

XINGTAI LI

AI/ML Engineer | GenAI | LLMs | MLOps

(201) 429-7448 | xingtali1993@gmail.com | Kirkland, WA | LinkedIn

SUMMARY

Senior Machine Learning Engineer with 8+ years of experience building and deploying large-scale AI systems across generative, predictive, and real-time domains. Expert in deep learning, LLM orchestration, and cloud-native MLOps, combining research innovation with production-grade engineering to deliver measurable impact. Proven success in designing end-to-end ML pipelines, from data ingestion and distributed training to online serving and automation, powering billions of intelligent interactions. Passionate about leveraging AI agents, multimodal learning, and generative modeling to create adaptive, scalable systems that enhance creativity, personalization, and decision intelligence.

SKILLS

Deep Learning | LLMs | Diffusion Models | GenAI | Recommendation Systems | Multi-agent AI | RAG | LangChain | LangGraph | Kubernetes | Docker | Kubeflow | MLflow | Airflow | CI/CD | Model Monitoring | Spark | Big Data | Kafka | Flink | Streaming Pipelines | AWS | GCP | Azure | Microservices | Python | PyTorch | Tensorflow | scikit-learn | SQL | Java/Scala | Linux | Git

PROFESSIONAL EXPERIENCE

Sr. Machine Learning Engineer | Adobe | San Jose, CA

Oct 2021 – Present

- Built generative AI models (Firefly) for text-to-image and style generation, powering creative tools used by millions worldwide.
- Built LLM-based assistants and RAG-driven multi-agent systems (LangChain, AutoGen), integrating GPT-4, FLAN-T5, and custom transformers to automate workflows and improve creative personalization
- Integrated GPT-4, FLAN-T5, and domain-specific transformer models into retrieval-augmented pipelines, improving creative automation and personalization accuracy.
- Optimized diffusion model training and inference on NVIDIA GPU cloud, achieving faster generation speeds and scaling to 7B+ AI creations.
- Delivered secure, transparent AI systems with built-in content credentials for responsible and enterprise-ready generative workflows.

Sr. Software Engineer | Nordstrom | New York, NY

Sep 2019 – Oct 2021

- Built Nordstrom's core ML platform (Cerebro) to automate model training, deployment, and monitoring using Kubernetes, Docker, MLflow, and Airflow, cutting deployment time from weeks to minutes.
- Designed and scaled real-time data pipelines with Kafka, Spark, and Flink that powered fraud detection, recommendation engines, and personalized product feeds across web and mobile.
- Delivered production-grade ML systems for outfit recommendations (The Outfitter), visual search, and inventory forecasting, serving millions of users and driving measurable growth in engagement and sales.
- Implemented CI/CD and monitoring for 100+ AI models using Prometheus and Grafana, improving reliability and transparency in ML operations.
- Partnered with data science teams to unify offline and online ML workflows, transforming Nordstrom into a data-driven, AI-powered retailer with faster insights and higher personalization accuracy.

Machine Learning Engineer | Allstate | Jersey City, NJ

July 2017 – Sep 2019

- Built and deployed large-scale ML pipelines using Spark, Kafka, and Impala, processing billions of insurance records for pricing, fraud, and claims prediction.
- Designed real-time risk-scoring and claims automation systems, cutting average claim cycle time by 40% through predictive modeling and computer vision.
- Developed and productionized deep learning models (TensorFlow) for damage assessment and VIN/odometer extraction, replacing manual inspections and saving thousands of hours annually.
- Created RESTful ML services for fraud detection and underwriting, enabling enterprise-wide reuse and fast integration with core systems.
- Championed a data-driven culture, helping transform legacy analytics into cloud-first, AI-powered products.

EDUCATION

MASTER'S DEGREE | Computer Science and Statistics | University of California, Davis

2015 – 2017

BACHELOR'S DEGREE | Biological System Engineering | University of Wisconsin-Madison

2011 – 2015
