

Antti T. Rissanen

Manager IT Applications

Grand Prairie, TX 75051 • 619-808-1432 • antti.t.rissanen@gmail.com • <http://linkedin.com/in/antti-rissanen>

PROFESSIONAL SUMMARY

Strategic and results-driven IT leader with expertise in Change and Release Management, Testing Projects, IT integration, M&A, and product ownership, backed by Agile and Scrum training. Proven success in leading high-performing, matrix-structured teams across BSS/OSS systems and cloud-based architectures, ensuring alignment with business goals and operational efficiency. Demonstrated ability to drive SDLC-compliant initiatives through effective stakeholder management, test execution, IT Security and automation. Skilled in coaching developers, removing roadblocks, and enhancing cross-functional collaboration. Adept at identifying technical gaps, prioritizing release delivery, and integrating innovative solutions using modern platforms such as AWS, GCP, Docker, and Kubernetes. Recognized for combining strategic thinking, customer experience focus, and technical depth to deliver impactful software solutions in high-pressure, deadline-driven environments, especially in payments, telecom and enterprise domains.

HIGHLIGHTS

- Introduced End-to-End QA model to Rentokil NA instead of siloed individual application testing.
 - Designed test strategy and wrote 600+ test cases for a mobile application testing project.
 - Supervised the creation of 2 E2E-test environments with 30+ connected applications.
 - Provided testing capability for 2 large data migrations into Rentokil-Terminix Pestpac each worth \$200M+.
 - Managed 100+ applications' information and deployments with Jira add-on Golive.
 - Processed 2500+ Change Requests as part of daily operations.
-

WORK EXPERIENCE

Rentokil-Terminix Dallas, TX

IT Manager - Environment Management | 04/2023 - 05/2025

- Led the Environment Management team at Rentokil-Terminix (RTX). Managed and coordinated the usage of test environments at RTX and produced an Environment Management Strategy for RTX.
- Supervised the creation of 2 integrated E2E-test environments with 30+ connected applications, which utilize Google Cloud Platform, Azure-cloud, API-connectivity and SAAS applications.
- Owned the daily operation of E2E-test environments ensuring 99% uptime and availability and coordinated their usage between different teams in sales, billing, technicians and configuration and IT asset management.
- Supported system administration through Google Endpoint management tools for the Google Cloud Platform, specifically for Cloud Run and Virtual Machines.
- Provided test and training availability for data migrations at RTX and developed data migration strategy in the test environments for 2 major migrations and 4 smaller company migrations.
- Built run book for data refreshes in the E2E-test environments prior M&A data migration testing.
- Managed 100+ applications' information and deployments with Jira add-on Golive.
- Performed main administrator duties for RTX's key application PestPac in the test environments.
- Supported M&A from smaller acquisitions to RTX Pestpac instance by overseeing testing activities during migrations and collaborating with multiple teams to complete the data migration.

IT Change Manager | 10/2021 - 04/2023

- Led the Change Management team at Rentokil NA and enforced the Change Management, release management and configuration management policies throughout the organization.
- Organized and chaired the Change Approval Board (CAB) which approves the IT change tickets on a weekly basis.
- Processed and mastered the scheduling of 2500+ Change Requests as part of daily operations.
- Provided Change Management training to 100+ Terminix IT employees joining the RTX team, ensuring seamless adoption during the Rentokil-Terminix merger.

- Reduced unauthorized changes by 25% through process education and improved documentation controls.

Test and Release Manager | 05/2019 - 10/2021

- Innovated the testing strategy following industry standards for the Rentokil NA company IT.
- Main accomplishment: strategic turn from individual application testing towards End-to-End testing with integrated applications and test data management. Coordinated the release efforts into the End-to-End environment.
- Championed the user payment testing with Paymentus credit card processing according to all regulatory requirements.
- Familiarized myself with Rentokil's Google Cloud Platform and system administration tools for Cloud Run and Virtual Machines.
- Auditing, troubleshooting and validation support for application teams.
- Enforced quality standards and licensing needs were met in the whole IT organization.

PREVIOUS WORK EXPERIENCE

- **Impellam Group**, Consultant Business Analyst at Duke Energy | Charlotte, NC | 09/2018 – 03/2019
- **Accenture**, UAT Lead, Test Lead, Senior Test Engineer at multiple clients in Mobile Devices, Telecom, Pharmaceutical and Insurance industries | Oulu Finland, San Diego CA, Bellevue WA, Trenton NJ, Charlotte NC | 10/2011 – 07/2018
- **Nokia Corporation**, Senior Integration Engineer | Oulu, Finland | 05/2009 – 10/2011

EDUCATION

- **Master of Science**, Computer Science, University of Oulu, Finland

SKILLS

- **Asset, Requirements & Change Management:** Strong background in change management using ServiceNow according to ITIL principles and practices. Experienced in business, functional, and non-functional requirement gathering and management; adept in writing features, epics and user stories in JIRA, Rally, and TFS.
- **Agile, DevOps & ITIL Practices:** Strong track record delivering business capabilities using Agile, Scrum, XP, and ITIL frameworks. Experienced in Agile ceremonies, backlog management, continuous improvement, and driving adoption of DevOps toolchains (CI/CD, automation, monitoring).
- **Software Development & Architecture:** Solid foundation in object-oriented programming, data structures, algorithms, and design patterns. Knowledgeable in CRM platforms, SaaS/cloud integrations, and enterprise system modernization.
- **Team Development & Leadership:** Proven ability to attract, mentor, and develop diverse, geographically distributed technical teams (PMs, BAs, QA, and engineers). Skilled in fostering collaboration, resilience, and transformation toward nimble, results-driven delivery.
- **Stakeholder & Cross-Functional Engagement:** Adept at building consensus across IT and business units, communicating technology roadmaps, and aligning deliverables with enterprise strategy. Recognized for balancing urgency with long-term strategy.
- **Operational Excellence:** Experienced in Quality Assurance operations with delivery goals; strong focus on risk management, compliance, and service quality in real-time, nonstop operational environments.
- **Product Management & Agile Delivery:** Experienced in managing end-to-end product lifecycle, from requirements gathering and market analysis to product vision, launch, and optimization. Skilled in writing and maintaining user stories, prioritizing backlogs, and leading Agile ceremonies (sprint planning, backlog grooming, reviews).
- **Business Analysis & Requirements Management:** Adept at gathering, prioritizing, and translating business requirements into actionable product features. Strong experience in stakeholder engagement and bridging business units with development teams to ensure alignment and timely delivery of high-quality features.
- **Data-Driven Decision Making:** Proficient in leveraging KPIs, product performance metrics, and customer feedback to refine priorities, improve user satisfaction, and optimize product performance.
- **Quality Assurance team leadership:** Proven leadership with test teams in various industries, on and offshore.
- **Analytical & Communication Skills:** Strong analytical mindset with a foundation in Computer Science; excels in verbal and written communication skills on technical insights across organizational levels to drive alignment and customer satisfaction. True professional in team work and ability to work independently.
