

Name: Kumar Shashidhar Reddy Vaddeboina
Sr Java Full Stack Developer
Email: vkshashidharreddy@gmail.com
Phone: 8057273734
LinkedIn: www.linkedin.com/in/shashidhar-vaddeboina

PROFESSIONAL SUMMARY:

- I have an overall 10 years of software development experience in Java/ J2EE, Spring Boot, Spring MVC, Spring Data JPA, JSP, JavaScript, SQL, PL-SQL, Struts, Hibernate, and Web Services.
- Involved in complete SDLC from inception, planning, design, coding and testing to project closure mainly in the intranet, Internet and standalone application design, development, maintenance and production support in n-tier architecture.
- Expertise in Core Java such as OOPs, Collections, Exceptions Handling, Input/output (I/O) System, Swing, Annotations, Enums, Concurrency, Multi-Threading, Lambda and Generics.
- In-depth understanding of various Design Patterns like MVC, Builder, Singleton, Service Facade, Saga Pattern, Circuit Breaker.
- Experience in implementing Spring Core, AOP, JDBC, MVC and ORM modules.
- Experience in Designing and developing interactive Front- end applications using HTML5, CSS3 and AJAX.
- Experience in Designing and building dynamic and user interactive websites using JavaScript, AngularJS, React JS, Backbone.js, Express.js, Bootstrap, Node.js and jQuery.
- Used Redux for state management in React and used NgRx for state management in Angular.
- Experience in using Redux to manage the application state a Redux-promise, Redux-Thunk and Redux-saga.
- Experience in developing single-page web applications by using Angular with typescript and jQuery and working knowledge on HTTP access control CORS to enable cross-origin resource sharing in the project.
- Diverse experience utilizing tools in N-tier and Microservices architecture applications using Spring Boot, Spring Cloud config, PCF, AWS, Rabbit MQ, Kafka, Zookeeper, Cassandra, My SQL, Restful Web Services.
- Experience in developing Web and Enterprise applications using technologies JDBC, Servlets, Web Sockets, JSP, EJB, Java Server Faces (JSF), Java Persistence API (JPA), JNDI and JMS.
- Proficiency in developing web services (Soap, Restful) that include several components like SOAP, WSDL, XML, XSD, Axis2, JAXB, JAX-RS and JAX-WS.
- Expertise creating user validation forms lambda and sending data to server using RESTful services.
- Strong programming skills in designing and implementation of multi-tier applications using web-based technologies like Spring Boot and skilled with Spring Core such as Dependency Injection, Annotations, and Configurations.
- Experience in Installing, Configuring, Deploying, and maintaining Application and web Servers such as Oracle Web Logic, Red Hat JBoss Enterprise Application platform (EAP), Apache Tomcat Server, IBM Web Sphere.
- Experience in Integrating and deploying applications using Apache Camel, Apache CXF, Apache Kafka, ActiveMQ, Service Mix and JBoss Fuse Enterprise Service Bus (ESB).
- Strong Application Integration Experience using Connectors, Transformations, Routing, JMS, Kafka and RabbitMQ.
- Built Restful web API with Spring, Spring Boot, and testing APIs using Postman.
- Extensively worked on Spring JDBC, Spring Hibernate ORM, Docker containers and JPA.
- Experience working with SQL Database Components (Tables, Views, queries) mostly MYSQL, PostgreSQL, Oracle, DB2 and No SQL Databases like Mongo DB, Cassandra DB, DynamoDB.
- Experienced in using JAVA Spring JPA with Hibernate to integrate MySQL, or SQL Server into back-end web applications and performing CRUD and aggregation operations on a database.
- Solid proficiency with distributed version control tools such as GIT, GitHub, SVN and cloud platforms like Amazon Web Services (AWS) and their services like EC2, S3, AWS lambdas, ELB, Kinesis, SQS.
- Worked on cloud platforms like Microsoft Azure and their services like Azure Virtual Machines, Azure Blob Storage, Azure Functions, Azure Load Balancer and Google Cloud Platform and their services like Google Compute Engine, Google Cloud Storage, Google Cloud Functions, Google Cloud Load Balancing.

