PROFESSIONAL EXPERIENCE

EDWARDS LIFESCIENCES | Irvine, CA

Sr. Business Analyst Consultant | Finance Systems July 2023 - Dec. 2024

Provided strategic support to Fortune 500 Global Accounting Directors by conducting in-depth analysis of complex downstream data from multiple finance systems, identifying issues, optimizing processes, and uncovering opportunities for system enhancements. Successfully designed, developed, and deployed scalable cloud data warehouses on the Snowflake platform, enabling robust global reporting through Tableau and Power BI. Empowered the organization with more dynamic operations and analytics tools, while driving a new way of working through Agile and Scrum methodologies

- Led global finance business in the development of a global data warehouse supporting OPEX, CAPEX, Sales, and Supply Chain, with data sourced from 6 systems (*JDE, Concur, Workday, Longview, Coupa, & Salesforce*).
- Designed on Power BI & Tableau 9 global dashboards serving 1,500+ global users across JAPAC, LATAM, EURO, US, and Canada, streamlining financial and operational reporting
- Authored Standard Operating Procedures (SOPs) to document business processes and dashboard utilization, improving operational consistency and knowledge retention
- Trained nearly 1,500 users on data analytics tools and reporting best practices, driving adoption and empowering self-service analytics across multiple global departments with over 3,000 users
- Projects directly contributed to the establishment of a Service Delivery Center, saving over 1,000 hours per week and projecting annual cost savings of ~\$3 million

PROFESSIONAL EXPERIENCE

SILVERGATE BANK | San Diego, CA

Senior Business & Process Analyst | Project Manager 2022 - 2023

Play a critical role in bridging business objectives with technology solutions by gathering requirements, translating them into functional specifications, and ensuring seamless software application development. Adept at facilitating stakeholder workshops, optimizing business processes, and mentoring analysts to foster a culture of continuous improvement.

- Spearheaded process automation for business and consumer wires via Fiserv Fedwire, optimizing operations for 1,600+ investors managing \$12B in deposits
- Implemented enterprise-wide automated workflows on ServiceNow, boosting operational efficiency across 4 divisions and 12 business units, while strengthening compliance and saving hundreds of man-hours weekly
- Led the core banking system migration for 500+ end-users, coordinating cross-functional teams to ensure timely delivery, minimal disruption, and smooth transition. Managed risks, timelines, and stakeholder communication, while overseeing training, testing, and support to guarantee a seamless user experience
- Key contributor in forming of enterprise Business Analyst Center of Excellence. Promoting best practices, continuous improvement, and professional growth through mentorship, collaboration, and knowledge-sharing

AXOS BANK | San Diego, CA

IT Business Analyst | 2021 - 2022

Business Analyst skilled in working with all levels of stakeholders to drive development, optimization, and implementation of enterprise systems. Adept at defining product vision with key stakeholders to create actionable project roadmaps. Proficient in leading Scrum teams in SDLC from requirements, execution, testing, and implementation by enforcing Agile principles

- Served as Proxy Product Owner for the development, deployment, and adoption of 3 enterprise systems—Wires Management, HR Management, and Work Planners—leading to the elimination of several SaaS products and driving annual cost savings of nearly \$2M
- Collaborated with the IT Center of Excellence to implement best practices, process improvements, and automated ServiceNow workflows for Tier 1, 2, and 3 tickets, driving a 40% YoY improvement in SLA
- Leveraged Microsoft Azure DevOps to transform requirements into technical backlog items, reporting key events to stakeholders, while leading Scrum team ceremonies to ensure seamless execution and alignment
- Designed & led user testing and training for enterprise applications, onboarding over 600 users

BANK OF THE SIERRA | Fresno, CA

Business Analyst | 2016 - 2019

Bridging the gap between business and technical teams by managing stakeholder relationships, leading system implementations, and optimizing financial operations. Proven success in core banking conversions, commercial lending analysis, and process automation to drive efficiency and operational excellence.

- Project Lead for Jack Henry testing and core banking system conversions during acquisition projects, ensuring seamless transitions and minimal disruptions, resulting in a 100% successful conversion rate across 15 branches and over 250 users
- Collaborated across functions to analyze branch operations, identify optimization opportunities, and implement solutions by creating process maps and procedures in to provide clear guidelines for the teams across 30 branches
- Performed system testing on vendor integrations, validating the product or system configuration supported business needs

Float Operations Manager | 2015 - 2016

- Float Manager, overseeing 10-20 staff members in branch operations during the absence of the Operations Manager
- Set up branch and client hardware, along with treasury service software at onsite locations. Acted as the first responder to technical issues, ensuring quick resolution to maintain client satisfaction and system performance
- Conducted quarterly and annual audits on equipment and system performance, proactively addressing issues with vendors
