

Curriculum Vitae of Urmi Sahoo

urmi.bhakta.sahoo@hotmail.com | [linkedin.com/in/urmibhakta](https://www.linkedin.com/in/urmibhakta)

San Francisco, CA • 310-291-9467

US Citizen and Experienced IT Consultant with over 10 years of client engagement experience in enterprise's digital transformation KPI based engagement delivery. Skillful in implementing large-scale automation solutions. Managing onshore and offshore team and cross-collaboration. Thrives in fast-paced, service-oriented environments. Willingness to travel and work at client sites as needed.

TECHNICAL EXPERTISE & SKILLS

Programming Languages: Java, Python.

Test Automation: Selenium (TestNG, Cucumber), Maven, Gradle, Apache POI.

Mobile Automation: Appium, Perfecto.

API Testing: Rest Assured, POSTMAN, Playwright, API testing with PyTest

Databases: PostgreSQL.

RPA: MABL.

Reporting Tool: Allure, ChainTest, Extent Report.

Defect Management: HP-ALM, JIRA, CA-Rally, Confluence, Azure Boards, Gitlab, Zephyr.

Project Management: SAFe, Agile (Scrum, Kanban), Waterfall.

Source Code Versioning: Bitbucket, GitHub, Azure repository.

SW Testing: E2E testing, Functional testing, Regression, Smoke testing.

DevOps: Jenkins, SonarQube, Azure DevOps pipelines.

Distributed Execution: Selenium Grid, Azure DEX Agents.

Software Testing Life Cycle (STLC): Requirement Analysis, Release strategy, Requirement Traceability Matrix.

IDE: Eclipse, VS Code, IntelliJ, Atom, PyCharm.

CLIENT ENGAGEMENTS & EXPERIENCE

Accenture engagements

July 2019 - current

Sr. Automation Engineer ((Arizona State: Medicaid), Phoenix, AZ)

- Worked closely with a team of **4 automation engineers** to develop and implement automated test scenarios for migration from Mainframes to Azure Cloud.
- Utilized **Java** and **Selenium TestNG** in a **Gradle** project within **IntelliJ**. Integrated **ChainTest** for detailed test reporting and configured **Azure Pipelines** for CI/CD, managing the code within an **Azure repository**.
- Validated **API requests/responses/endpoints** integrity using **POSTMAN** and **PyTest** for automated test assertion and functional validation.

Sr. Automation Engineer ((Veterans Affairs: FAR Dignity), Arlington, VA)

- Collaborated with a team of **3 automation engineers** to automate **JIRA** test scenarios using **Python** and **Selenium TestNG** framework in a **Maven-based** project for regression and smoke suites across multiple parallel releases. **Github** was used for code versioning and **Allure** reporting provided detailed test reports.
- Developed **PostgreSQL** scripts to reset test data, executed daily test suites on **Jenkins**, provided daily status and triaged defects, **reducing** manual smoke test **run time from 1 hour to 30 minutes** with the E2E smoke automation suite.

SW Test Automation Lead, (Allianz, Minneapolis, MN)

- **Worked in conjunction with 7 engineers** (5 offshore, 2 onshore) to automate Accenture's Life Insurance Platform (ALIP) UI using a **Rest Assured + Selenium + Cucumber** framework with **TestNG** in a **Maven-based IntelliJ** project.
- Integrated **Extent Reporting** for test results and provided weekly automation updates to the **Client QA VP**.
- Managed defect escalation and daily standups, achieving **2,000+ hours of manual testing savings**.

Onshore Automation Lead, (Accenture CIO-HCM, San Francisco, CA)

- **Facilitated a team of 7** (4 offshore, 3 onshore) to automate Accenture's CIO-HCM JIRA testcases using **Playwright**.
- Led SWAT calls with the client, enabling approximately \$8.9M in savings in FY21 and FY22 by leveraging **Playwright** and other automation tools for continuous testing, significantly improving efficiency over traditional methods.

Automation Lead, (Kaiser, Pleasanton, CA)

- **Led** a team of **8 offshore automation engineers** to automate **HP-ALM** regression, smoke suites for **Oracle HCM Cloud**, delivered **Requirement Traceability Matrix**; automated using **Selenium-JAVA** based **POM** framework via **Jenkins**.
- Managed version control for **300+ scripts** using **GitHub** and developed utilities to update HP-ALM test results post-execution using **Python**.

MFA Test Engineer, (Travelers, Hartford, CT)

- As **Onshore Test Lead**, developed test strategy to **migrate 500 internal applications** to Microsoft Authenticator MFA.
- Coordinated with application owners to define prompt patterns for MS Authenticator and worked with the PM and IAM SMEs to establish a testing schedule and contingency plans.

