SUMMARY

- Over 12 years of professional service experience in oracle database administration including installations, upgrades, patching, space management, OEM management and performance tuning.
- Expertise in backup and recovery, and cloning using RMAN and Data Pump on oracle 19c databases.
- Led several 19c database cross platform migration projects from on-premise to Azure web service cloud.
- Experience in managing Oracle HA environments such as RAC, Exadata, Golden Gate and Data Guard.
- Experience in handling multitenant architecture including creation, cloning, plug/unplug and relocating PDBs in Oracle 19c.
- Worked for multiple industries including banking, telecom and data analytics with prime focus on delivering database-related services in critical 24/7 production environments.

TECHNICAL SKILLS

Languages/ Technologies	SQL, Oracle PL/SQL, C, C++, Java
Scripting Languages	UNIX Shell Scripting, PowerShell
Database	Oracle (19c, 12c, 11g, 10g, 9i, 8i)
Operating System	Sun Solaris, HP Unix, AIX and RedHat Linux, Windows
DB Tools and Platforms	SQL*Plus, SQL*Loader, OEM, Toad, SQL developer, DBCA, AWR, ADDM, Putty, Oracle RAC, Oracle Exadata, AWS
Data Security and Backup	RMAN, Data Guard, Flashback, Transparent Data Encryption (TDE)
Ticketing Tools	BMC Remedy, Service Now, Jira.

WORK EXPERIENCE

Statistics Canada, Canada (May 2020 - Present)

Oracle Database Administrator

- Created and configured 12c and 19c Multitenant Container databases (CDBs) and Pluggable databases (PDBs) on Linux, Solaris and AIX.
- Experienced in applying patches including CPU, One-off patches on standalone and RAC databases.
- Performed migrations from on-premise to cloud (Azure web service, AWS) for 19c databases.
- Performed backup and recovery, cloning and database refresh using RMAN in 12c,19c databases.
- Conducted fortnightly maintenance by performing database reorganization.
- Restored test backups in mock drills for disaster recovery.
- Recovered databases using Flashback with GRP (Guaranteed Restore Point).
- Analyzed AWR/ADDM reports for Oracle wait events and time-consuming SQL queries for 19c databases.

- Implemented Huge Pages to improve performance by allowing larger memory pages.
- Installed OS watcher to analyze system data to enhance performance.
- Used Explain Plan, Oracle hints and created new indexes to improve query performance.
- Created, configured and set up RMAN Catalog databases and registered target databases with catalog.
- Implemented Database Wallet for Oracle 19c.
- Alert logs, archive logs, trace files and backup verifications as part of daily activities.
- Mitigated Database link related issues.
- Setup jobs and events using Oracle Enterprise Manager (OEM) console.

University of Ottawa, Canada (January 2020 - April 2020)
Programmer Analyst

-
- Worked on Library Management System Koha for the Official Languages and Bilingualism Institute (OLBI).
 - Handled back-end and front-end services using Unix, MySQL, and Apache platforms.

Wipro Limited, India (November 2017 - July 2019)
Senior Administrator

-
- Administered databases on Real Application clusters (RAC) and troubleshoot CRS/GRID Infrastructure and ASM issues.
 - Configured Oracle Active Data Guard to ensure high availability, data protection and disaster recovery.
 - Synchronizing DC-DR for eliminating lag issues.
 - Configured and installed Golden Gate for data replication, setting up both unidirectional and bidirectional replication to ensure seamless data synchronization across systems.
 - Ensured database security and availability including database backup and recovery using RMAN.
 - Data Pump export and import at full, schema, tablespace and object level for clients.
 - Experience in performance tuning using AWR and ADDM reports.
 - Experience in Change data capture (CDC) replication technology for real-time data integration and synchronization across heterogeneous systems.
 - Performed RAC conversions.
 - Worked on cross platform database migration from AIX to Linux using Data Pump.
 - Analyzed DB growth and planned for maintenance based on fragmented data.
 - Resolved several tablespaces, archive log, redo log and user management issues.
 - Performed Database patching and upgrades.
 - Proficient in working with Grid Control and OEM Cloud control 13c/12c and OEM 11g/10g.

Accenture Services Pvt Ltd, India (July 2012 - October 2017)
Senior Analyst

-
- Performed oracle database creations and decommissions on Linux, Solaris and AIX platform.
 - Extensively performed backup, restore, cloning of Oracle RAC databases using RMAN.
 - Performed several Oracle software and client installations.
 - Setup Standby database/ Oracle Data Guard to protect against failures.
 - Applied baselines and SQL profiles to tune performance.
 - Performed CPU patching using OPatch.
 - Handled several schema, table and object level refreshes.
 - Resolved bottlenecks of long-running queries, blocking sessions and deadlocks.
 - Troubleshoot network, user connection and account related issues.
 - Extensively used TNG and Autosys schedulers for running SOD/EOD batch executions for a banking client.
 - Created shell scripts and scheduled in crontab to automate monotonous tasks, saving an estimated 15 hours per week in manual effort.
 - Performed data loading into data warehouse and extraction of Reports via Business Objects.

CERTIFICATIONS

- NSE's Certification in Capital Market - MAY'16
- NSE's Certification in Financial Market - JULY'15
- Oracle Database 10g Administrator Certified Associate (OCA) - FEB'15
- Oracle Database SQL Certified Expert - APRIL'14

CAREER ACHIEVEMENTS

- Accenture Celebrates Excellence (ACE) - Client Champion award in FY'15 Q4
- Accenture Celebrates Excellence (ACE) - Numero Uno award in FY'14 Q4
- Participated at the State Level Project Competition "Techno Fest" in the year February 2009.

EDUCATION

- **Master's in Computer Science**
 - University of Ottawa, Ottawa, Canada
- **Bachelor of Engineering, Information Technology**
 - Mumbai University, Mumbai, India
