Assessing Risk when business decisions are made, demonstrating particular consideration for the firm's reputation and safeguarding PG&E Corporation, its clients and assets, by driving compliance with applicable laws, rules and regulations.
- Assisted in the development of test plans/test scenarios for each test phase to ensure complete test coverage and provide support during business application testing to verify requirements and business needs are fully implemented.

Americare, Brooklyn NY - *Business Solutions Analyst Healthcare*

June 2020 - September 2022

- Collaborated with stakeholders to gather, analyze, and document business requirements for healthcare insurance solutions targeting the scope of telecommunication service needs of Americare.
- Our clients work primarily with Medicare and Medicaid plans and TPA's(Third party).
- Helping our clients manage their member and provider communications.
- Assisted in building a platform our clients use to track the communications i.e. letters, statements, EOB's(Explanation Of Benefit), EOP's(Emergency Operation Plan, Explanation Of Payment), ID cards, Welcome kits to name some of what we handle for our clients.
- Created EOP's for Emergency procedures including patient care, evacuation, communication, and shelter-in-place.
- Assisted in planning and coordination of application upgrades and releases, including development and execution of some test plans.
- Participated in the implementation and conversion of new and existing health plans.
- Telecommunication services include telephone systems, cellular/mobile phones & pagers, voice messaging, cellular network repeaters, facsimile systems, voice & video conferencing, and voice communication related circuits.
- Evaluating company service requirements; Planning, cost analysis, vendor comparisons, design, engineering, acquisition and implementation of the company's voice communications system.
- Developing and/or assisting in the development of standards, policies, and procedures for telecommunication services.
- Documenting telecommunication service systems and environment; Monitoring and reporting telecommunication systems; Fulfilling Move, Add, Change, Delete requests for services.
- Operational maintenance and support of telecommunication equipment and systems.
- Troubleshooting and repair of telecommunication equipment and systems; May be required to provide on-call or after hours support.

-
- Facilitated JAD Sessions for development of annual operating plans, capital budgets and forecasts, and build business cases for new business initiatives(cost/benefit analysis).
 - Worked with internal teams(Product Owner and Subject Matter Experts) to implement approved design strategies and research and plan mobile and internet channel creation and expansion.
 - Reviewing, analyzing, and interpreting Business Requirements Documents (BRD) and providing feedback on key functionalities, Time, Scope, Budget, Post Go-live support Costs and technical feasibility.
 - Eliciting ,analyzing all requirements, including business rules and resolving ambiguity and ensuring common understanding of needs.
 - Analyzing and Translating BRDs into Functional Requirements Document (FRD) by Identifying and Documenting all business-rules, technical, product, and process requirements.
 - Created PDD, SDD, BRD, Calculating CBA(Cost-Benefit Analysis).
 - Conducted Risk Analysis to identify and reduce potential project risks, documented and developed mitigation(Incident-Response) strategies.
 - Designed new user interface screens to support new features via sketches, mock-ups, GUI prototypes, Business Use Case Scenarios, storyboards, artifacts, wireframes, workflows and process maps by using JIRA, MS-Visio, Excel.
 - Researching growth opportunities that advance the online customer experience strategy.
 - Collaborated on new and existing web or multimedia applications and Ensure Consistency throughout the creation of electronic communications and websites by utilizing company Brand and Quality standards and industry trends.
 - Updated and maintained test matrix and test cases based on code changes and enhancements to assigned applications ensuring the smooth delivery.
 - Maintained and monitored requirement status throughout the project lifecycle, and effectively communicated any changes to business requirements to stakeholders.
 - Conducted Sprint Meetings with the team for planning at the beginning and retrospection meetings at the end of Sprint.
 - Performed Unit Testing, User Acceptance Testing (UAT)/Regression Testing before System Release Delivery and prepared a Confidential Report on the Delivery.
 - Provided KT Sessions to QA and Ensure Testing is done as per the requirements.
 - Provided End User Demo for Stakeholders, UAT and take ownership for Delivery.
 - Ability to distinguish between Change Request and New Feature and get justification from stakeholders and Change Management Team accordingly.
 - Prepared RTM (Requirement Traceability Matrix) to Map requirements against Test-Cases and prepare delivery reports tracking requirement changes throughout the entire project lifecycle.
 - Provided Support to the Business throughout the Implementation and Post Go-live support phase (before and after handing over to end users).

