- Lead Administrator for SIP implementation to VoIP systems.
- Lead SCADA Network Architect & Systems Design.
- Lead Administrator for EDR - Crowdstrike Falcon Complete.

CERTIFICATIONS

ISC2

- Certified in Cybersecurity

Zoho / Manage Engine

- OpManager Monitoring
- ADManager Plus
- AdSelfService Plus

ExitCertified

- MS OneDrive, Teams, SharePoint - Administration and Troubleshooting
- Red Hat System Administration I
- VMware vSphere: Install, Configure, Manage ESXi 8.0

Learning Tree International

- CompTIA Security+
- Symantec Endpoint Protection 14 - Plan and Implement / Manage and Configure
- Symantec Endpoint Protection 14 - Maintain and Troubleshoot
- MS Office 365: 10097 - Administration and Troubleshooting

New Horizons Learning Center

- VMware vSphere: Install, Configure Manage ESXi 5.0
- Microsoft SCCM 2012: 10748 - Planning and Deploying System Center Configuration Manager 2012
- Microsoft SCCM 2012: 20696 - Administering System Center Configuration Manager with Intune

Siemens

- Teamcenter PLM Application Administration
- Teamcenter PLM Product Data Management

Incat

- Ideas-10, 11, 12 Administration & Data Management

EDUCATION

Eastern Michigan University

- Bachelor of Science, Political Science

Senior Back Office Administrator - Inalfa Roof Systems, Inc. (Auburn Hills, MI)

March 2017 – January 2020

Providing innovative and comprehensive roof systems to the global automotive industry.

Key Responsibilities

- North American Technical Infrastructure Lead.
- North American Technical Security Officer – liaise with Chief Security Officer / Compliance Officer.
- Global Symantec Endpoint Protection (SEP) Administrator.
- Architected MS SCCM 1702 (currently 1906) global hierarchy with CAS, 3 primary sites and 10 distribution points for application / package deployment, WSUS Server / client updates, task sequencing for Win10 OS deployments and driver injections (8000+ nodes globally).
- VMware upgrade from 5.5 to 6.5 to 7.0 – Dell PowerEdge Hosts.
- VMware vRealize Operations (Advanced) 7.0 Suite – vRealize Operations (vRO), vRealize Automation (vRA), and Log Insight.

Senior Systems Administrator - BAE Industries, Inc. (Auburn Hills, MI)

January 2014 – March 2017

A proven leader in the metal manufacturing industry, BAE manufactured, produced, assembled and delivered engineered products.

Key Responsibilities

- Lead virtualized server environment - reduced Server footprint from 74 physical servers to 4 Virtual Host Servers running 46 VMs.
- Cutover from WatchGuard Firebox to Cisco ASA5505 including Remote User VPN.
- Upgraded to 1GB Switched environment with VLANs segregation for Users/CAD/Wireless/Servers.
- Server Core Switch - Dell N4032 10GB switch with four 40GB Modules - FEA Server.
- Upgraded Windows Exchange server from 2003 to 2010.
- Created, tested and implemented disaster recovery solution including co-location.
- Hardened security for wireless, user PCs (and Laptops), email and servers (Wireless MAC Address filtering / Kaspersky EndPoint10 and KSV Virtualized AV/Cisco ESA and MX Logic SPAM filters).