- Used Docker for containerization and Kubernetes to orchestrate these containers.
- Terraform has been used to provide the infrastructure in AWS.
- Jenkins and Gitlab are used for CI/CD pipelines.
- Jasmine and Karma have been used to test angular applications, Used Jest for testing of react applications.
- Experience in developing and supporting API Management tool - APIGEE.
- Experience in Continuous Integration (CI) like Jenkins, Hudson, Travis, Bamboo and Continuous Deployment (CD) tools like Elastic cloud.
- Used GraphQL and Rest API for client server communication.
- Experience with webserver like Tomcat, NGINX and Integrated Development Environments like PyCharm, IntelliJ, Eclipse, MyEclipse, JDeveloper and RAD.
- Experience in Agile software development process, Behavior Driven Development, Test Driven Development and Scrum.
- Good exposure in interacting with clients and solving application environment issues and communicate effectively with people at different levels including stakeholders, internal teams, and senior management.

TECHNICAL SKILLS

Platforms	Windows 2000/NT/ XP/Vista and Sun Solaris 2.8/2.9, UNIX, Red Hat
Programming	Java, Python, C, C++, SQL
Java Frameworks	Spring, Spring Cloud, Spring MVC, DI, Spring AOP, JSF 1.1, JSF 2.1, GWT, Spring Boot, Spring Batch, Spring Security, Spring Data, Struts 1.2, Struts 2.1,
Scripting Languages	JavaScript, TypeScript, Bash, Perl, Shell Script
Web Development	jQuery 1.8,1.9, jQuery, Dojo, Ext JS, Angular 11/12, JavaScript, CSS2, CSS3, HTML4, HTML5, Node.JS, Angular 16, React Js, Node Js, Express JS
Databases	Oracle, MySQL, MongoDB, Dynamo DB, NoSQL Sybase, SQL Server, DB2, Cassandra and MS Access 2000
Version Control	Git, Tortoise SVN, Rational ClearCase, GitHub, CVS
Tools	IntelliJ, VSCode, MySQL Workbench, Eclipse3.0, Net Beans5.0, Clear Case, Clear Quest, CVS, SVN, Perforce, Sub Version, Dream weaver 2000, JUnit, Jmeter, Maven, Gradle
Build Tools	Maven, Gradle, ANT 1.7,1.8,1.9,
DevOps Tools	Jenkins, GitHub, GitLab, Docker, Kubernetes, Slack, Amazon Web Services (Aws), aw, Google Cloud Platform (GCP), Splunk Cloud, Terraform
XML Technologies	XSLT, JAXP, JDOM, SAX, DOM, XPATH, XPOINTER, XML, XSD, DTD
Web Services Tools	RESTful, JAX-RS, JAX-WS, JAX-B, Apache CFX, WSDL, SoapUI 4.0,5.1, TcpMon, UDDI
Message Brokers	Apache Kafka, Amazon Kinesis, RabbitMQ, Apache Active MQ
Web Servers	Apache Tomcat, JBoss, WebLogic, Web Sphere, Glassfish
Defect Tracking	JIRA, Bugzilla, Rational ClearQuest
Methodologies	Agile (XP, Scrum), Rational Unified Process (RUP), Waterfall, Kanban

WORK EXPERIENCE

Wells Fargo - San Francisco, California

Sr. Java Full Stack Developer

Responsibilities:

Jan 2024 - Present

- Implemented Singleton, factory design pattern, DAO Design Patterns based on the application requirements.
- Implemented the online application by using Core Java, Multithreading, JDBC, JSP, Servlets, Web Services.
- Developed application using Frameworks Spring MVC, Spring Boot, Spring IOC, Spring AOP and Hibernate.
- Implemented business logic using Spring service layer and Spring DAO layer using Spring Framework.
- Implemented the RESTFUL web service to load the JSON files into the database SOAP UI was used to test the Web Service application.
- Implementing caching mechanisms in Java applications to improve performance.

