📞 (929) 430-2825

Summary

- Experienced Full-Stack Python Developer with a total of 9+ years of expertise in developing and maintaining web applications, back-end services, and databases.
 - Skilled in Python/Django, React, Angular, JavaScript, Node.js, HTML, CSS, microservices architecture, automated testing, continuous integration, and software libraries and frameworks.
 - Proficient in cloud-based platforms, including AWS, Azure, and Google Cloud, showcasing expertise in leveraging diverse cloud services.
 - Proven track record in improving user engagement, revenue, system performance, and security while reducing operational costs, bugs, and software release times.
 - Designed and implemented a CI/CD system, optimized code for performance and reliability, and created microservices databases for scalability.
-

Professional Experience

Full Stack Engineer

Confiz (Apr 2020 – present)

- Proficiency in various programming languages such as Python, JavaScript, Node.js and SQL.
- Proficient in working with cloud-based platforms like AWS, Azure, or Google Cloud.
- Strong understanding of distributed systems, data modeling, and database design.
- Developed and maintained accounting and information systems for the health insurance sector.
- Extensive experience in building and optimizing large-scale data pipelines, architectures, and data sets.
- Extensive expertise in server-side programming, as well as a good understanding of client-side technologies.
- Engaged directly with clients, ensuring a thorough understanding of requirements and actively participating in the design and architecture phases.

Senior Software Engineer

Tomarket (Feb 2018 – Mar 2020)

- Designed and implemented data models and database schemas to optimize data storage and retrieval.
- Implemented data quality processes and ensured data integrity and accuracy throughout the data lifecycle.
- Proficient coder in multiple languages and environments including Python, Django, Flask, MongoDB and SQL.
- Implemented monitoring and alerting systems to proactively identify and address data quality and performance issues.
- Worked closely with stakeholders to understand their data requirements and translate them into technical specifications.
- Had an active part in resolving an average of 10 technical issues per week, resulting in a 25% increase in overall system efficiency.
- I ensured ongoing collaboration between users, developers, and QA teams throughout the SDLC to deliver high-quality software solutions.

Software Engineer

Webtrix (Apr 2016 – Jan 2018)

- Created and maintained more than 5 web applications using a range of technologies including Python Django, React, Angular, and JavaScript.
 - Proposed and applied both business and technology solutions to improve processes efficiently, resulting in a 50% reduction in manual efforts.
 - Refactored an extensive python application into a service-oriented architecture, resulting in a 50% reduction in dependencies, and a 25% improvement in overall performance and throughput.
 - Performed efficient delivery of code based on principles of Test Driven Development (TDD) and Continuous Integration (CI/CD) to keep in line with Agile Software Methodology principles and SCRUM process.
-

Technical Skills

Languages & Frameworks:

[Python](#) ([Django](#) [Flask](#) [Fast API](#)) [Node.js](#) [JavaScript/TypeScript](#) [React](#) [Angular](#) [HTML/CSS](#)

Databases:

[MySQL](#) [PostgreSQL](#) [SQL Lite](#) [Redis](#) [SQL](#) [MongoDB](#) [DynamoDB](#) [Elastic Search](#) [Solr](#)

API Development & Testing:

[Rest/Restful API](#) [Fast API](#) [GraphQL](#) [gRPC](#) [Postman](#) [Swagger](#) [FastAPI](#)

Cloud Services & DevOps:

[AWS](#) [MS Azure](#) [GCP](#) [Graph-QL](#) [Docker](#) [Kubernetes](#) [Jenkins](#) [Travis CI](#) [Circle CI](#) [GitLab](#) [Heroku](#) [CI/CD](#) [GitHub](#) [Bitbucket](#)

Testing & QA:

Projects

HoneyBricks:

HoneyBricks is a technology platform facilitating investor access to premium multifamily investment opportunities. It enables to achieve above market returns by co-investing with seasoned real estate professionals.

Green Ninja:

A middle school science program that prioritizes eco-friendliness and fosters practical science education through experiential learning, addresses the NGSS through the lens of the environment and helps students discover the relevance of science in their lives.

Good Today:

A non-profit platform that facilitates daily charitable giving to numerous causes and organizations worldwide.

Education

Bachelor's degree in Computer Science
