
Kyle Hewett

Software Engineer

3033 Washington Blvd
Huntington, WV 25705
(304) 962-4052
kyle.a.hewett@gmail.com

Full stack software engineer with 9+ years of experience building scalable web applications and compliance systems. Proven track record of solo development from concept to deployment, specializing in PostgreSQL/PHP backends, modern JavaScript frameworks, and AWS infrastructure. Led development of fleet management and ELD compliance solutions serving the transportation industry.

TECHNICAL SKILLS

Frontend: JavaScript, Vue.js, jQuery, HTML5, CSS3, SASS/LESS, AngularJS

Backend: PHP, Node.js, Java, C/C++, C#

Databases: PostgreSQL, MySQL, SQLite, MongoDB

Cloud & DevOps: AWS (S3, EC2, EBS), Apache, Linux

Development Tools: Git, SVN, NPM, CPanel

Other: AJAX, SOAP, WordPress, Haskell, Lua

EXPERIENCE

Blue Ink Technology - Full Stack Engineer

JUNE 2016 - SEPT 2025

- Built and maintained comprehensive fleet management SPA serving hundreds of trucking companies with more than 3000 active users, featuring real-time vehicle tracking, driver management, and compliance reporting
- Developed FMCSA-compliant ELD software processing millions of driver hours monthly, ensuring regulatory compliance and reducing audit preparation time for carriers
- Built robust RESTful API with 100+ endpoints supporting real-time data synchronization between mobile ELD devices, web portal, and compliance reporting systems
- Architected PostgreSQL database schemas handling a hundred million+ records with optimized queries reducing average response times by over 50%

-
- Managed AWS cloud infrastructure including S3 for file storage, EC2 instances for application hosting, and EBS for database storage, ensuring 99.9% uptime
 - Single-handedly architected and developed complete full-stack solution from concept to production deployment, including Vue.js frontend, PHP API backend, and PostgreSQL database serving as foundation for company's core product

AMS-APP (Senior Capstone Project) - *Team Captain*

FEBRUARY - JUNE 2016

Led 3-person team developing AngularJS abstract management system for academic conferences with PHP/MySQL backend, managing project timeline and code reviews

JulNet Solutions, Huntington WV - *Website Administrator*

DECEMBER 2007 - JUNE 2016

- Administered four web servers with various configurations while maintaining multiple client websites
- Pioneered adoption of new technologies and platforms, training coworkers on implementation
- Automated repetitive tasks through custom scripting, improving operational efficiency

EDUCATION

Marshall University, Huntington WV - *Computer Science (Bachelor's)*

AUGUST 2005 - DECEMBER 2016
