

Rushik Desai (Full Stack Developer)

Summary Email: Rushikdesai99.2024@gmail.com • Phone: +1 (909) 683-9078 • [LinkedIn](#) • Location: CA, USA

Results-driven **Full Stack Software Developer** with **3+ years of experience** in building **scalable, high-performance web applications** using **React, Angular, Node.js, and AWS**. Proven expertise in optimizing **UI/UX, cloud integration, and security** while improving **application efficiency** and reducing **latency**. Strong background in **RESTful APIs, GraphQL, CI/CD pipelines, and DevOps tools**. Passionate about solving complex problems and delivering **robust, scalable, and user-centric solutions**.

Education

Master of Science in Computer Science California State University, San Bernardino, Ca	Aug 2022 – May 2024
Bachelor of Technology, Computer Science & Engineering Vellore Institute of Technology, Hyderabad, India	Aug 2017 – Jul 2021

Skills

- **Programming:** JavaScript, TypeScript, Java, Python, SQL, C++, C
- **Frontend:** React.js, Angular, Next.js, HTML5, CSS3, Bootstrap, Material UI
- **Backend:** Node.js, Express, Spring Boot, RESTful APIs, GraphQL
- **Databases:** PostgreSQL, MongoDB, MySQL, DynamoDB
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, CloudFront, Route 53, CodePipeline, CodeDeploy), Azure DevOps, GCP
- **Infrastructure & CI/CD:** Docker, Kubernetes, Terraform, CloudFormation, Jenkins, GitHub Actions
- **Testing:** JUnit, Mockito, Jest, Mocha, Selenium, Playwright
- **Project Management:** Agile, Scrum, JIRA, CI/CD Implementation

Experience

- | | |
|---|----------------------------|
| Goldman Sachs, USA
Software Developer | Jul 2024 – Present |
| <ul style="list-style-type: none">• Developed an Insurance Quote and Policy Management Platform using Angular 12 and Spring Boot, improving user engagement by 35% and enhancing overall platform usability.• Built and optimized RESTful APIs and SOAP-based services, improving external system integration efficiency by 20%.• Implemented JWT-based authentication and OAuth 2.0 with Spring Security, reducing security vulnerabilities by 50%.• Leveraged AWS services (S3, Route 53, CloudFront CDN) to enhance cloud-based document storage, improving content delivery and reducing latency by 20%.• Designed real-time data streaming using Apache Kafka and Flink, improving communication efficiency by 40%.• Automated CI/CD pipelines with Jenkins, cutting deployment times by 60% and accelerating feature delivery.• Ensured system stability with unit and integration testing using JUnit and Playwright, reducing defects by 70%. | |
| TATA Consultancy Services, India
Full Stack Developer | Aug 2020 – Aug 2021 |
| <ul style="list-style-type: none">• Migrated two legacy applications from Angular.js to React TypeScript, improving performance by 30% and reducing load times by 25%.• Built interactive data visualizations using React Plotly.js and Material UI, increasing user interaction by 40%.• Optimized frontend performance and implemented responsive UI components, leading to a 15% increase in mobile accessibility.• Conducted unit and integration testing using Playwright, identifying and resolving 50+ critical bugs.• Collaborated with UX/UI designers and backend engineers to optimize frontend performance, reducing server load by 20% through efficient rendering and data-fetching techniques. | |
| ISparrow, India
Software Engineer | Nov 2018 – Jul 2020 |
| <ul style="list-style-type: none">• Developed a React JS web application to streamline health insurance product sales, utilizing React Hooks, functional components, and React Context for efficient state management, which enhanced performance across 3 responsive user layouts.• Designed and implemented a census upload feature on the employee details page, optimizing UI performance and reducing form completion time by 40% through lazy loading and debouncing techniques.• Integrated AWS Cognito for secure authentication, implementing OAuth 2.0 protocols to manage 4 user roles, ensuring robust user authentication, and improving overall security for sensitive data.• Developed GraphQL queries and mutations in Node.js (SAM) to call REST APIs for 30+ user forms, utilizing AWS AppSync for efficient data fetching, reducing server load by 20% and increasing data retrieval speed.• Created a boilerplate project with 15+ reusable components, streamlining development and reducing static site build time by 50% through component-based architecture and Webpack optimization.• Developed an auto-fill feature by implementing a custom autocomplete component, enhancing form usability by auto-populating multiple address fields based on a single street address input, leveraging JavaScript and HTML5 attributes for improved user experience.• Built and consumed SOAP-based web services for legacy data integration and ensured secure communication by implementing WS-Security standards. | |