-
- Prepared documentation like User Manuals, Technical Manuals, Hosting & Configuration Manuals from development teams to hand over the Final Product.

Canara HSBC Banking And Insurance, Hyderabad Telangana - *Business Analyst*

February 2018 - April 2020

- Collaborated with business stakeholders to gather and document detailed requirements for IT projects, ensuring alignment with business objectives.
- Analyzing existing business processes to identify (AS-IS TO-BE) areas for improvement and opportunities to leverage IT solutions for increased efficiency and effectiveness.
- Designed and documented workflows for building customer service portal where customers can handle Premium pay, Payment receipts, Service booklet and E-statements, Track application, Claims form, Claim status etc.
- Participated in documenting and developing various Life Investment plans and Investment Calculator which includes (Savings Plan, Retirement Plan, Child Insurance Plan, Term Insurance, Child Education, Guaranteed Assured Income, Tax Calculator etc.)
- Constructed workflow charts, diagrams, user stories, use cases and process flow diagrams, Business Requirement Documents (BRD), Functional Requirement Documents (FRD) using Microsoft Visio and Jira.
- Worked directly with business users (Customer Service, Billing, Underwriting, Product and Claims, Insurance Products, Underwriting, Rating, Policy Administration, Claims or Distribution) to understand business processes.
- Documented process flow where underwriters evaluate applications, approve or reject applications and communicate through customer tracking portal.
- Gathered & documented requirements for InsuranceSuite - PolicyCenter, BillingCenter, Customer/Business Home-Page, ClaimsCenter and Tracking Portal to implement system changes that meet business needs.
- Participated in execution of essential risk program functions, including Compliance Risk Assessments, Key Risk Indicators (KRI) review, Issue Management, Incident Response, Operational Losses.
- Worked with large datasets to identify trends, anomalies, and risk patterns.
- Generated reports and dashboards to provide insights into financial crime risk activities.
- Provided and informed valuable risk and control perspectives(risk literacy) to members of the Business Control team and Business Units.
- Translated business requirements into clear and concise functional specifications, including user stories, use cases, and acceptance criteria, to guide development efforts.
- Collaborated in the prioritization of the product backlog, working closely with product owners and development teams to refine priorities and ensure alignment with business priorities.
- Participated in Post-Go Live Support Sessions – prepared UAT documents and ran UAT with clients stakeholders to validate that IT solutions meet functional requirements and address business needs.
- Conducted functional, regression, performance testing, Issue (Bug) triage, bug prioritization and tracking.

Quantum IT Solutions, Hyderabad Telangana - *Technical Business Analyst*
September 2015 - January 2018

- Diagnosing, troubleshooting, and developing new solutions that solve the root cause of customer problems in tickets elevated from our L1 support team.
- Acting as the central point of contact for VoIP (Voice over Internet Protocol) services.
- Provided technical support for VoIP-related issues through phone calls, chat and emails.
- Diagnosing, resolving and reporting VoIP problems, enhancement requests, including call quality issues, connectivity problems, and configuration errors.
- Assisting customers with the installation-setup, configuration, and maintenance of VoIP systems.
- Monitoring and maintaining VoIP infrastructure to ensure optimal performance and uptime.
- Documenting and tracking customer interactions and technical issues in the support ticketing system then prioritizing and escalating accordingly.
- Conducted regular system checks and preventative maintenance to avoid service interruptions.
- Stayed up-to-date with the latest VoIP technologies, trends, and best practices.
- Provided training and guidance to customers on VoIP system usage and features.
- Learning new products quickly and effectively. When given access to user and developer documentation, knowledge base articles, source code, and infrastructure be able to develop a layered understanding of how the product works end-to-end.
- Making customers think I was magical by solving complicated or never-before-seen issues with my technical and product expertise.
- Independently identify, troubleshoot, document, categorise and replicate customer problems and escalate through defined escalation procedures.
- Communicated bug fixes and new product enhancements to customers.

EDUCATION

TROY UNIVERSITY, TROY AL - *Master's Degree In Computer Science*
August 2013 - July 2015

SKILLS

- Software Development Life Cycle (SDLC).
- Agile SCRUM development processes and JIRA.
- Microsoft Word, UML, Project, Excel, Visio & PowerPoint.
- (QA) testing and User Acceptance Testing (UAT).
- Tools (ServiceNow, SaaS, SAP, ERP, CRM).
- Business Intelligence (Data Visualization - Tableau, SQL, Power BI).
