

Biruk Lekew, Front-End Web Developer

United States, 2407299041, United States, 2407299041, biruklakew23@gmail.com

SUMMARY

Detail-oriented and creative Front-End Web Developer with 8+ years of experience building responsive, cross-browser compatible websites and e-commerce platforms. Skilled in HTML5, CSS3, jQuery, and PHP/MySQL, with hands-on experience in WordPress, Shopify, BigCommerce, and Magento development. Adept at managing multiple projects, collaborating remotely across teams, and delivering pixel-perfect, high-performance user experiences. Passionate about clean code, design precision, and contributing to a culture of innovation and excellence.

WORK EXPERIENCE

02/2022 – 07/2025	Front-End Web Developer, Infosys	Remote, United States
	- Developed and maintained responsive, mobile-first websites using HTML5, CSS3, jQuery, and Bootstrap. - Translated design mockups from Figma/Adobe XD into fully functional front-end layouts. - Ensured cross-browser and cross-device compatibility, reducing UI-related bug reports by 40%. - Integrated dynamic functionality using AJAX and PHP/MySQL, enhancing page interactivity and performance. - Customized and optimized WordPress and Shopify themes, ensuring SEO-friendly and fast-loading sites. - Collaborated with global, multicultural teams using Agile workflows and version control (Git). - Performed regular website audits to address performance, accessibility, and security issues.	
04/2021 – 02/2022	Web Developer, Department of Homeland Security	Virginia, United States
	- Designed and implemented front-end solutions for e-commerce platforms using Magento and BigCommerce. - Managed multiple projects simultaneously, ensuring timely delivery and adherence to design specifications. - Enhanced website load times and optimized CSS/JS assets through minification and CDN integration. - Supported backend teams in integrating API endpoints and maintaining databases using PHP/MySQL. - Provided ongoing site maintenance, troubleshooting, and updates to ensure optimal performance and uptime.	

03/2018 – 04/2021	UI Developer, Nationwide Insurance	Virginia, United States
	• Responsive Web Application: Developed a high-performance SPA optimized for mobile and desktop, improving user engagement by 30%. • Delivered high-performance Angular and React applications, managing complex workflows for enterprise clients. • Collaborated on vulnerability management initiatives, ensuring compliance with OWASP standards. • Performed thorough code reviews and provided mentorship, enhancing the technical proficiency and readiness of team members. • Contributed to architectural discussions regarding scalability, security, and maintainability, influencing long-term product strategies.	
03/2016 – 11/2017	UI Developer, CVS Health	Virginia, United States
	• Participated in code reviews, sprint planning, and peer mentoring, promoting team-wide adoption of Angular best practices. • Championed the implementation of modern JavaScript (ES6+) features, significantly reducing technical debt in legacy codebases. • Developed secure web applications focused on mitigating injection and authentication vulnerabilities. • Instituted testing frameworks (Jasmine, Jest, Cypress) to ensure regression-free deployments. • Contributed to cross-functional Agile teams, delivering business-critical features on time and within scope.	

EDUCATION

2008 – 2011	Unity University B.S., Computer Science	Addis Ababa
-------------	--	-------------

Back-End: PHP, MySQL	CMS & E-Commerce: WordPress, WooCommerce, Shopify, Magento, BigCommerc
Version Control: Git, GitHub, GitLab	Tools: Figma, Adobe XD, Photoshop, Chrome DevTools
Testing & Optimization: Lighthouse, GTmetrix, Responsive Design Test	

SUMMARY

6+ years of front-end development experience with a strong focus on React, Angular, HTML, CSS, and JavaScript. Proficiency in JavaScript/TypeScript and experience with modern front-end frameworks and libraries. Skilled in optimizing applications for speed, performance, and cross-browser compatibility. Experience working with RESTful APIs and JSON, with the ability to integrate front-end applications with back-end services. Familiarity with cloud environments, especially Azure, is a plus, along with basic knowledge of CI/CD pipelines. Hands-on experience with version control systems (e.g., Git) and debugging tools for robust front-end development.