- Designed and developed the REST APIs based Micro services using the Spring Boot.
- Extensive expertise in the Spring Framework, with a focus on developing cloud-native software solutions and leveraging its core features for scalable and robust applications.
- Development of Spring Boot applications with microservices and implemented the project by using Spring Web MVC module.
- Used SOAP based messaging format to transfer requests and responses and validated the request and responses against XML Schema Definition.
- proficiency in writing JPA queries using JPQL (Java Persistence Query Language) and Criteria queries for database operations.
- Extensively worked on Spring Bean wiring, Spring DAO and Spring AOP modules.
- Designed Graphical User Interface (GUI) for various Webpages using AJAX, HTML5, CSS, JSF, jQuery and JavaScript.
- Responsible for creating efficient design and developing User Interaction screens using HTML, CSS3, Bootstrap, JavaScript, Angular 11/12/14 and Node JS.
- Enhanced application performance by Angular 11/12 component-based development in view of future Angular 11/12 framework transitions.
- Implemented Router Module of Angular 11 to make the whole project a Single Page Application and add routers according to the requirements.
- Worked on some of the new features of Angular 11 like if else syntax, ng-templates, form validators, Router etc.
- Built Angular 11/12 framework including MVC architectures, different modules, specific controllers, templates, custom directives, and custom filters.
- Worked on Angular11 CLI to deal with troubleshooting and deal with the Angular11 virtual environment bugs.
- Created required data structures, triggers, and sequences in PostgreSQL Database.
- Worked with NoSQL databases such as Mongo DB and Dynamo DB.
- Used tools like SOAP UI for testing SOAP based Webservices.
- Deployed spring-boot micro services using AWS CloudFormation into EC2 containers.
- Created CloudFormation templates and documented the scripts as reference for other services.
- Used S3 buckets for storing the CSV files and used the Java AWS SDK to read and parse the data.
- Used AWS dynamo DB for storing config values and utilized as flags to control the code flow.
- Worked on moving the production SQL server blueprint to the new AWS RDS Aurora instance.
- Implemented a 'server less' architecture using API Gateway, Lambda, and Dynamo DB and deployed AWS Lambda code from Amazon S3 buckets.
- Implemented request and response objects using SOAP web services and created routes using Apache Camel.
- Developing spring boot microservice architecture applications and deploying them to AWS EC2 instances using CI/CD Jenkins Pipeline.
- Expertise in Apache Kafka message implementations and their integrations with the systems.
- Worked on associated REST tools such as Swagger, Postman and SOAP UI testing HTTP Requests and response.
- Manage and fix bugs with JIRA bug tracking application.
- GIT is used for defects, change tracking across the application.
- Performed Angular 11 end to end testing using Protractor framework and Integration testing methods and Behavioral driven are implemented using Selenium and Cucumber respectively.
- Wrote Junit test cases and ANT as a build tool for the services and prepared documentation.
- Involved in functional test of the application and tested Java applications using Functional Testing, JBoss and Log statements.

- Configured the project on Web Sphere application servers.
- Implemented AGILE methodology, participated in daily scrum meetings, code reviews, sprint planning and retrospectives as part of Agile methodology.

Environment: Java11, Hibernate, Spring Boot, Spring MVC, HTML5, CSS3, Design patterns, JPA, Maven, RESTful Web services, JSON, Kafka, MongoDB, Junit, Mockito, Nginx, GIT, JBoss, SQL, Putty, PostgreSQL, Docker, Angular 11/12/14, OpenShift, Kibana, SonarQube, Jenkins, IntelliJ, Windows10, JIRA, Confluence, Agile, AWS, EC2, S3, AWS Lambda, CloudWatch, Jasmine, Karma, DynamoDB, Spring Batch, Kubernetes, Amazon RDS, Tomcat, Splunk, Confluent, Kafka.

State Farm Insurance - Bloomington, Illinois

Oct 2021 – Dec 2023

Java Full Stack Developer

Responsibilities:

- Implemented the online application by using Core Java, Multithreading, JDBC, JSP, Servlets, Webservices.
- Implemented Singleton, factory design pattern, DAO Design Patterns based on the application requirements.
- Development of Spring Boot applications with microservices.
- Worked on server-side implementation using spring core, spring annotations navigation from presentation to other layers using Spring MVC and integrated spring with Hibernate using Hibernate template to implement persistent layer.
- Implemented the project as a multi-tier application using Spring MVC, Spring boot, Microservices& used core Spring concepts like AOP, IOC.
- Used MS360 Framework to extract the Json file for Microservices.
- Design & developed the REST based Microservices using the Spring Boot, Spring Data with JPA.
- Implemented the RESTFUL web service to load the JSON files into the database SOAP UI was used to test the Web Service application.
- Monitor service health check from Spring Boot admin console using swaggered UI registered microservices.
- Use the features of Spring Core layer (IOC), Spring AOP, Spring ORM layer and Spring DAO support layer in order to develop the application.
- Developed RESTful/SOAP Web Services in Mule ESB based on SOA architecture.
- Develop web applications using Object Oriented Programming language JAVA and J2EE Technologies such as JSPs, Servlets, JSON, AJAX.
- Implemented responsive design principles using media queries and Flexbox to ensure flawless rendering and optimal user experience across various devices and screen sizes.
- Designed dynamic and multi-browser compatible pages using HTML, CSS, jQuery, JavaScript and Angular 7.
- Developed Web pages using HTML5, CSS3 and Java Script.
- Used Angular 7 JS components like modules, controllers, and built-in and synchronizing models with single page Applications (SPA).
- Developed Angular 7/8material responsive web application pages using Angular 8 Material services, controllers and directives for front end UI and consumed RESTful web service API.
- Implemented optimized database indexing strategies, reducing query response times, leading to faster data retrieval and reduced database latency.
- Developed CSS styles for web pages using SCSS structure and implemented routing for a Single Page Application (SPA) using Angular 8.
- Experience creating Typescript reusable components and services to consume REST APIs using Component- based architecture provided by Angular7.
- Created responsive web application pages using Angular 7/8 Material, leveraging Angular 8-Material services, controllers, and directives for the front-end UI, while consuming RESTful web service APIs.
- Configured backup, alert systems, repairs, and monitoring for Cassandra clusters using OpsCenter.

