Education

California State University, Dominguez Hills – Master in Computer Science GPA 3.89	June 2025
East Los Angeles College – Non-Degree GPA 3.90	Dec 2021
South China Agricultural University – Bachelor in Architecture	June 2016

Projects

Automated Bladder Cancer Screening With SeUNet-Trans

Github

- Extended the Cedars-Sinai AI Campus bladder cancer screening project. Implemented and optimized a hybrid deep learning segmentation model.
- Achieved accurate nucleus/cytoplasm segmentation and N/C ratio prediction (Spearman correlation: 0.86). Built an ordinal regression model for diagnostic classification; all parameters statistically significant ($p < 0.001$).

Hangar-Talk

Github

- Developed a responsive web application for Gundam enthusiasts using React and Vite, featuring dynamic routing and seamless navigation.
- Integrated Supabase for real-time data management, enabling users to create, edit, delete, upvote, and comment on posts.

Logo Maker

Github

- Developed a cross-platform graphical logo design tool using C++ and SFML, featuring interactive editing, custom fonts/colors/effects, theme selection, undo/redo, file navigation, and PNG export.
- Implemented a user-friendly GUI with efficient history management and project loading, supporting easy maintenance and extensibility through CMake-based build system.

Experience

Administrative Intern, City of Carson – Carson, CA

Dec 2024 – May 2025

- Designed structured Excel databases to digitize legacy pipeline franchise records, improving retrieval speed and enabling future system integration.
- Configured templates within the EP&L Permit Management System and validated functionality, ensuring alignment with permitting workflows.
- Conducted cross-city analysis of Commercial Façade Improvement Programs; summarized findings and program documentation in technical reports and tables to optimize internal processes.

Store Manager, T&A Tea Inc. – Monterey Park, CA

Oct 2016 – Aug 2024

- Developed Excel macros to automate tip distribution and monthly reporting, reducing manual processing time by 70% and minimizing errors.
- Built a Python application for customer contact management.
- Directed inventory management and vendor relations while leading a team of ~10 employees, recruiting, training, and mentoring staff to ensure operational continuity, teamwork, and service quality.

Architectural Design Intern, China Southern Architectural Design & Research Org – China	Mar 2016 – July 2016
Jianghai Planning and Architectural Design Institute – China	Nov 2015 – Feb 2016
Dogma Design Co., Ltd. – China	July 2015 – Oct 2015

Skills

Programming Language: C++, HTML, CSS, JavaScript, Java, Python
Technologies: React, Bootstrap, SFML, Git, AWS, Docker, Jupyter Notebook
Certificates: 2 Web Development training certificates from Codepath
