Experience

Senior Web Developer

Globus Family of Brands

<https://www.globusjourneys.com>

06/2022-02/2024

Developed new applications in a .NET oriented environment. Assisted with maintenance of several websites and web applications that utilized a broad array of technologies.

- Led full-stack development of **.NET**-based applications across the complete software development lifecycle (SDLC) within a DevOps-oriented environment.
 - Maintained and enhanced a diverse portfolio of web applications and business critical software, ensuring alignment with established design, development, and testing standards.
 - Collaborated cross-functionally with development, QA, and operations teams to support agile delivery processes and foster a culture of knowledge sharing.
 - Developed features using technologies such as **C#.NET, Angular, React, SQL, Oracle, MongoDB, and Postman API**.
 - Built and executed automated test suites; supported continuous integration and deployment (**CI/CD**) pipelines using **Azure DevOps**.
 - Delivered post-deployment support, including issue tracking, bug fixes, and implementation of user-requested changes.
 - Authored comprehensive technical documentation to capture system enhancements, workflows, and architecture updates.
-

Web Developer

Society for Mining, Metallurgy and Exploration

<https://www.smenet.org/>

01/2020-10/2020

Developed the new SME website to replace several older sites and bring a suite of new features to improve the user experience for the society's members.

- Architected and implemented foundational components for a new web application using **C#.NET** and **MVC architecture**.
 - Developed within the **Kentico CMS** platform, leveraging its **MVC-based architecture** for scalable content management solutions.
 - Built responsive, modular front-end interfaces using **Angular, React, Bootstrap, jQuery, HTML, and JavaScript**, adhering to modern UI/UX best practices.
 - Designed and implemented **responsive design** principles to ensure optimal performance across devices and screen sizes.
 - Integrated and consumed **RESTful APIs** to deliver dynamic content, including documents, user profiles, news articles, and blog posts.
 - Utilized **Azure DevOps** for task tracking, version control, and continuous integration in a collaborative development environment.
 - Contributed to Agile ceremonies, including daily stand-ups and code reviews; mentored team members and provided training support across multiple projects.
-

Web Developer

Vitalant

<https://vitalant.org/>

06/2017-07/2019

Developed the Vitalant company website, the starting point for individuals who wish to donate blood.

- Vitalant.org was built on the **Kentico CMS** with custom modules utilizing **C#.NET, Javascript, Angular 5, Node.js, SQL, and Bootstrap** and using **Agile methodologies**.

Summary

Full Stack Web Developer with around 10 years of experience, having built from the ground up several website and web applications, following the full software development life cycle.

Proficient in front and back end development, including C#, .NET, Angular, React, JavaScript, Typescript, and SQL. Confident working independently to bring assigned projects to completion, and also enjoys collaborative environments.

Technical Skills and Tool Set

Skill-set – Front End

- JavaScript and assorted JS libraries (Angular, Typescript, React)
- jQuery
- HTML, CSS, SASS, LESS, Razor

Skill-Set – Back End

- C#
- .NET
- Relational Databases (SQL, PostgreSQL, Oracle, Node.js)

CMS

- Kentico
- DotNetNuke

Miscellaneous Tools

- Azure DevOps
- Postman
- TFS, GitHub
- Mirth Connect Certification

- Analyzed requirements and designed, developed and implemented software applications for multiple websites.
 - Determined coding requirements for site creation, including e-commerce capability and specialized scripts.
 - Used programming capabilities in **C#, SQL, JavaScript, Angular** and other libraries as needed.
 - Consumed APIs for Google Maps and healthcare related services.
-

Web Developer

InnovAge

10/2014-05/2016

- Integrated Pharmacy Claims, Medical Information, and Patient Demographics into Jiva, a central 'source-of-truth' database and website built with **MVC, C#.NET**, and **Angular**.
 - Acquired **Mirth Connect** certification, and configured channels to integrate healthcare systems and messaging between applications.
 - Integrated with several **RESTful Web API**'s to pull, send and transform data into **SOAP, REST, JSON**, and **XML**, into a **SQL** database.
 - Developed **XSLT** stylesheets to transform **XML** data into different outputs.
 - Assisted in development of website to manage patient health records and information using **Javascript, AngularJS**.
 - Implemented **SQL** procedures to manipulate information for hundreds of thousands of records.
-

Web Developer

Applied Business Solutions

06/2013-08/2014

- Developed website Athletes Club, a hybrid multi-page single page application using principally **MVC, VB** and **C#.Net, KnockoutJS**, and **AngularJS** with **Oracle** on the backend, employing Agile methodologies.
 - Built with responsiveness in mind. Every page designed to look right on the desktop, tablet, and phone.
 - Assisted on a time-sheet and billing project using **AngularJS**.
 - Worked in a high pressure environment with sudden requirement changes, new feature requests, and shifting deadlines.
-

Web Developer

Marsh & McLennan

09/2011-10/2012

- Worked on a **.NET** and **SQL** based country profiles database that displays Insurance information on every field in every country in which Marsh currently does business.
- Designing front end display for Country Profiles database within the **DotNetNuke** content management system, enabling users to view detailed information through a variety of modules.
- Created a search interface to enable users to browse through hundreds of industry articles, filtering by carrier, industry, or product.
