SUMMARY

Results-driven Software Engineer with 3+ years of experience in **full-stack development**, **AI agent design**, and **cloud-native solutions** using **.NET**, **Angular**, **Azure**, and **AWS**. Skilled in **microservices**, **CI/CD**, and **scalable** enterprise software development across the SDLC.

TECHNICAL SKILLS

- Programming Languages:** C#, Python, Java, JavaScript, TypeScript, Ruby, SQL
- App/Web Technologies:** .NET, Angular, Razor Pages, Flask, REST APIs, Ocelot API Gateway
- Database & Cloud Technologies:** Azure (App Service, Functions, ACR, Azure SQL, CosmosDB, Redis), AWS (EKS, EC2, RDS, WAF, SNS), MySQL, PostgreSQL, Docker, Kubernetes, Helm
- Software:** Git, Azure DevOps, GitHub Actions, YAML Pipelines, Pytest, CI/CD, Monitoring & Alerting (Prometheus, Grafana, OpenTelemetry), Postman
- Development Practices & Methodologies:** Agile Development, Software Development Lifecycle (SDLC), Object-Oriented Design (OOD), API Integration, Software Testing, Performance Optimization, Scalability, Cross-Functional Collaboration

WORK EXPERIENCE

AI and Software Developer – Versant Health, NY, USA Jun 2025 – Present

- Enterprise System Deployment:** Built and deployed EAI system for 200+ products using .NET, Angular, T-SQL, Razor Pages, and Azure AD integration on Azure DevOps, App Service, ACR, Docker, and Azure SQL; implemented secure networking FW rules.
- Agentic AI Development:** Designed and deployed multi-node custom LLM agents using LangChain, LangGraph, OpenAI, Databricks, and MCP, implementing dynamic tool chaining, prompt adaptation mechanisms, and multi-agent orchestration to achieve a 90% improvement in adapting to custom user prompts.
- Legacy Modernization & CI/CD Automation:** Modernizing legacy ASP.NET monolithic applications by integrating Azure Active Directory and implementing CI/CD pipelines using TeamCity and Octopus Deploy; deploying applications to local servers and configuring environments, while establishing standardized architecture and code structure to enhance adaptability, usability, and deployment efficiency for modern scalable systems.

Graduate Teaching Assistant – University of Maryland, College Park, MD, Jan 2025 – Aug 2025

- Teaching & Automation Support:** Supported MSML606 (Algorithms & Data Structures for ML) and MSML604 (Optimization) by designing Python assignments, mentoring students on recursion, graph algorithms, and numerical optimization, and developing CI-based GitHub Classroom grading pipelines with Pytest and custom test cases, improving code validation efficiency and reducing manual grading workload by 50%.

Software Development Associate – Epicor Software, Bangalore, India Aug 2022 – Aug 2024

- Cloud-Based SaaS Platform Development:** Developed Integration Portal by embedding Workato into Epicor ERP, enabling automation using Angular, TypeScript, .NET C#, and Azure Functions.
- Microservices Architecture Modernization:** Refactored and modernized the entire base architecture, reducing delivery effort from 5 sprints to 2 by building a microservices-based system with FaaS, CosmosDB, and Redis, transforming a legacy ERP into a scalable SaaS platform on Azure.
- Technical Support & Issue Resolution:** Resolved 100+ tickets and 80+ customer issues, delivered 15,000+ lines of maintainable code.
- CI/CD & Deployment Optimization:** Transitioned pipelines to YAML-based CI/CD in Azure, enabling parallel execution, multi-region releases, and integrated approval workflows for production.
- Mentorship & Collaboration:** Trained and mentored two interns, recorded 10+ KT sessions and reviewing deliverables while collaborating directly with clients.

Software Development Intern – Epicor Software, Bangalore, India Jan 2022 – Jul 2022

- ERP Integration Development:** Built ERP connectors on Automation Studio using Python, Ruby, and Workato, enabling seamless third-party integrations and reducing deployment time by 95%.

Web Development Intern – The Sparks Foundation, Bangalore, India Jul 2021 – Aug 2021

- Banking Website Development:** Built a client management platform with secure transfers and transaction tracking using HTML, CSS, Python, and MySQL, serving 500+ users.

PROJECTS

Resilient eCommerce Microservices | .NET 8, API Gateway, Ocelot, Rate Limiting, Caching  Jan – 2024

- Microservices Architecture:** Built a scalable eCommerce platform with .NET 8, Ocelot API Gateway, rate limiting, and caching; developed independent services for products, orders, auth, and user management with MySQL and shared libraries.

Scalable and Secure Cloud-Native Platform | AWS, EKS, Docker, K8s, Helm, EC2, RDS, WAF  Dec – 2024

- Built a cloud-native platform on AWS, integrating EKS, Docker, K8s, Helm, and OpenTelemetry with Prometheus, Grafana, and AWS SNS for monitoring and alerting. Automated CI/CD using GitHub Actions and managed infrastructure with CloudFormation and modularized YAML.

EDUCATION

University of Maryland, College Park Anticipated May 2026
Master's in software Engineering Maryland, USA
