Role: Architect.

Project Undertaken at Cognizant Technology solutions US Corp

Client: AbbVie

Designation: Sr. Associate

Duration: 1 Jan 2018 to 24 April 2019

Project Title: Humira, Nobsabouths, Faceyourbackpain, Synthroid, SynthroidPro (AbbVie Inc)

<https://www.humira.com> , <http://www.nobsabouths.com> , <http://www.faceyourbackpain.com> ,
<http://www.synthroid.com> , <http://www.synthroidpro.com>

AbbVie is a biopharmaceutical company. AbbVie's entire product line consists of nearly 40 drugs, several of which have become household names. But the company's undisputed heavyweight champion is Humira.

In Abbvie I am currently handling 5 projects with 15 members in the team. My role is to provide technical guidance and solutions for developing web applications. Currently we are using AEM 6.2 with angular (1.5.6). AEM is hosted on cloud. All the projects are running on the same AEM instance. There is a third-party integration which is used to store the information provided by the end-user. We are using rest calls for the backend integration. We have developed/used both classic and touch UI customized components.

Responsibilities:

- Architecture design of application requirement
- Design architecture of component/services.
- Architecture design & POC Implementation of adaptive forms in AEM 6.2.
- Managed the timeline and assign work to the team members
- Adhering to best practices for project support and documentation.
- Designing, developing, and troubleshooting of the application.
- Responsible for QA and Production Releases.
- Publishing the content from author to multiple publish instances
- Technical leader to deliver the project and support all B2C and B2B environments
- Hands-on experience of developing components and services depend on situations.
- Wrote technical stories in Jira.

- Assignment of the tasks.
- Deployment of code.
- Dispatcher rule configuration

Role: Technical Architect

Client: RBS

Cognizant Technology solutions Pvt. India Ltd.

Designation: Sr. Associate

5 Feb 2017 to 10 Dec 2017

Project Title: RBS, Natwest (Reserve bank of Scotland)

<http://www.rbs.com> , <http://www.natwestmarkets.com> , <https://www.rbs.com/heritage.html>

The RBS Group is a large international banking and financial services company. In which we have been developing/migrating the different domains of RBS. Currently rbs.com is running on version 5.6. We are migrating it to 6.0. Along with the development of new requirement. We are handling multiple domains of RBS.

Responsibilities:

- Involved in understanding the requirement.
- Design architecture of application
- Design architecture of component/services.
- Developed customized components.
- Migration of project from 5.6 to 6.0

Role: Technical Architect

Client: Max life insurance

Designation: Sr. Associate

Project Undertaken at Cognizant solution pvt. India Ltd.

14 April 2016 to 31st Jan 2017

Project Title: Maxlife insurance.

<https://onlineplans.maxlifeinsurance.com/online-term-plan>

Maxlife insurance is an insurance web-based application implemented using AEM adaptive forms. This project involves developing two products, OTP and Cancer Care. Customers can visit the application search for insurance plans to generate premium quotes. A Unique identification number gets generated and communicated via SMS/Email. Through unique identification the customer can land on the application where the journey was left. After completing all the required details, the customer will be redirected to the payment gateway. After the successful payment a policy number is generated and communicated via SMS/Email. The journey-based application is called payment last journey; the application can also be enabled to pay for the first journey. We used adaptive form technology of AEM to capture the details of customers and send the data to backend.

Responsibilities:

- Participated in discovery phase of product design.

- Blueprint designing of AEM application Interaction with third party services
- Architecture design of AEM adaptive forms with third party Rest service.
- Setup Jenkins and SVN repositories in house.
- Setup the replication from author to multiple publishers.
- Managed the timeline and assign work to the team members
- Developed OSGI bundles to interact external services.
- Developed customized components.

Role: Technical Lead

Hexaware Technologies. Corp

Designation: System Analyst

9 August 2015 to 10 April 2016

Project Title: Picture Park Dam Connector.

In Picture Park, this was a dam connector framework. We developed a connector which interacted with AEM and third-party dam Picture Park. The Assets were downloaded in AEM Dam or show the asset in the webpage directly from Picture Park dam based upon the user requirement. Users can import video, mp3, images, pdf etc. from Picture Park dam in AEM based upon the folder settings.

Responsibilities:

- Designed the blueprint of the requirement
- Managed the timeline and assigned work to the team members
- Developed OSGI bundles to interact with external services.
- Worked on Agile Methodology.
- Developed customized components.

Project Undertaken at Tata Consultancy Services.

Client: Nielsen

Role: Sr. Developer

Designation: IT Analyst

Project Title – Nielsen Insight Studio

24 Apr 2013 to 3 Aug 2015

<https://h1.answers.nielsen.com/gateway/cd3/logon.htm>

In the CD3 project I have worked in Nielsen Account. In this project we have developed a portal which will show the reports which are created in Micro strategy product and can create projects in Micro strategy from Adobe CQ. According to the permission user can Select the reports from the dashboard and see the relevant data of their products. These reports contain the data regarding the sales of products in the region and in a particular time period.

Responsibilities:

- Worked on MVC approach in Adobe CQ.
- Developed Templates and Components as per requirements.
- Created JSP pages for Template.
- Extended out of the box components.
- Worked on Agile Methodology.

CERTIFIED EXPERT
Web Specialist®
