

Ripal Darji

Seattle, WA (Open to relocate) | [Linkedin](#) | +1-425-900-2832 | ripaldarji16@gmail.com

- Senior Full-Stack Architecture Leader with 10+ years of experience driving large-scale application development, architectural migration to Microservices/SaaS, and team leadership (up to 10 engineers). Delivered quantifiable performance gains (up to 22% data retrieval improvement) and 20% cost reduction across Financial Services, Healthcare, and ERP domains.
- **Expertise:** Java (Springboot), PHP, NodeJS, ReactJS, Angular, Cloud (AWS), Microservices, and advanced security protocols (OAuth 2.0, 2FA, LDAP). Active open-source contributor (Cohere For AI's Aya Dataset).

WORK EXPERIENCE

Pica9.

Seattle, WA

Senior Software Development Engineer

April 2024 - Oct 2025

- Led modernization of the company's front-end architecture by upgrading **Bootstrap (v5)**, **jQuery (v3)**, and **React (v19)**, improving performance, maintainability, and compatibility across the product suite.
- Refactored and optimized core React components, resulting in **30% faster load times** and improved developer efficiency through cleaner state management.
- **Containerized front-end and backend services using Docker**, streamlining local development, deployment, and environment consistency.
- Designed and implemented **new customer-facing features** that enhanced usability and directly increased client engagement by **15%**.
- Collaborated with **cross-functional teams** (product, design, backend) to translate business requirements into scalable, high-quality technical solutions.
- Provided **technical leadership** by reviewing code, mentoring junior developers, and defining modern front-end.
- Proactively reduced technical and production bugs by **25%** through better code organization, testing, and documentation practices.
- Acted as a **bridge between engineering and product teams**, ensuring customer needs were reflected in technical implementation and future product roadmaps.

Tata Consultancy Services. (Royal Bank of Canada - RBC)

Maharashtra, India

Software Development Engineer

August 2022 - March 2024

- Migrated legacy web services to a **REST-based microservices** architecture with **MVC design pattern** in **Java-Springboot**, **PostgreSQL** using **Redis** for caching frequently accessed data and improving performance, while using **OpenShift** and **IHS** for Java requests, and implementing session and cookie-based **authentication** for more security.
- Led a team of **10 engineers** and developed a user-friendly banking platform, including features for filtering and sorting transaction, viewing statements, downloading account information and making **ACH, C2C, Wire transfers** as well as customer service and support, alerts and notifications and mobile banking integration in **Angular (v13)** using **Typescript**, implemented Two-Factor Authentication (2FA) alongside **OAuth 2.0** and integrated with RBC's OAuth Broker (ROB) services to provide secure and convenient user authentication.
- Developed and maintained **Angular interceptors** to add authentication credentials, log all HTTP requests and responses, cache frequently accessed data, handle errors in a centralized way, improving performance and security.
- Collaborated with stakeholders to understand client requirements and translate them into technical solutions.
- Continuous Integration/Deployment Pipeline Integration, pull requests, code reviews, load/stress testing, unit/integration testing.
- Optimized data pipelines for performance, scalability, and reliability, considering factors like data volume, processing latency, and fault tolerance.

Bacancy Technology.

Gujarat, India

Senior Software Engineer

December 2021 – August 2022

- Architected and scaled a high-availability **healthcare recruitment platform** using **Angular (v9)**, **Laravel**, and **MySQL**, supporting **2,000+ active healthcare facilities** and implementing **Role-Based Access Control (RBAC)** to ensure data security and compliance.
- **Reduced client hiring time by 20%** and improved operational efficiency by **streamlining end-to-end workflows** from job posting to hiring, while **integrating third-party APIs** such as **Right Signature** (for secure digital signing) and **Open GSA** (for U.S. government datastore access) to enhance platform functionality and reliability.

Brainvire Infotech Inc.

Gujarat, India

Senior Software Engineer

June 2018 - December 2021

- Architected and developed large-scale ERP and University Management Systems using **ReactJS**, **Microservices**, **ZendPHP**, **BackboneJS**, **MongoDB**, and **PostgreSQL**, delivering **multi-tenant SaaS platforms** with **data visualization (D3.js)** and **Elasticsearch-driven search optimization**, resulting in a **22% faster data retrieval** and improved operational efficiency.
- Led cross-functional teams to implement core modules including **LDAP authentication**, **profile/activity management**, and **workflow automation** for **Grants**, **IRB**, and **Sponsored Projects**, while **optimizing AWS infrastructure (EC2, S3, Cloud provisioning)** and automating **report generation and email notifications**, ensuring high availability, scalability, and streamlined faculty communication.

24*7 Developers

Gujarat, India

Developer

January 2015 – June 2018

- **Developed and maintained** a full-scale **Inventory Management Application** using **PHP (CodeIgniter)**, **JavaScript**, and **MySQL**, implementing core modules for **Product Management**, **Inventory Tracking**, **Purchase/Sales Orders**, and **Reporting**, with features like **barcode scanning**, **multi-location handling**, **low-stock alerts**, and **system integrations** to streamline business operations.
- **Improved system performance and reliability** by executing **bug fixes**, **database optimizations**, and **Git-based CI/CD workflows**, enhancing **application stability**, **scalability**, and **operational efficiency** across teams.

EDUCATION

Gujarat Technical University, India

Bachelor of Engineering (CGPA: 9.3)

India

SKILLS & INTERESTS

- Java | Springboot | Maven | Laravel | CodeIgniter | ZendPHP | Lumen | Laravel Live wire | Laravel UI | OOP
- MYSQL | MongoDB | PostgreSQL | Caching | Redis | Elasticsearch | DynamoDB | MySQL Workbench | pgAdmin
- Bootstrap | Tailwind CSS | Angular Material | Material UI
- JWT | OAuth 2.0 | JSON | XML | GraphQL | API Gateway | Git | Firebase | RabbitMQ | Laravel Passport
- ReactJS | AngularJS | Angular | Redux | Javascript | Typescript | BackboneJS | jQuery | D3.js
- Cloud Computing | Microsoft Azure Services | CI/CD | Amazon Web Services AWS | Lambda | Helios | SonarQube | Jenkins | Openshift
- Docker | Kubernetes | Design Patterns | Microservices | Monolithic | Agile Methodology | Swagger | JIRA | IntelliJ Idea | VS Code
