Education

University of California, San Diego

Bachelor of Science in Mathematics - Computer Science

September 2021 – March 2025

San Diego, CA

Relevant Coursework

- Linear Algebra
- Discrete Math and Graph Theory
- Statistical Methods
- Abstract Algebra
- Object-Oriented Design
- Software Tools and Techniques
- Computer Organization and Systems Programming
- Advanced Data Structures
- Data Science in Practice
- Linear Programming
- Deep Learning and Natural Language Processing
- AI: Probabilistic Models
- Machine Learning Methods and Models

Experience

Best Wok

January 2017 - September 2021

Restaurant Cashier and Operations Associate

Jackson, MS

- Processed 75+ customer orders daily, handling both in-person and digital transactions, resulting in 25% reduction in order fulfillment time while maintaining excellent customer satisfaction.
- Managed the flow of food preparation across 4 stations, implementing standardized quality checks that reduced food waste by 15%.
- Served as primary point of contact for 2 third-party delivery services (DoorDash, Grubhub) coordinating an average of 40 daily deliveries and reducing delivery time by 20% through improved communication protocols.

Projects

Calendar Assistant | ReactJS, HTML/CSS, VS Code, GitHub

Fall 2024

- Built a full-stack React application integrating Google Calendar and OpenAI GPT APIs, enabling intelligent calendar management that reduced scheduling time by 40% for a test group of 15 users.
- Implemented secure OAuth authentication and developed an intuitive dashboard interface displaying real-time calendar data.
- Engineered an automated scheduling system using natural language processing that analyzes availability patterns, reducing scheduling conflicts by 35% and eliminating the need for manual calendar adjustments.

Website for client's Portfolio | HTML/CSS, JavaScript, Figma, VS Code, GitHub

July 2024

- Developed a fully functional and responsive website for a local product designer, showcasing portfolios and case studies.
- Implemented interactive features including dynamic animations, image carousel, and project grid display, improving average session duration by 2.3 minutes.
- Handled front-end design, back-end integration, and deployment of website.

Death Penalty Analysis | Python, Jupyter Notebook, GitHub

Spring 2024

- Compiled and cleaned 6 years of crime data from 3 different states in Jupyter Notebook using Pandas and Scikit-learn, creating a standardized dataset of 8,000+ records.
- Analyzed state data through comparative and linear regression models, identifying a statistically significant correlation ($p < 0.05$) between death penalty legislation and homicide rates.
- Visualized findings using Matplotlib and Seaborn, creating 5 key data visualizations that were presented to the course Teacher Assistants and data science professor.

Technical Skills

Languages: Python, Java, C++, JavaScript, HTML, CSS, SQL

Developer Tools: VS Code, GitHub, Figma, Jupyter Notebook, Google Workspace

Technologies/Frameworks: Maven, ReactJS, Pandas, Scikit-learn, Matplotlib, Seaborn

Leadership / Extracurricular

Triton Gaming

October 2023 – April 2024

Live Stream Production Coordinator

UCSD

- Maintained low latency and high-quality, synchronized audio during live streams on platforms such as Twitch, ensuring seamless broadcast operations.
- Strengthened organizational branding by editing assets for a consistent overlay.
- Optimized streaming workflows and resolved technical issues in real-time, leading to a 40% boost in audience engagement.
