Skills

Dedicated and seasoned Senior Full Stack Engineer with a decade of professional experience, specializing in the design, development, and optimization of robust web applications. Proven expertise in leveraging cutting-edge technologies such as **Angular**, **React**, **.Net**, **ASP .Net**, **C#**, **C++**, and **Azure**, **AWS** to deliver scalable and high-performance solutions. Adept at implementing Microservices architecture to enhance modularity, maintainability, and scalability of complex systems. Extensive hands-on experience in the entire software development life cycle, from conceptualization and architecture design to deployment and maintenance. Proficient in building seamless user experiences through innovative front-end development and ensuring efficient and reliable back-end functionalities. A track record of successfully leading cross-functional teams, providing mentorship, and driving collaboration across various projects. Demonstrated ability to translate business requirements into technical solutions, resulting in the delivery of impactful and value-driven software products. Committed to staying abreast of industry trends and continuously expanding technical skill sets to drive innovation and excellence in Full Stack Engineering.

- Angular.JS, Angular 8, Angular 12, Angular 14
- Blazor Server, Blazor WebAssembly (WASM)
- RxJS, NgRx, Observeable, Angular CLI
- React, Redux, Mobx, Next, React Hook
- Html5, Sass, Css, Media query, Figma, MUI, TailwindCSS, Bootstrap
- JavaScript, TypeScript
- ES5, ES6, ES7
- Webpack, Babel, Prettier, ESLint, TSLint
- .Net, ASP .Net, C#, C++, .Net Core, MVC
- Node.js, Express.js, Nest.js
- Restful API, GraphQL API
- Ajax, Axios, HttpRequest
- MySQL, MongoDB, PostgreSQL, Oracle, Redis, MSSQL, SQLite
- Azure, Azure App Service, Azure Virtual Machines, Azure Functions, Azure SQL Database, Azure Blob Storage, Azure Kubernetes Service (AKS), Azure DevOps

- Microservices, Rabbit MQ, Apache Kafka
- CI/CD, Docker, Kubernetes, Jenkins
- Agile, Scrum, Kanban
- NUnit, xUnit, Jasmine/Karma, Unit Testing, Jest, Cypress, React Testing Library
- JSDoc, Storybook, Swagger, OpenAPI
- Mentoring, Leading a team

Experience

Jan 2020 - PRESENT

Infosys, Remote NY US- *Senior full stack engineer*

- Spearheaded the development of a cutting-edge e-commerce application using **Angular**, **RxJS**, and **TypeScript** on the **frontend**, and **.NET Core**, **C#**, and **ASP.NET MVC** on the **backend**, ensuring high **performance**, **scalability**, and **maintainability**.
- Leveraged **Blazor** and **Angular's** powerful features like **observables** and reactive programming paradigms to create **dynamic** and **responsive** user interfaces, enhancing user experience and engagement.
- Designed and implemented **RESTful** Web APIs and **microservices** architecture using **.NET Core**, facilitating **seamless communication** between frontend and backend systems, and enabling **efficient data exchange** and processing.
- Integrated **Azure Cloud** services such as **Azure App Service**, **Azure SQL Database**, and **Azure Blob Storage** for **deployment**, **hosting**, and **data storage**, leveraging the **scalability**, **reliability**, and **security of cloud computing**.
- Employed **HTML5**, **CSS3**, and **SCSS** to craft visually appealing and **responsive UI components**, ensuring cross-browser compatibility and adherence to design specifications.
- Implemented comprehensive **testing** strategies including **unit testing**, **integration testing**, and **end-to-end testing** using frameworks like **NUnit**, **xUnit**, and **Jasmine/Karma**, ensuring **code quality**, **reliability**, and **robustness**.
- Demonstrated strong **leadership** skills as a **technical lead**, **guiding** and **mentoring junior team members**, and fostering a **collaborative** and **innovative work environment** focused on **continuous learning** and **improvement**.
- Played a key role in the adoption of **microservices architecture**, breaking down **monolithic applications** into smaller, decoupled services to **improve scalability**, **flexibility**, and **maintainability**.
- Actively participated in **agile** development methodologies including **Scrum** and **Kanban**, leading **sprint planning**, **daily stand-ups**, and **retrospectives**, and driving cross-functional collaboration to deliver high-quality software solutions on time and within budget.

