Experience

Heniff Transportation Solutions Architect

Aug 2018 – Present

- Spearheaded the development and implementation of a strategic plan for integrating Trimble TMS, Dynamics 365 Finance and Operations, Power BI, & SharePoint, achieving a reduction in process redundancies and improving data flow efficiency.
- Led a cross-functional team in the execution of a seamless migration to a hybrid cloud environment, utilizing Azure Application Services and reducing operational costs by without service interruption.
- Collaborated with stakeholders to deliver a custom billing solution that consolidated & summarized customer billing, resulting in an accelerated sales cycle and supporting an increase in year-over-year revenue.
- Designed and deployed enterprise-wide .NET middleware solutions that streamlined communication between legacy and modern systems, resulting in successful Mergers & acquisitions.
- Comfortable managing developers, administrators, and architects; particularly those working in Microsoft Dynamics 365 SDK, C#, X++ , ASP.NET, Power BI, SQL Server Integration Services, Visual Studio, SharePoint, Azure App Services, and Logic Apps

Miller Transporters Inc. (Acquired by Heniff Transportation) DevOps Supervisor

Jul 2014 – Jul 2018

- Led Application Design sessions & Code Reviews to discern business needs and build a prototype of the target system as business requirements were provided.
- Implemented software solutions that significantly streamlined business processes for managing tasks and documents across multiple teams, processed a large volume of correspondence for review and approval, archived inactive data, and simplified reporting.
- Managed all aspects of a major upgrades that required full migration of code and data. Worked closely with system administrators, database administrators and software developers to modify code to conform to new ERP schema.
- Designed test plans, wrote test cases and test steps. Executed tests and tracked all results in Azure DevOps Server. Trained testers on the use of Azure DevOps.

Miller Transporters Inc.
Software Developer

Sept 2008 – Jul 2014

- Lead Developer in the implementation of several key app services such as SQL (Stored Procedures), C# (.NET Web Apps), and EDI (Cleo) Development.
- Develop enterprise reports for department managers using Microsoft Visual Studio and SQL Server Reporting Service (SSRS).
- Develop web-based, PowerShell, and command-line tools that allow users to configure and monitor Trimble TMS & Dynamics 365 components.

DREAM Inc.
Application Support Analyst

Jun 2007 – Sept 2008

- Provided system and application support such as performing upgrades to workstations; installing and configuring network/local printers, ensure network security, and troubleshooting other equipment as required.
- Educate and work with end-users to enhance their knowledge of ITS best practices and procedures in group training sessions and seminars
- Attend meetings to evaluate business conditions and recommend technology improvements to increase efficiency and revenues.

Education

Mississippi State University
Bachelor of Business Administration in Business Information Systems

May 2010
GPA: 3.3/4.0

Skills

Programming & Databases: C#, X++, MS SQL, Azure SQL, PostgreSQL, ASP.NET Core
Azure DevOps Tools: Azure App Services, Logic Apps, Azure Git, Azure DevOps & Repos
Microsoft Power Platform: Power Automate, Power BI, Power Pages, SharePoint, SSRS
Dynamics 365 Cloud Platforms: Finance and Operations (Dynamics AX), Business Central (Dynamics Navision)

Other

Projects: Mergers & Acquisitions System Migrations, Azure Migration (On-premises to cloud)
Industry Knowledge: Supply Chain, Procurement and Sourcing, Sales order, Inventory, Warehousing, Transportation, and Accounting (Quote to Cash)
Professional Development: Attend annual Microsoft Ignite Conference, Proof point Cyber Security Training (2024)