- Generated Hibernate Objects and used Hibernate ORM for SOTI Publisher application.
- Implemented second level of caching with hibernates to improve read performance.
- Implemented Product-Retrieval Service as SOAP based service using Apache frame works.
- Developed and deployed Java applications on Microsoft Azure, utilizing Azure App Service to ensure high availability and scalability.
- Designed and implemented RESTful APIs using the Spring Framework, facilitating seamless integration between front-end and back-end systems hosted on Azure.
- Collaborated with cross-functional teams to migrate a monolithic application to microservices architecture on Azure, resulting in improved development agility and resource utilization.
- Integrated Azure SQL Database to store and manage application data securely, optimizing data retrieval times by implementing appropriate indexes.
- Collaborated with senior developers to create Azure Logic Apps for automated workflows, improving team efficiency in handling routine tasks.
- Gained proficiency in Azure DevOps for managing source code, builds, and deployments, enhancing team collaboration and version control.
- Implemented microservices architecture on Azure Kubernetes Service (AKS), containerizing applications with Docker, and orchestrating them with Kubernetes for seamless scaling and management.
- Development with relational database management systems RDBMS including Oracle, Sybase, MySQL, MS SQL Server, and PostgreSQL.
- Implemented real-time stream processing applications using Kafka Streams API, enabling data transformation, aggregation, and analysis within Java applications.
- Responsible for integrating applications for web- based environments using SOA.
- Production Support -- Managing production deployments in terms of software deliveries and overnight activities.
- Used jQuery APIs to implement cross-domain calls and handle JSON responses.
- Implemented logging using ApacheLog4j.
- Experience with stress testing/load testing using JMeter.
- Involved in performing Unit and Integration testing (JUnit). Strictly followed Test Driven Development (TDD).
- Used Eclipse based Spring Tool Suite (STS) for development and debugging Spring Boot applications, Micro services and deployed into OpenShift cloud platform.
- Work on AGILE Methodology (Scrum Framework) to meet timelines with quality deliverables.
- Used JIRA for project management, Issue tracking and monitoring errors and fixed the Errors and Bamboo as the integration tool and improved scalability of applications on cross-platforms.

Environment: Java 8, Java EE, Hibernate, Spring Boot, Elasticsearch, Dynamo DB, Spring MVC, JPA, TypeScript, Maven, RESTful Web services, JAX, Web Services, HTML5, CSS3, JavaScript, AJAX, JSON, Node.js, Angular 7, bootstrap, XML/XSL, Oracle 11g, JUnit, Groovy, Tomcat, Log4j, SQL, Azure, Docker, Jenkins, IntelliJ, GitHub, MySQL, Cassandra, IBM MQ, Bamboo, Git,

WellCare - Tampa, FL
Java Full Stack Developer
Responsibilities:

Dec 2019 – Sept 2021

- Implemented Different Design patterns like singleton, factory and J2EE design patterns like Business delegate, session facade, Value object and DAO design patterns.
- Good Knowledge in coded Java applications on both client-side and server-side using JDBC and advanced Multithreading.
- Used Spring Framework's IOC Dependency Injection to inject Service Object using Service Locator Design Pattern into Action Classes.
- Deployed Spring Boot based Microservices Docker container using Amazon EC2 container services and using AWS

admin console.