Application Deployment Engineer, (GAP, Pleasanton, CA)

- Implemented application migration for Old Navy via Accenture for Cloud (A4C) during divestiture from GAP, deployed applications end-to-end on Cloud using SRDs/PRDs.
- Raised IAM tickets, ran scripts to configure MFA, allocated memory with PCF commands, requested Resource groups and created requests for Subnet/VNet requests for Azure/Linux deployment, coordinated through **ServiceNow/JIRA**.

Onshore Automation Lead, (Splunk, San Jose, CA)

- Led an offshore team of 8 QA engineers in Agile to automate 500+ regression **Zephyr** test cases with **MABL** (RPA tool) for the client's Security platform (Phantom).
- Analyzed nightly **GitLab** regression runs and triaged defects with client SMEs and stakeholders.

Infosys engagements

Oct 2018 - Jun 2019

Lead QA Consultant, (Blue Shield of California, Oakland, CA)

- Developed test release strategy and designed **JIRA** test cases for the client's mobile member site in **Agile** environment.
- **Managed onshore/offshore team** cadence, raised defects, and delivered test execution reports for code coverage.

Automation Lead, (Wells Fargo, San Francisco, CA)

- Established Automation-as-a-Service for Treasury LoB, automated mobile check deposit application on Android/iOS; **led a team of 5 automation engineers** and conducted automation feasibility analysis.
- Converted **HP ALM** test cases into regression suites using **Perfecto**, **Appium**, and QMetry and used **Github** for code versioning. Collaborated on **JIRA** for defect triage, ran **Jenkins** jobs, and generated **SonarQube** reports.

IBM - GBS engagements

Aug 2016 - Oct 2018

Lead Financial IT Consultant, (U.S. Bancorp, Minneapolis, MN)

- Integrated IBM's real-time money transfer (FDM) into client products; translated PRD requirements into user stories and **managed a QA team of 5 automation engineers** using **SAFe** methodology.
- Implemented **Test Data Driven** (TDD) **Selenium TestNG** test cases in **Python** and used **Bitbucket** for version control.

Process Automation Lead, (Santander Bank, Boston, MA)

- Documented **300+ automation scenarios** in HP ALM and automated with **Selenium** WebDriver in **Java**, using **TestNG** and **Apache POI** for Data Driven Testing in a **Maven** project.
- Integrated **Sikuli** for PDF automation and recorded execution results in **CA Rally**.

AI Solution Engineer, (Humana, Louisville, KY)

- Developed test strategy for integrating IBM Watson AI and Speech-to-Text/Text-to-Speech solutions with client APIs,

handling ~700K monthly customer calls which were previously outsourced.

- **Led offshore team** for SWAT calls, held scrum meetings for sprint task delegation, tested patient protected health information (PHI) scenarios under HIPAA, and reported defects in **GitLab**.

Automation Engineer, (T-Mobile, Seattle, WA)

- Developed automation suites for IBM Master Data Management (MDM) in a sprint-based delivery model.
- Created **TDD**-driven **Selenium** scripts in **Java** with **TestNG**, **Maven**, and **Apache POI**; ran regression suites in **Jenkins**, tracked results in **CA Rally**, and utilized **SonarQube** for code coverage.

AI Implementation Engineer, (IBM-Watson, Littleton, MA)

- Conducted competitive analysis of **Watson AI** against Facebook **Wit.AI** and **Google Api.AI**; integrated Watson and Wit.ai with Facebook and Slack for AI chatbot development.
- Integrated Watson Retrieve/Rank and Text-to-Speech on IBM Bluemix, documented user pain points, enhanced usability and created materials to improve Google search ranking for Watson Conversation APIs.

Software Engineer, Dev Test – Infinera Corporation, Sunnyvale, CA

Apr 2014 - Oct 2015

- Collaborated in an **Agile** environment to design test cases for optical features, executed functional testing for CISCO routers, wrote unit tests with **TDD** practices.

Software Engineer – Qualcomm, San Diego, CA

Jul 2013 - Apr 2014

- Planned and tested application software integration for GPSTestPro and FieldTool using VB.Net, collaborated with developers and offshore QA to resolve defects, analyzed feature coverage,

Software Development Intern – EmbedUR Systems, Chicago, IL

Aug 2012 - Feb 2013

- Collaborated with the offshore software team to document test requirements, gathered management feedback for PRD and SRD documents while developing strategies to exceed QA expectations.

EDUCATION

University of Southern California, Viterbi School of Engineering, Los Angeles, CA
M.S.E.E., Computer Networks

Aug 2010 - May 2012

University of Mumbai, School of Engineering, Bombay, India
B.E., Electronics and Telecommunications

July 2005 - May 2009