- Conducted **code reviews**, **mentored junior developers**, and contributed to the continuous improvement of coding standards and best practices within the front-end development team using **JSDoc**, **Storybook**, **ESLint**, **TSLint**, **Prettier**, **Babel**.

Feb 2017 - Jan 2020

Capital One, Rochester NY– *Senior full stack engineer*

- Spearheaded the development and enhancement of the **Digital Banking Platform** at Capital One, a mission-critical product providing a seamless and **secure banking** experience to **millions of users**.
- Led the implementation of a modern, responsive front-end using cutting-edge technologies such as **Angular**, **React.js** and **Tailwind CSS**. Ensured a user-friendly interface and optimal user experience for diverse banking functionalities.
- Architected and maintained robust back-end services using **ASP .Net** facilitating secure data transactions and seamless integration with various **banking APIs**.
- Implemented a **microservices** architecture to modularize the platform, addressing scalability challenges and improving maintainability. Each microservice focused on specific **banking features**, enabling **efficient development** and **deployment**.
- Addressed stringent data **security** and compliance requirements by implementing **encryption** standards and adhering to industry regulations. Ensured the **secure storage** and transmission of **sensitive user information**.
- Integrated third-party financial services and APIs, streamlining features like **real-time transaction** updates, **account linking**, and external account management.
- Challenge was overcoming the **complexity** of **real-time transaction** processing and ensuring data consistency across microservices.
- Solved it by implementing **event-driven architecture** using **Azure Event Grid**, **Azure Service Bus**, **Azure Event Hubs**, **Azure Functions**, **Azure Event Hub Capture**, enhancing reliability and data consistency.
- Embraced Agile methodologies and collaborated closely with cross-functional teams, including UX/UI designers, product managers, and QA engineers, to deliver iterative improvements and features.
- Improve code quality using **Prettier**, **JSDoc**, **Storybook**, **ESLint**, **TSLint**, **Babel**.
- Established a robust **CI/CD** pipeline using **Docker**, **Jenkins**, ensuring automated **testing**, code quality checks, and seamless deployment of new features, resulting in faster time-to-market.

Nov 2014 - Feb 2017

Cognizant, Rochester NY– *full stack engineer*

- Spearheaded the development of **DoorDash's** cutting-edge food delivery app using **Angular** for the frontend and **.NET** for the backend, driving innovation and excellence in user experience.
- Designed and implemented responsive user interfaces with **Angular, HTML5, CSS3, and TypeScript**, ensuring a seamless and intuitive experience for millions of customers.
- Developed **RESTful APIs** and **microservices** architecture with **.NET Core, C#, and ASP.NET MVC**, enabling scalable and efficient communication between frontend and backend systems.
- Integrated **third-party APIs** for **real-time tracking, secure payments, and efficient order processing**, enhancing the functionality and usability of the platform.
- Implemented robust testing strategies including **unit testing** with **Jasmine/Karma** and backend testing with **NUnit**, ensuring high code quality and reliability.
- Leveraged **Azure Cloud services** for deployment, hosting, and data storage, optimizing scalability, reliability, and security.
- **Collaborated** closely with cross-functional teams to **gather requirements, define project scope, and deliver high-quality solutions** on time and within budget.
- Provided technical **guidance** and **mentorship** to junior engineers, fostering a collaborative and innovative work environment.
- Led **agile** development methodologies including **Scrum** and **Kanban**, driving continuous improvement and delivery of high-impact features.

Education

Sep 2011 - Jul 2014

New York University, New York– *Bachelor's degree in computer science*
