701-587-2485 | dangolrubensingh@gmail.com | [linkedin.com/in/dangolrubensingh](https://www.linkedin.com/in/dangolrubensingh)

Senior software developer with 10 years of noninternship experience in building and deploying high-performance, scalable web applications and microservices. Proficient in leveraging tools within the Spring eco-system (Spring Boot, Spring Security), SQL, Apache Kafka, Angular, and React.js. Proven ability to lead teams, optimized application performance and deliver complex solutions in fast paced Agile environments. Passionate about the ever-changing world of the software developer.

EDUCATION

Minnesota State University Moorhead

Bachelor of Science, Computer Science

Moorhead, MN

August 2012 – May 2015

EXPERIENCE

Backend Java Developer

Feb 2022 - Feb 2025

Kroger

Cincinnati, OH (Remote)

- Created back-end systems within the team that used Spring Boot and Kafka to create SaaS applications resulting in over 81 million dollars in profit by streamlining business processes to price products competitively within Kroger
- Collaborated with senior developers to double the performance of applications by batch processing Kafka streams and cron jobs utilizing multi-threaded libraries like flux to process multiple threads at the same time ensuring efficient and fast data transfers between micro services
- Managed and optimized CI/CD pipelines using Harness for seamless deployment of AKS (Azure Kubernetes Service) clusters in Azure Cloud, ensuring automated, scalable, and high-availability infrastructure.
- Improved code coverage and eliminated code smells within our applications by about 50 percent using tools like Snyk, SonarCube and Copilot
- Used tools like Dynatrace and Data Dog to maintain observability of our micro services and track and fix underperforming code by looking at the distributed traces

Full Stack Developer

Sep. 2019 - Jan 2022

First Chatham Bank

Savannah, GA

- Worked on implementing modules utilizing core Java API's, multi-threading and Object-Oriented designs to serve robust microservice applications.
- Designed and developed scalable software solutions for core banking systems and improved transaction processing performances and enhanced customer user experience.
- Developed and maintained secure, high-performance banking web applications using React, Redux, and TypeScript, ensuring seamless user experience and compliance with financial regulations.
- Collaborated with business analysts and stakeholders to gather and refine requirements, planned sprint refinement meetings for new banking products and features, aligning technical solutions with business goal

Java Developer

Nov. 2017 – Aug 2019

Prime Lending

Dallas, TX

- Assisted in the development and maintenance of loan management systems, contributing to features that streamline loan application, approval, and disbursement processes.
- Collaborated with senior developers to integrate third-party APIs for credit scoring, payment processing, and fraud detection, ensuring seamless data flow across systems.
- Participated in code refactoring and aligning code with modern practices ensuring code quality.
- Assisted in maintaining and improving performances of SQL queries within the microservices by generating and implementing query plans.

Junior Java Developer

July 2015 – Oct 2017

SouthWestern Airlines

Dallas, TX

- Collaborated with senior developers to integrate external APIs for real-time flight data, including schedules, availability, and pricing, ensuring seamless customer interaction with the platform.
- Implemented basic features for a flight search engine, allowing customers to filter and compare flights based on criteria such as price, time, and duration.
- Designed and implemented robust unit and integration tests using JUnit for critical airline booking and payment systems, ensuring high code coverage, reliability, and compliance with industry standards.
- Worked with databases to retrieve and store flight schedules, customer profiles, and booking details, using SQL queries using SQL Server Management Studio to ensure efficient data retrieval and storage

TECHNICAL SKILLS

Languages: Java, Python, SQL (Postgres, MySQL), JavaScript, HTML/CSS, TypeScript, React.js, Angular

Frameworks: React, JUnit, Spring Boot, BootStrap

Developer Tools: Git, IntelliJ, Eclipse, Postman, Swagger, Azure Data Studio, SSMS, Visual Studio Code, Microsoft Azure

Databases: PL/SQL, MySQL, Cassandra, Azure SQL

SDLC Processes: Agile, Scrum, Test-Driven Development, Behavior-Driven Development, Microsoft Azure, Power Apps, Maven
