kamalaksha.va@northeastern.edu | [linkedin.com/in/varsha-kamalaksha](https://www.linkedin.com/in/varsha-kamalaksha) | (857) 381 -6110

Technical Program Manager with expertise in hardware and software, driving cross-functional programs involving budget oversight, risk mitigation, and stakeholder engagement. Skilled at PI Planning, Roadmap Alignment, and Agile/Waterfall execution, transforming strategic goals into quantifiable results while ensuring seamless integration of engineering, supply chain, and quality processes.

SKILLS AND EXPERTISE

- **Project Execution:** End-to-End Delivery, Resource Optimization, Risk & Change Management, Global Stakeholder Engagement
- **Methodologies & Frameworks:** Agile/Scrum/Kanban/SAFe, Waterfall, PI Planning, Sprint/Backlog Grooming, OKRs
- **Hardware-Software Integration:** Firmware Coordination, Embedded Systems, V&Q Processes, Product Lifecycle Management
- **Data-Driven Decision Making:** KPI Tracking, Predictive Analytics, Performance Optimization, Critical Path Analysis
- **Tools & Technologies:** Jira, MS Project, Confluence, Asana, Excel, Power BI, SQL, Python, Tableau, Smartsheet
- **Cross-Functional Leadership:** Executive Reporting, Roadmap Alignment, Stakeholder Engagement, Conflict Resolution

PROFESSIONAL EXPERIENCE

Entegris | Technical Program Manager

Jan 2024 - Aug 2024, MA

- Led a **\$2M+ next-gen product launch** by integrating **Agile sprints and Waterfall milestones**, synchronizing **15+ cross-functional teams across three global sites**, ensuring compliance through gated **stage-wise development**, and achieving **100% regulatory approval two weeks ahead of schedule**, securing a critical market window.
- Resolved **bottlenecks** by orchestrating cross-functional alignment between **Equipment and NPI teams**, reallocating resources, and personally supporting verification tasks, preventing schedule slippage and maintaining product launch integrity.
- Averted **\$250K+ in potential delays** by mitigating a **resource shortage crisis**, collaborating with the supply chain to reallocate underutilized materials, securing backup vendors, and ensuring **zero downtime in production** through real-time risk management.
- Redesigned a **failing product** by halting production, conducting defect analyses, and introducing an advanced **filtration strategy** that exceeded customer specifications, restoring product viability and enhancing brand credibility.
- Developed an **automated Python/SQL-based V&Q monitoring system**, eliminating **80% of manual reporting**, reducing human errors, and enabling **early detection of failures**, significantly improving operational efficiency.
- Optimized risk mitigation strategies by implementing **predictive analytics for supply chain disruptions**, reducing revalidation delays by **15%**, and improving milestone adherence across high-impact manufacturing projects.
- Standardized **PMO portfolio tracking** by integrating **Jira and Accolade**, automating pipeline visibility, and slashing **management overhead by 80%**, ensuring executive teams had real-time access to project health and bottlenecks.
- Strengthened **roadmap alignment and OKR planning** by collaborating with leadership to establish **data-driven strategic objectives**, ensuring program initiatives directly supported corporate goals and enhancing decision-making accuracy.
- Bridged a major **stakeholder disagreement** between cross-functional teams by presenting a thorough **ROI analysis** demonstrating long-term cost savings and market share gains, securing alignment on a solution balancing **performance** and **financial** targets.
- **Pioneered** the development of a **next-generation filtration solution** that **redefined industry standards**, **earned recognition at SEMICON West**, and **captured the interest of leading semiconductor manufacturers**, further **strengthening market leadership**.

Cognizant Technology Solutions | Technical Project Coordinator

Jan 2020 - Aug 2022, Bengaluru

- **Led the design and development of an enterprise-wide automated production tracking system for a client**, integrating real-time analytics to enhance operational efficiency, improving data integrity, and reducing errors by **30%** across multiple production sites.
- **Drove the implementation of a production visibility program**, collaborating with business, engineering, and IT teams to ensure seamless system adoption, reducing issue resolution time by **40%**.
- **Championed a predictive quality control program**, incorporating **automated defect tracking and predictive analytics**, reducing unplanned disruptions by **12%** and improving quality control efficiency.
- **Spearheaded the modernization of the automated production tracking platform**, ensuring **scalability, performance optimization, and seamless multi-site integration**, increasing system processing speed by **25%**.
- **Defined program goals, risk mitigation strategies, and implementation roadmaps**, ensuring **executive buy-in and seamless integration** into existing workflows.
- **Drove executive alignment by presenting a data-backed business case**, securing budget approvals, and overseeing program milestones to ensure successful rollout across **multiple production lines**.
- **Implemented data-driven decision-making frameworks**, reducing reporting overhead, optimizing resource allocation, and improving scalability for expanding manufacturing operations.
- **Optimized stakeholder communication processes**, introducing **automated performance reporting features**, eliminating manual status updates, and improving **real-time collaboration** for production teams.

EDUCATION

Northeastern University, Boston, MA
RV College of Engineering, Bengaluru, India

Master of Science in Engineering Management
Bachelor of Engineering in Electronics and Communication