- Strong development skills in designing and developing Microservices along with Spring Boot and Coherence cache implementation.
- Used join point and advice Spring AOP modules for cross cutting concerns and IOC for dependency injection.
- Used Struts tag libraries in the JSP pages.
- Developed a controller Servlet that dispatches requests to appropriate Action Classes.
- Developed the application under J2EEArchitecture using Spring, Struts, Hibernate, Servlets, Web logic and JSP.
- Used Jenkins as a build tool for CI/CD (Continuous Integration and continuous deployment) process.
- Created computing and data resources on AWS using EC2. Installed Pivotal Cloud Foundry on EC2 to manage the containers created by Pivotal Cloud Foundry (PCF).
- Front end development utilizing HTML, CSS, and JavaScript leveraging the Bootstrap framework and a Java backend.
- Used Java Persistence API (JPA) and hibernate for performing the Database Transactions.
- Implemented and ensured ACID (Atomicity, Consistency, Isolation, Durability) transactions for database operations, ensuring data integrity and reliability in multi-user environments.
- Designed extensive additions to existing Java Web Application utilizing Service Oriented Architecture (SOA) techniques.
- Experience in managing Mongo DB environments from availability, performance, and scalability perspectives.
- Executing tasks on XML registry, XSLT/XQuery, and transformation capabilities.
- Worked on a project to retrieve log messages procured from Kafka by leveraging Spark Streaming.
- Experience in Design and Development of database systems using Relational Database Management Systems (RDBMS) including Oracle, DB2, MYSQL, NOSQL and Mongo DB.
- To meet scale and availability requirements, we selected Apache Cassandra for Cassandra's master less architecture, ability to scale horizontally easily and quickly to meet their growing data store needs.
- Generated Hibernate Objects and used Hibernate ORM for SOTI Publisher application.
- Exposed Survey API to other applications in DOE using Apache Axis2.
- Page design and development are done using Oracle BPM.
- Involved in implementing jQuery for providing interactive user interfaces.
- Written Test cases using JUnit to validate the application flows in different scenarios in the standalone application.

Environment: JDK1.8, JSP, Servlet, EJB, Spring, JavaScript, Hibernate, Multithreading, Cassandra, Query, Struts, Design Patterns, HTML, CSS, JMS, XML, Eclipse, Apache, Oracle ECM, Java 8.0, Struts, Webservice, SOAP, bootstrap, Microservices.

Ebay - San Jose, CA

April 2018 – Nov 2019

Java Developer

Responsibilities:

- Part of the technical team in the development of Model View Controller (MVC), Model architecture to handle configuration, database connectivity, and template management.
- Developed the GUI of the system using HTML, CSS, JSP and client-side validations was done using JavaScript.
- Utilized various Struts features like Tiles, tagged libraries and Declarative Exception Handling via XML for the design.
- Performed XML parsing using DOM parser.
- Implemented the application using Struts 2.1 framework which is based on Model View Controller architecture.
- Developed and deployed Java REST web services using Spring Framework.
- Developed presentation tier as HTML, JSPs using Struts Framework.
- Designed and implemented Spring ORM module to integrate Hibernate.

- Implemented SOA architecture with web services using SOAP, WSDL, UDDI and XML.
- Developed web components using MVC pattern under Struts framework.
- Used Struts Tiles Framework in the presentation tier.
- Developed Struts Action classes.
- Hands-on experience working on Linux Environment.
- Implemented UI screens using JSP, HTML, CSS, JavaScript, and JSON.
- Used Spring Core for dependency injection/Inversion of control (IOC), and integrated frameworks like Struts and Hibernate.
- Developed Servlets and Java Server Pages (JSP).
- Used JMS for reliable, asynchronous communication to send automatic email notifications to clients.
- Created test case scenarios for Functional Testing.
- Used JavaScript validation in JSP pages.

Environment: Java, J2EE 1.3, JSP 1.2, Servlets 2.3, EJB 2.0, Struts 1.1, IBM WebSphere server6.1, IBMDB29.0, JNDI 1.2, JDBC 2.1, Oracle 8i, UML, DAO, JMS, XML, WebLogic 7.0.

Tally solutions **June 2014 – Dec 2017**

Java Developer

Responsibilities:

- Requirements gathering from business and defining specifications for the system.
- Designed and developed Use-Case Diagrams, Class Diagrams and Object Diagrams using UML Rational Rose for OOA/OOD techniques.
- Developed ER and UML diagrams for all the design and documented all the process flows.
- Created the front-end interface using JSP Struts, Java Scripts, CSS, and HTML.
- Designed and Implemented MVC architecture using Struts Framework which involved writing Action Classes/Forms/Custom Tag Libraries JSP pages.
- Implemented Design Patterns like Singleton Factory to add definition to the design.
- Developed Action Forms and Controllers in Struts 2 framework.
- Developed business logic using Session beans, EJBs and deployed them on WebLogic.
- Used JavaScript MVC Frameworks Angular.js, Backbone.js.

Environment: Java, Core Java, EJB, JSP, Java Scripts, Struts, Java Servlets, Hibernate, CSS, Java Script, HTML, Angular JS, Webservices SOAP, WSDL, JUnit, Unix shell scripts, Solaris and Windows 2003 advanced server.
